Background: Current law sets the limit on the number of rural health projects that can be funded at six. In 1990, the Department of Health (DOH) received applications for 18 potentially fundable projects. Even if funds were available, the department would be unable to provide assistance unless the number limit was removed. Also, current law provides for six additional "non-funded" sites to receive technical assistance from the DOH. DOH feels these numbers are arbitrary and may discourage communities from applying for available assistance.

Summary of Bill: The number six is deleted from both provisions, allowing any number of projects to be funded consistent with appropriation.

Fiscal Note: Requested January 21, 1991.

Effective Date: Ninety days after adjournment of session in which bill is passed.

Testimony For: This bill is needed to expand necessary health care in underserved rural areas.

Testimony Against: None.

Witnesses: Carole Washburn, Department of Health (Pro).
