

SENATE BILL REPORT

HB 1844

As Reported By Senate Committee On:
Natural Resources, Parks & Shorelines, March 26, 2001

Title: An act relating to an exchange of bedlands and the resolution of boundary disputes in and near the Cowlitz river near the confluence of the Columbia river in Longview, Washington.

Brief Description: Allowing the department of natural resources to exchange certain bedlands to obtain clear title to certain property on the Cowlitz river.

Sponsors: By Representatives Doumit, Pennington, Hatfield, Mielke and Dunn; by request of Department of Natural Resources.

Brief History:

Committee Activity: Natural Resources, Parks & Shorelines: 3/21/01, 3/26/01 [DP].

SENATE COMMITTEE ON NATURAL RESOURCES, PARKS & SHORELINES

Majority Report: Do pass.

Signed by Senators Jacobsen, Chair; Spanel, Vice Chair; Constantine, Hargrove, Morton, Oke, Snyder and Stevens.

Staff: Vic Moon (786-7469)

Background: The Washington State Constitution declares that the beds and shores of all navigable waters in Washington are owned by the state. The Legislature subsequently designated the Department of Natural Resources (DNR) as the steward of these lands. DNR acts as a proprietor, subject to legislative direction, of all state-owned aquatic lands and holds these lands in trust for all current and future residents of the state. Privately-owned uplands that currently exist beneath a navigable waterway remains the private property of the original upland owner or his successors in interest. DNR is authorized to exchange state-owned aquatic lands if the exchange is in the public interest. However, that authority does not extend to aquatic lands beneath a state-owned harbor or waterway or to state-owned bedlands.

The Cowlitz River is located in the southwestern portion in Washington. The Cowlitz serves as one of the major tributaries to the Columbia River, and reaches its confluence with the Columbia near the town of Longview, Washington. In the 1920s a dike was constructed on the Cowlitz near its confluence, diverting the river from its original path. According to DNR, the divergence resulted in the original bed of the river becoming a nonnavigable body of shallow water, and the river's navigable course being diverted across an adjacent upland area. Currently, the state retains ownership of the original riverbed now lying below nonnavigable water. The navigable portion of the Cowlitz River is privately owned.

Summary of Bill: DNR is authorized to exchange bedlands abandoned through the rechanneling of the Cowlitz River near the confluence of the Columbia River. Such an exchange gives the state clear title to the Cowlitz River as it now exists or where it may exist

in the future. DNR may also exchange bedlands and enter into boundary line agreements to resolve any disputes over the location of state-owned lands under the dike in the Cowlitz River that was built in 1920.

Appropriation: None.

Fiscal Note: Available.

Effective Date: Ninety days after adjournment of session in which bill is passed.

Testimony For: None.

Testimony Against: None.

Testified: No one.
