Brief Title: Requiring notification of pesticide application.

HB 1775 - DIGEST

Requires a certified pesticide applicator making an indoor treatment to: (1) Post a pesticide notification sign at every entry point at least forty-eight hours before an indoor treatment and leave the sign posted at least one week after an indoor treatment;

(2) provide a pesticide label and material safety data sheet to the property owner, employer, administrator, building manager, or agent of the owner or employer, or other responsible person, located on site with responsibility for providing the pesticide label and material safety data sheet upon request; and

(3) provide pesticide notification signs in a language other than English if requested by the property owner, employer, administrator, building manager, or agent of the owner or employer.
