15 operation or research and development operation that are permanently
16 affixed to and become a physical part of a building, such as utility
17 systems for heating, ventilation, air conditioning, communications,
18 plumbing, or electrical.

19 (c) Machinery and equipment is "used directly" in a manufacturing
20 operation or research and development operation if the machinery and
21 equipment:

22 (i) Acts upon or interacts with an item of tangible personal
23 property;

2 enter the manufacturing site and ends at the point where the finished
3 product leaves the manufacturing site. The term also includes that
4 portion of a cogeneration project that is used to generate power for
5 consumption within the manufacturing site of which the cogeneration
6 project is an integral part. The term does not include the production
7 of electricity by a light and power business as defined in RCW
8 82.16.010 or the preparation of food products on the premises of a
