
SECOND ENGROSSED SUBSTITUTE SENATE BILL 5470

State of Washington

56th Legislature

1999 Regular Session

By Senate Committee on Labor & Workforce Development (originally sponsored by Senators Kline, Oke, Fairley, Prentice, Spanel, Wojahn, Franklin, McAuliffe, Winsley, Roach and Costa)

Read first time 03/03/1999.

1 AN ACT Relating to chemically related illnesses and injuries; and
2 creating new sections.

3 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

4 NEW SECTION. **Sec. 1.** (1) The legislature finds that there has
5 been perceived growth in occupational disease and chemically related
6 illness claims that arise from the workplace, and that statistics kept
7 by the department of labor and industries indicate that a significant
8 proportion of such claims may be rejected by the department and self-
9 insured employers. It is also recognized that workers suffering such
10 illnesses may have physical, psychological or financial burden from
11 their disorders.

12 (2) The legislature recognizes that the department, in order to
13 accept a claim for chemically related illness, or any related
14 occupational disease or injury, must receive medical evidence of
15 causality in the relationship between an exposure and illness.

16 NEW SECTION. **Sec. 2.** (1) A study, subject to the confidentiality
17 requirements under RCW 51.28.070, shall be conducted of industrial
18 insurance claims filed by an appropriate sample of workers who have

1 suffered chemically related illnesses or injuries and whose claims were
2 open any time during the period from January 1, 1995, through December
3 31, 1999. At a minimum, the study shall review:

4 (a) The nature and severity of the illnesses or injuries reported
5 in these industrial insurance claims;

6 (b) The disposition of these industrial insurance claims by the
7 department of labor and industries or self-insured employers;

8 (c) The degree to which the lives of these claimants have changed
9 from the time of exposure to the time of the study, including physical
10 and financial condition; and

11 (d) The extent to which the chemically related injury center of
12 excellence at Harborview medical center was used for clinical
13 assessment and to guide adjudication of these claims.

14 (e) The medical diagnosis made by physicians pertaining to these
15 claims and an analysis of the scientific adequacy of the tests and
16 examinations used in the diagnosis.

17 (2) A study shall also be conducted to determine:

18 (a) Which occupational diseases and injuries should be considered
19 chemically related illnesses so that an accurate annual count of such
20 illnesses may be reported;

21 (b) The best method of reporting such illnesses annually, including
22 the most accurate set of available or obtainable data;

23 (c) A review of other workers' compensation jurisdictions and
24 relevant scientific literature regarding the criteria for determining
25 causality or work-relatedness in occupational diseases and injuries.
26 This review shall at least include:

27 (i) Methods generally accepted in the medical determination of
28 whether an exposure or exposures are likely to be either toxic or
29 causative, or both;

30 (ii) Methods generally accepted in the medical determination of the
31 presence or absence of a definable clinical condition;

32 (iii) Methods generally accepted in determining the medical
33 relationship between the exposure and the clinical condition.

34 (3) The department of labor and industries must contract with an
35 outside entity to conduct the study. The contractor shall be selected
36 by the director of the department of labor and industries and two
37 members of the workers' compensation advisory committee who are
38 designated for that purpose by the committee. The study shall be
39 funded within legislative appropriations from the medical aid fund,

1 with self-insured employers and the state fund each paying a pro rata
2 share, based on the number of worker hours, of the authorized
3 expenditures.

4 NEW SECTION. **Sec. 3.** A special task force composed of four
5 members or designees of the workers' compensation advisory committee
6 and four legislators, two from the house of representatives and two
7 from the senate, shall advise and provide oversight to the studies in
8 section 2 of this act. The task force shall report to the legislature
9 on an interim basis in December 2000, and with a final report in
10 December 2001. The final report shall make statutory and policy
11 recommendations including recommended changes to the criteria for
12 determining causality for chemically related occupational disease and
13 injury.

--- END ---
