**HB 2165 - H COMM AMD ADOPTED 02/07/94**

2 By Committee on Energy & Utilities

3 On page 3, beginning on line 37, strike all material through  
4 "inches." on page 4, line 7 and insert:

5 "~~((c) For log built homes with space heat other than~~  
6 ~~electric resistance, the building code council shall establish~~  
7 ~~equivalent thermal performance standards consistent with the~~  
8 ~~standards and maximum glazing areas of (b) of this subsection.))~~  
9 The requirements of (b)(ii) of this subsection do not apply to  
10 residences with log or solid timber walls with a minimum average  
11 thickness of three and one-half inches and with space heat other  
12 than electric resistance."

EFFECT: Homes with log walls at least three and one-half inches thick and not heated with electric resistance space heat are not required to meet the wall insulation standards applicable to residences.
