Brief Description: Reducing exposure in the home to carcinogens and allergens.

**SB 5933 - DIGEST**

Requires the department to develop informational materials that address methods of reducing exposure to indoor air pollutants in the home environment. The department may distribute these materials, including posting on the department's electronic web page, and make them available for distribution through local health jurisdictions and nongovernmental organizations. For purposes of this section, such pollutants include smoke, dust mites, mold, pesticides, and carcinogens. The informational materials shall include recommendations on cleaning methods, furnishings, and home design features that help to reduce such exposure.
