Background:

Current state law provides cities and towns the authority to suspend banners or decorations over state highways if the display is suspended at least 20 vertical feet above the highway. This authority is implied in RCW 47.24.020(3) which states that the Department of Transportation has the authority to prohibit the suspension of signs, banners or decorations above the highway up to two feet above the surface of the roadway. Similar authority is not, however, provided to suspend signs, banners or decorations over highways in unincorporated areas, either in state statute or in the state's uniform standards on traffic control devices. Further, the state's Scenic Vistas Act limits the type of signage allowed within view, or within the right of way, of certain state highways.

Summary of Bill:

House Bill 1064 permits the uniform state standard for traffic safety devices to include a standard allowing signs, banners or decorations to be placed over a highway when they are:

- In an unincorporated area;
- Placed at least 20 vertical feet above the highway; and
- Where the sign, banner or decoration does not interfere with or obstruct the view of any traffic control device.

The Department of Transportation must adopt rules regulating the placement of these signs, banners or decorations.

This bill intends to exempt these displays from the state's Scenic Vistas Act by amending the Act's definition of "sign" to exclude a display authorized under the provisions of this bill when the display promotes a local agency-sponsored event and does not include advertising.

An emergency clause is included to allow the provisions of the bill to take effect immediately upon becoming law.
