Brief Description: Applying pesticides by aircraft.

HB 1396 - DIGEST

Declares that no agency or entity of state government and no unit of local government or agency of such a local government may purchase or otherwise acquire directly or indirectly a pesticide for an aerial application of the pesticide to any part of an incorporated area within this state unless the formula of the product to be used, including both active and inert ingredients, is available for public inspection and the person for whom the pesticide is registered voluntarily agrees to disclose the formula to the public for the purpose of the aerial application.

Requires that the disclosure of information to the public required by this provision shall be made, as a minimum, by providing the formula to any person who requests it.
