

5483-S

Sponsor(s): Senate Committee on Energy, Telecommunications & Utilities (originally sponsored by Senators Sutherland, Long, Smith, Winsley and Fairley)

Brief Description: Enhancing public telecommunication access.

SB 5483-S - DIGEST

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Specifies the guiding principles which state agencies should comply with in creating an electronic information storage or delivery system.

Provides that the requirements are guiding principles until the task force completes its final recommendations.

Coordinates the provisions of government bulletin board services.

Creates a Washington state gateway system.

Expands a worldwide web home page internet site.

Calls for the design of a government information locator system.

Calls for efforts to expand the Kiosk system.

Requests the creation of a fax-back demonstration project.

Establishes procedures for the sale or donation of surplus agency electronic equipment.

Makes an appropriation of forty-two thousand dollars to carry out the purposes of the act.
