Brief Description: Implementing fee changes and tax credits for the wastewater discharge permit program.

SB 6564 - DIGEST

Declares an intent of the legislature to provide for a workload-based fee structure and to provide mitigation for those small businesses and small municipalities that would face an undue economic impact under a workload-based fee structure, and provide phased mitigation for other permittees inordinately impacted by the revision of the fee structure.

Declares a further intent of the legislature to provide for cooperative program development and review in order to most efficiently and rationally achieve the fundamental goal of clean water.
