

By Representative Wallace

1 **SB 5959** - H COMM AMD **ADOPTED 4/11/03**
2 By Committee on Technology, Telecommunications & Energy

3 On page 2, after line 12, insert the following:

4 "(c) The permit holder may use the approach for ingress and
5 egress from the highway for construction or maintenance of the
6 personal wireless service facility during nonpeak traffic hours so
7 long as public safety is not adversely affected. The permit holder
8 may use the approach for ingress and egress at any time for the
9 construction of the facility if public safety is not adversely
10 affected and if construction will not substantially interfere with
11 traffic flow during peak traffic periods."

EFFECT: Clarifies that the approach may be used for construction or maintenance of a facility during nonpeak hours so long as public safety is not affected, and that the approach may be used for construction of a facility at any time, so long as public safety and traffic flow are not affected.
