Brief Title: Identifying property abandoned by the department of fish and wildlife.

HB 2837 - DIGEST

(DIGEST AS ENACTED)

Finds that the department of fish and wildlife manages property in the state where the department has abandoned use of the property for fish hatchery operations and where the location of the property impedes further development of air transportation facilities.

Directs the department to identify all such properties in the state and begin to work with local governments in the same counties in which the properties are located to explore land exchanges to benefit the state's wildlife resources and to facilitate improved air transportation.
