

SB 6375 - DIGEST

Requires the superintendent of public instruction: (1) With assistance from the state board for community and technical colleges and the institutions of higher education, to create a math performance incentive program to reward school districts that demonstrate improvement in student performance in mathematics;

(2) To submit a report of the completed design of the program to the quality education council and the appropriate legislative policy and fiscal committees; and

(3) Subject to the availability of funds, to provide monetary awards to school districts that have demonstrated improvement in student performance in mathematics.

Requires the state institute for public policy, with assistance from the education data center, the state board for community and technical colleges, and the institutions of higher education, to review data collected to determine if the program has produced an improvement.
