Background: The Running Start program was created in 1990 when the Legislature adopted educational "Choice"

legislation. The program allows high school juniors and seniors to attend classes at community and technical colleges, with their tuition and fees being paid from state basic education allocations that go to the student's school district.

The amount transmitted to community colleges is based on the number of college classes the student takes and the specific basic education appropriation for the student's school district.

Because of the small school factor, staff mix, and other elements of the basic education formula, the amount paid to the college for a class can vary significantly from school district to school district. This has created bookkeeping and other problems.

Summary of Bill: The formula for determining the amount that school districts must pay to community and technical colleges for the Running Start program is changed. Instead of the payment being tied directly to the amount of the school district's basic education allocation, the Superintendent of Public Instruction (SPI) is directed to establish a fee schedule after consultation with the State Board for Community and Technical Colleges.

Fiscal Note: Requested February 23, 1993.

Effective Date: Ninety days after adjournment of session in which bill is passed.

Testimony For: (Education) The current system for determining the per credit fee for Running Start students is very time consuming and difficult. This proposed change will make it much, much easier.
