11 Trust Land Transfer (00-2-001)

12 The state building construction account appropriation in this
13 section is subject to the following conditions and limitations:

14 (1) The total appropriation is provided to the department solely to
15 transfer from trust status or enter into thirty-year timber harvest
16 restrictive easements for certain trust lands of state-wide
17 significance deemed appropriate for state park, fish and wildlife
18 habitat, natural area preserve, natural resources conservation area,
19 open space, or recreation purposes.

20 (2) Property transferred under this section shall be appraised and
21 transferred at fair market value. The value of the timber transferred
22 shall be deposited by the department to the common school construction
23 account in the same manner as timber revenues from other common school
24 trust lands. No deduction shall be made for the resource management
25 cost account under RCW 79.64.040. The value of the land transferred
26 shall be deposited in the natural resources real property replacement
27 account. These funds shall be expended by the department for the
28 exclusive purpose of acquiring real property of equal value to be
29 managed as common school trust land.

30 (3) Property subject to easement agreements under this section
31 shall be appraised at fair market value both with and without the
32 imposition of the easement. The entire difference in appraised value
33 shall be deposited by the department to the common school construction
34 fund in the same manner as lease revenues from other common school
35 trust lands. No deduction shall be made for the resource management
36 cost account under RCW 79.64.040.

1 (4) All reasonable costs incurred by the department to implement
2 this section are authorized to be paid out of this appropriation.
3 Authorized costs include the actual cost of appraisals, staff time,
4 environmental reviews, surveys, and other similar costs.

5 (5) Intergrant exchanges between common school and other trust
6 lands of equal value may occur if the exchange is in the interest of
7 each trust, as determined by the board of natural resources.

8 (6) Prior to or concurrent with conveyance of these properties, the
9 department, with full cooperation of the receiving agencies, shall
10 execute and record a real property instrument that dedicates the
11 transferred properties to the purposes identified in subsection (1) of
12 this section for a minimum period of thirty years. The department of
13 natural resources, in consultation with the receiving state agencies,
14 shall develop policy to address requests to replace transferred
15 properties subject to the recorded property instrument that are no
16 longer deemed appropriate for the purposes identified in subsection (1)
17 of this section.

18 (7) The department and receiving agencies shall work in good faith
19 to carry out the intent of this section. However, the department or
20 receiving agencies may remove a property from the transfer list in
21 subsection (8) of this section if, based on new, substantive
22 information, it is determined that transfer of the property is not in
23 the state-wide interest of either the common school trust or the
24 receiving agency.

25 (8) The appropriation in this section is provided to execute
26 transfers or easements for the list of properties identified in LEAP
27 capital document No. 99-3, as developed on April 8, 1999, as follows:
28 Projects in category A shall be transferred; to the extent that local
29 funding is provided for the land value of the property, projects in
30 category B shall be transferred; and projects in category C and
31 remaining projects in category B may be transferred or leased as
32 funding allows.

33 (9) The department shall execute trust land transfers and easements
34 such that 90 percent of the appropriation in this section is deposited
35 in the common school construction fund. To achieve the 90:10 ratio,
36 the department may offset transfers of property with low timber-to-land
37 ratios with easements on other properties.

38 (10) On June 30, 2001, the state treasurer shall transfer all
39 remaining uncommitted funds from this appropriation to the common

1 school construction fund and the appropriation in this section shall be
2 reduced by an equivalent amount.

33 solely for direct acquisition of works of art.

34 NEW SECTION. **Sec. 907.** The amounts shown under the headings
35 "Prior Biennia," "Future Biennia," and "Total" in this act are for
36 informational purposes only and do not constitute legislative approval
37 of these amounts.

1 NEW SECTION. **Sec. 908.** "Reappropriations" in this act are
2 appropriations and, unless the context clearly provides otherwise, are
3 subject to the relevant conditions and limitations applicable to
4 appropriations. Reappropriations shall be limited to the unexpended
5 balances remaining on June 30, 1999, from the 1997-99 biennial
6 appropriations for each project.

7 NEW SECTION. **Sec. 909.** To carry out the provisions of this act,
8 the governor may assign responsibility for predesign, design,
9 construction, and other related activities to any appropriate agency.

10 NEW SECTION. **Sec. 910.** If any federal moneys appropriated by this
11 act for capital projects are not received by the state, the department
12 or agency to which the moneys were appropriated may replace the federal
13 moneys with funds available from private or local sources. No
14 replacement may occur under this section without the prior approval of
15 the director of financial management in consultation with the senate
16 committee on ways and means and the house of representatives capital
17 budget committee.

18 NEW SECTION. **Sec. 911.** (1) Unless otherwise stated, for all
19 appropriations under this act that require a match of nonstate money or
20 in-kind contributions, the following requirement, consistent with RCW
21 43.88.150, shall apply: Expenditures of state money shall be timed so
22 that the state share of project expenditures never exceeds the intended
23 state share of total project costs.

24 (2) Provision of the full amount of required matching funds is not
25 required to permit the expenditure of capital budget appropriations for
26 phased projects if a proportional amount of the required matching funds
27 is provided for each distinct, identifiable phase of the project.

28 NEW SECTION. **Sec. 912.** Any capital improvements or capital
29 projects involving construction or major expansion of a state office
30 facility, including, but not limited to, district headquarters,
31 detachment offices, and off-campus faculty offices, shall be reviewed
32 by the department of general administration for possible consolidation,
33 colocation, and compliance with state office standards before allotment
34 of funds. The intent of the requirement imposed by this section is to

1 eliminate duplication and reduce total office space requirements where
2 feasible, while ensuring proper service to the public.

3 NEW SECTION. **Sec. 913.** The governor, through the office of
4 financial management, may authorize a transfer of appropriation
5 authority provided for a capital project that is in excess of the
6 amount required for the completion of such project to another capital
7 project for which the appropriation is insufficient. No such transfer
8 may be used to expand the capacity of any facility beyond that intended
9 by the legislature in making the appropriation. Such transfers may be
10 effected only between capital appropriations to a specific department,
11 commission, agency, or institution of higher education and only between
12 capital projects that are funded from the same fund or account. No
13 transfers may occur between projects to local government agencies
14 except where the grants are provided within a single omnibus
15 appropriation and where such transfers are specifically authorized by
16 the implementing statutes which govern the grants.

17 For purposes of this section, the governor may find that an amount
18 is in excess of the amount required for the completion of a project
19 only if: (1) The project as defined in the notes to the budget
20 document is substantially complete and there are funds remaining; or
21 (2) bids have been let on a project and it appears to a substantial
22 certainty that the project as defined in the notes to the budget
23 document can be completed within the biennium for less than the amount
24 appropriated in this act.

25 For the purposes of this section, the legislature intends that each
26 project be defined as proposed to the legislature in the governor's
27 budget document, unless it clearly appears from the legislative history
28 that the legislature intended to define the scope of a project in a
29 different way.

30 A report of any transfer effected under this section except
31 emergency projects or any transfer under \$250,000 shall be filed with
32 the legislative fiscal committees of the senate and house of
33 representatives by the office of financial management at least thirty
34 days before the date the transfer is effected. The office of financial
35 management shall report all emergency or smaller transfers within
36 thirty days from the date of transfer.

1 NEW SECTION. **Sec. 914.** The department of information services
2 shall act as lead agency in coordinating video telecommunications
3 services for state agencies. As lead agency, the department shall
4 develop standards and common specifications for leased and purchased
5 telecommunications equipment and assist state agencies in developing a
6 video telecommunications expenditure plan. No agency may spend any
7 portion of any appropriation in this act for new video
8 telecommunications equipment, new video telecommunications
9 transmission, or new video telecommunications systems without first
10 complying with chapter 43.105 RCW, including but not limited to RCW
11 43.105.041(2), and without first submitting a video telecommunications
12 equipment expenditure plan, in accordance with the policies of the
13 department of information services, for review and assessment by the
14 department of information services under RCW 43.105.052. Before any
15 such expenditure by a public school, a video telecommunications
16 expenditure plan shall be approved by the superintendent of public
17 instruction. The office of the superintendent of public instruction
18 shall submit the plans to the department of information services in a
19 form prescribed by the department. The office of the superintendent of
20 public instruction shall coordinate the use of the video
21 telecommunications in public schools by providing educational
22 information to local school districts and shall assist local school
23 districts and educational service districts in telecommunications
24 planning and curriculum development. Before any such expenditure by a
25 public institution of postsecondary education, a telecommunications
26 expenditure plan shall be approved by the higher education coordinating
27 board. The higher education coordinating board shall coordinate the
28 use of video telecommunications for instruction and instructional
29 support in postsecondary education, including the review and approval
30 of instructional telecommunications course offerings.

31 NEW SECTION. **Sec. 915.** Electronic copies of all completed
32 predesigns, BEST studies, value engineering studies, and
33 constructability reviews performed pursuant to appropriations contained
34 in this act will be forwarded to the department of general
35 administration in a format prescribed by the department. These
36 documents will serve as a means to share information and lessons that
37 may be useful in other projects. Best practices, changes in technology
38 and materials, new approaches to resolving facility and construction

1 problems, and any other useful information will be shared among all
2 agencies and the public through use of the Internet.

3 NEW SECTION. **Sec. 916.** The legislature finds that opportunities
4 for additional student enrollment capacity at higher education
5 facilities can be created by increased course scheduling, more
6 intensive space utilization practices, and the delivery of distance
7 learning programs. By May 1, 2000, the institutions of higher
8 education and the state board for community and technical colleges
9 shall review course scheduling and weekly room use standards and
10 determine if additional student capacity can be reasonably obtained by
11 changes in practices. Further, this review shall include an assessment
12 of options to increase distance learning programs as a means to further
13 increase student full-time equivalent capacity. The findings of this
14 review and the delineation of the course scheduling and weekly room use
15 assumptions shall be submitted to the higher education coordinating
16 board and the office of financial management for review and approval.

17 Institutions of higher education receiving appropriations for
18 predesign, design, or construction of branch campus facilities in this
19 act shall work with the higher education coordinating board and the
20 office of financial management to identify options and prepare plans to
21 increase the full-time equivalent capacity of these projects and all
22 future construction phases for these campuses. The goal of these plans
23 is to substantially increase full-time equivalent delivery capacity
24 above the level identified in the appropriation section. The plans
25 shall identify alternative program delivery strategies, options to
26 increase use of distance learning and technology, plans to improve
27 space utilization, and other recommendations to meet this goal. Branch
28 campuses to be analyzed in these plans include Vancouver, Tacoma,
29 Bothell, Tri-Cities, and Spokane. The development of these plans shall
30 include consultation with every institution that is planned to offer
31 services at each site. Proposals for changes in the facilities to be
32 constructed in future phases shall clearly identify costs and schedule
33 alternatives, and currently designed construction projects shall
34 proceed on schedule.
