Background: The Interlocal Cooperation Act permits any state agency or local government to enter into contracts with other public agencies to perform any governmental service, activity, or undertaking which each public agency is authorized by law to perform under an interlocal contract. Under an interlocal contract, one entity performs a service for another entity.

The Interlocal Cooperation Act also permits any state agency or local government to enter into agreements with other public agencies for the joint performance of any power, privilege, or authority that each of the public agencies are authorized to perform. An interlocal agreement must specify its duration, purpose, manner of financing the joint undertaking, method of terminating the agreement, and organization of a separate legal entity that is created to perform the joint power, privilege, or authority. This new entity that is created may include a nonprofit corporation.

The term public agency is defined in the Interlocal Cooperation Act to include the following governmental entities: (1) local governments of this state; (2) agencies of this state; (3) federal agencies; (4) Indian tribes; and (5) political subdivisions of other states.

Summary of Bill: The definition of the term "public agency" in the Interlocal Cooperation Act is amended to include nonprofit corporations incorporated by the state or an agency of the state.

This definition change would permit a local government or state agency to enter into agreements under the Interlocal Cooperation Act with a nonprofit corporation created by the state.
