

HOUSE BILL REPORT

HB 1281

As Reported by House Committee On:
Trade & Economic Development
Finance

Title: An act relating to community revitalization financing.

Brief Description: Promoting economic development and community revitalization.

Sponsors: Representatives Pettigrew, Skinner, Gombosky, Clibborn, Anderson, Rockefeller, Grant, Tom, O'Brien, Cody, Moeller, McDonald, Woods, Hunter, Kagi, Morrell, Benson, Kessler, Wood, Upthegrove, Conway, Linville and Morris; by request of Governor Locke.

Brief History:

Committee Activity:

Trade & Economic Development: 1/28/03, 2/18/03 [DPS];
Finance: 2/5/04 [DP2S(w/o sub TED)].

Brief Summary of Second Substitute Bill

- Expands the community revitalization program to allow local governments to finance public improvements not only using increased property tax revenues, but also excess excise tax revenues, and revenue generated through a sales and use tax, up to \$1 million per year, per project, credited against the state sales and use tax in an increment area.
- Limits the use of community revitalization funds to only those public improvements that support economic development that, in the absence of the community revitalization funding, would not otherwise occur.
- Requires local governments to evaluate the impacts of potential development on low-income housing and small businesses and to develop plans to mitigate potential adverse impacts of development, prior to the establishment of an increment area.

HOUSE COMMITTEE ON TRADE & ECONOMIC DEVELOPMENT

Majority Report: The substitute bill be substituted therefor and the substitute bill do pass. Signed by 9 members: Representatives Veloria, Chair; Eickmeyer, Vice Chair;

Skinner, Ranking Minority Member; McDonald, Assistant Ranking Minority Member; Blake, Chase, McCoy, Pettigrew and Priest.

Minority Report: Do not pass. Signed by 2 members: Representatives Condotta and Kristiansen.

Staff: Tracey Taylor (786-7196).

Background:

Tax increment financing or community redevelopment financing is a method of redistributing property tax collections within designated areas to finance infrastructure improvements within these designated areas. However, attempts to authorize the use of state property taxes revenue in Washington to finance such development have been struck down by the voters and the courts. The main legal impediments under the state constitution include: the requirement that all property taxes must be uniform on the same class property within the territorial limits of the authority levying the tax; the prohibition on the lending of state credit; and the dedication of state property tax revenues to fund the common schools.

Community Revitalization Financing

Currently, counties, cities, towns, and port districts are authorized to create tax increment areas within their boundaries where community revitalization projects and programs are financed by diverting a portion of the regular property taxes imposed by local governments within the tax increment area.

Community revitalization projects and programs include:

- Traditional infrastructure improvements, such as: (1) street and road construction and maintenance; (2) water and sewer system construction; (3) sidewalks and streetlights; (4) parking, terminal, and dock facilities; (5) park and ride facilities of a transit authority; (6) storm water and drainage systems; and (7) park and recreation facilities.
- Environmental analysis, professional management, planning, and promotion, management and promotion of retail trade activities, maintenance and security for common areas, and historic preservation.

The creation of a tax increment area involves a number of steps, as follows:

- The county, city, town, or port district adopts an ordinance designating the tax increment area within its boundaries and specifies the public improvements to be financed;

- The tax increment area may not be established unless the local government taxing districts (not including the state) imposing at least 75 percent of the regular property taxes within this area sign written agreements approving the tax increment financing;
- A public hearing on the proposal is held;
- Any fire protection district with territory located in the increment area must approve the creation of the increment area; and
- The county, city, town, or port district adopts an ordinance establishing the tax increment finance area.

Public hearings must be held on the proposed financing of the public improvements through community revitalization financing. The local government must then enact an ordinance:

- (1) establishing the increment area;
- (2) describing the public improvements;
- (3) describing the boundaries of the increment area;
- (4) estimate the cost of the public improvements and portion of these costs to be financed by community revitalization financing;
- (5) estimating the time during which regular property taxes are to be apportioned to finance the public improvement costs associated with the public improvements financed in whole or in part by the community revitalization financing; and
- (6) providing the date when the apportionment of regular property taxes will commence and the benefits will be met.

A county, city, town, or port district may pledge and use the diverted regular property tax collections to pay principal and interest on general obligations issued to finance the community revitalization projects and programs. A non-public participant may be required to provide security to protect the public investment in the tax increment area.

Regular property taxes imposed by all local governments within the tax increment area on 75 percent of any increase in assessed valuation occurring in that area after its creation are diverted to finance the projects. Regular property taxes imposed by any local government on all of the remaining value (the assessed valuation in the year before the tax increment area was created plus 25 percent of any increase in assessed valuation in the tax increment area) are distributed to the local governments as if the tax increment area had not been created.

The state's property taxes are not affected. Most regular property taxes imposed by port districts and public utility districts are subject to this potential diversion, but port district and public utility district regular property tax levies that are allowed specifically for bond

retirement purposes are not affected.

The projects financed by property tax increment financing must be expected to encourage private development and increase the fair market value of real property within the tax increment area. Private development that is anticipated to occur within the tax increment area as a result of the public improvements must be consistent with the countywide planning policy adopted by the county under the Growth Management Act (Act) and the county's, city's, or town's comprehensive plan and development regulations adopted under the Act.

Sales and Use Tax

There is a 6.5 percent retail sales tax levied by the state on the selling price of tangible personal property and certain services purchased at retail. In general, the tax applies to goods, construction (including labor), repair of tangible personal property, lodging for less than 30 days, telephone service, and participatory recreational activities. There are some local taxes that are credited against the state sales tax, including 2 percent hotel/motel tax upon accommodations by cities and counties. There are also some exemptions, credits and deferrals to the state retail tax.

There is a 6.5 percent use tax on items not subject to the state retail tax. This includes purchases made from out-of-state sellers, purchases from sellers who are not required to collect Washington sales tax, items produced for use by the producer, and gifts and prizes. The tax is measured by the value of the item at the time of the first use within the state, excluding any delivery charges.

Summary of Substitute Bill:

The community revitalization financing program is expanded to allow local governments to finance public improvements not only using the increased property tax revenues, but also excess excise tax revenues and revenue generated through a sales and use tax, up to \$1 million per year, per project, credited against the state sales and use tax in an increment area.

The proposed public improvement to be financed in part or in whole using the community revitalization financing must be found by the local governing body to be reasonably likely to:

increase private investment within the increment area; increase the employment within the increment area as determined by wage band analysis; and generate, over the period of time that the local sales and use tax will be imposed, state and local property, sales, and use tax revenues that are equal to or greater than the respective state and local contributions made under this program.

The governing body of the local government must also make a finding that the

community revitalization financing will not be used to attract a Washington business located outside the increment area to relocate to inside the increment area. There must also be a finding that the use of the community revitalization financing will improve the viability of the existing businesses within the increment area.

The community revitalization financing can be used for public improvement costs as currently defined in statute as well as land acquisition, land clearing and the demolishing of property pending construction of public improvements. The local government may not use the community revitalization financing to finance the costs associated with the financing, design, acquisition, construction, equipping, operating, maintaining, remodeling, repairing, and re-equipping of public facilities funded by taxes collected through a public facilities district. In addition, community revitalization funds may not be expended on environmental analysis, professional management, planning and promotion within the increment area, or maintenance and security of the common or public areas of the increment area.

Creating an Increment Area

A local city, town or county desiring to finance public improvement through community revitalization financing must enter into written agreement with any taxing district that levies regular property taxes on real property in the increment area. Thus, a taxing district can opt out of participating in the increment area.

The ordinance enacted by the local government must include an estimate of the time during which the excess excise taxes will be collected as well as providing the date when the use of the excess excise taxes will commence and the benefits will be met. The ordinance must also include an estimate of the highest amount of tax revenue to be received in any one fiscal year through the imposition of the state sales and use tax credit.

Notice of the public hearing on the proposed ordinance creating the increment area must be sent by U.S. mail to all property owners and business enterprises located within the proposed increment area at least 30 days prior to the hearing. The local government must consult with business organizations and ethnic associations to develop methods of notice that ensure that appropriate notice is provided to the business enterprises and property owners for whom English is a second language.

Property Tax Increment

As with the current program, the increment value is 75 percent of any increase, over the tax allocation base value, in the assessed value of real property in an increment area that is placed on the assessment rolls after the increment area is created. In calculating the regular property tax increment, regular property taxes levied by voters for a specific purpose shall not be included.

Tax allocation base value is the assessed value of real property located within an

increment area for taxes levied in the year in which the increment area is created for collection in the following year, plus 25 percent of any increase in the assessed value of real property located within an increment area that is placed on the assessment rolls after the increment area is created.

In the second calendar year following the effective date of the ordinance creating the increment area, the county treasurer distributes the receipts from regular taxes on real property in the increment area as follows:

(1) each participating taxing district and the local government that created the increment area shall receive the portion of its regular property taxes by the rate of tax levied by or for the taxing district on its tax allocation base value or upon the total assessed value of real property in the taxing district, whichever is smaller; and

(2) the local government shall receive an additional portion of the regular property taxes levied by it and by or for each participating taxing district upon the increment value in the increment area. If there is no increment value, the local government does not receive any additional regular property taxes.

The county assessor shall allocate 25 percent of any increased real property value occurring in the increment area to the tax allocation base value and 75 percent to the increment value.

Excess Excise Taxes

A local government that creates an increment area may use annually any excess excise taxes received by it from taxable activity within the increment area to finance the public improvement costs financed in whole or in part by community revitalization financing. When tax allocation revenues are no longer necessary or obligated to pay the costs of the public improvements, the local government may no longer retain the excess excise taxes.

The excess excise tax is the amount of excise taxes received by a local government within the increment area over and above the amount of excise taxes received there during the base year from taxable income within the increment area. The base year is the first calendar year following the creation of the increment area and the measurement year is a calendar year, beginning with the calendar year following the base year, that is used annually to measure the amount of excess excise taxes required to be used to finance the public improvement costs.

If a local government is solely a port district, the port district may use excess excise taxes only to the extent that any other taxing authority that receives excise tax from taxable activity in the increment area allocates excess excise taxes to the local government.

If a port district and a city, town or county is the increment area, excess excise taxes may

only be used if the city, town or county realize excess excise taxes from taxable activity within the increment area or any other taxing authority that receives excise taxes from taxable activity in the increment area allocates excess excise taxes to the local government.

Boundary information of increment area is due to the Department of Revenue (DOR) at least 75 days before effective date of ordinance creating increment area.

Sales & Use Tax

A city, town or county that creates an increment area and finances the public improvements under the community revitalization program may impose a sales and use tax. The tax is in addition to other taxes authorized and will be collected from those who are taxable by the state retail sales tax and use tax for any taxable event within the jurisdiction. The rate cannot exceed 6.5 percent less the aggregate rates of any other taxes imposed on the same event that are already credited against the state sales and use taxes. The tax shall be deducted from the amount of taxes otherwise required to be collected or paid over the DOR for the state sales and use tax.

The sales and use tax cannot be imposed until after January 1, 2005, and the local increment jurisdiction must first have received tax allocation revenues derived from either real property taxes or excess excise taxes or both during the preceding calendar year. This tax expires when bonds issued are retired, but not more than 25 years after being imposed.

In order to enact a sales and use tax, the local jurisdiction must first enact an ordinance imposing tax that provides that:

- (1) the tax shall first be imposed on the first day of a calendar year;
- (2) the amount of the tax received by the local government in any calendar shall not exceed the state contribution;
- (3) the tax shall cease to be imposed for the remainder of any calendar year in which either:
 - (a) the amount of tax receipts totals the amount of the state contribution;
 - (b) the amount of the tax receipts totals the amount of local public sources dedicated in the previous calendar year to finance the authorized public improvements; or
 - (c) the amount of the revenue from taxes imposed under this section by all cities, towns, and counties totals the annual state credit limit
- (4) the tax will be reimposed at the beginning of the next calendar if it ceased to be imposed;
- (5) any revenue generated by the tax in excess of the amount of the state contribution limit will go to the State.

Then, the jurisdiction must apply to the DOR at least 75 days before the effective date of

any such tax. The DOR will accept and approve applications beginning August 1, 2003, through September 30, 2006. Application information shall include: information establishing the jurisdiction is eligible to impose such a tax; the anticipated effective date of the tax; the estimated number of years that the tax will be imposed; and a copy of the ordinance creating the increment area.

The DOR will rule on an application within 60 days of receipt. The sales and use tax authority will be granted on a first-come first-served basis. Priority among approved applicants shall be based on the date that the approved application was received by the DOR. When the annual limit is reached, no new applications will be approved.

The DOR will approve the amount of the sales and use tax that an applicant may impose. The amount shall not exceed the lesser of \$1 million or the highest amount of tax revenue the applicant estimates it will receive in any one fiscal year through the imposition of the sales and use tax.

If both a city and a county impose the sales and use tax under this program, the amount is credited based on which jurisdiction created the increment area first.

State contribution means the less of \$1 million or an amount equal to the state property tax allocation revenues received by the state during the preceding calendar year and the excess state excise taxes received by the state during the preceding year.

The first year aggregate limit for credit against the state sale and use tax is \$5 million. In each of the three subsequent years, the total amount credited against the state sales and use tax shall increase by the percentage increase in the assessed value of all property within the state as determined by the DOR. Any unused credit from the first through the third year shall be added to the amount of the credit available in the second through the fourth years. The DOR will tell the jurisdiction to stop imposing tax once the jurisdiction's annual state contribution limit is reached or the aggregate state contribution limit is reached.

Local government must tell the DOR by December 20 the amount of local public sources dedicated in the current calendar year to finance the authorized public improvement and the tax allocation revenues derived in the current calendar year from the regular property taxes on the increment value and distributed to finance the public improvements.

Money must be used only for the purpose of principal and interest payments on bonds issued for a project and must be matched with an amount from local public sources dedicated through December 20 of the previous calendar year to finance the authorized public improvements. Local public sources can include private monetary contributions and tax allocation revenues. The money generated from the sales and use tax must actually be expended to pay public improvement costs or are required by law or an agreement to be used exclusively to pay public improvement costs.

A jurisdiction must have outstanding indebtedness under the community revitalization program.

Accountability

The local government utilizing the sales and use tax must provide an annual report to the DOR by March 1 of each year. The report must include:

- (1) The amount of tax allocation revenues, sales and use tax and local public sources received by the local government during the preceding calendar year, and how these revenues were expended;
- (2) The names, and previous business locations, of any business located within the increment area as a result of the public improvements undertaken by the local government and financed in whole or in part by this program;
- (3) The number and industrial classification of businesses and the number of employees in the increment area, and the number of these businesses and their employees continuing to conduct business enterprise activities after the completion of the proposed improvements;
- (4) The total number of permanent jobs created as a result of the public improvements undertaken by the local government and financed in whole or in part by this program.
- (5) The wages and benefits received by the employees of businesses located within the increment area as a result of the public improvements. The wage and benefit information will be collected by the local government and reported to the DOR and must include employee benefit information, such as employer-provided medical insurance, vacation or sick leave, and retirement benefits. The wage information shall be reported in six wage bands, beginning with the state minimum wage plus \$2 per hour up through greater than the state minimum wage plus \$10.01 per hour;
- (6) The increase in employment within the increment area, reported in wage bands; and
- (7) The amount of tax receipts the local government has received from taxable activity from the businesses located within the increment area and after the establishment of the increment area.

The DOR shall make the report available to the public and the Legislature by June 1 of each year. The report shall include a list of the public improvements undertaken by the local governments and financed in whole or in part by community revitalization financing. The report should also include a summary of the information provided by the local governments. The full report by a local government to the DOR shall be made available to the public upon request.

Bond Authorization

A local government designating an increment area and authorizing the use of community revitalization financing may incur general indebtedness, and issue general obligation bonds, to finance the public improvements and retire the indebtedness in whole or in part from tax allocations it receives.

Local government can annually pay into a fund to be established for the benefit of bonds issued for this program a fixed proportion or fixed amount of any tax allocation revenues derived from property or business activity within the increment area containing the public improvements funded by the bonds. The payments continue until all bonds payable from the fund are paid in full.

A local government can annually pay into a second fund a fixed proportion or fixed amount of any revenues derived from the credit of the state sales and excise tax, such payment continuing until all bonds from the fund are paid in full.

A local government that issues bonds to finance public improvements may pledge for payment of such bonds all or part of any tax allocation revenues derived from the public improvements. It can also pledge the revenues of the credit of the state sales and excise tax.

The bonds issued by the local government to finance the public improvements does not constitute an obligation of the state.

Miscellaneous

Nothing in the Act gives port districts the right to impose a local sales or use tax.

The DOR may adopt rules required to administer the community revitalization financing program.

Substitute Bill Compared to Original Bill:

The substitute bill defines a "participating tax authority" as a taxing authority that has entered into a written agreement with a local government for the use of community revitalization financing to finance all or a portion of the costs of designated public improvements.

The substitute bill specifically exempts real property taxes levied by the voters for a specific purpose from being included in the regular real property taxes used to finance the public improvements under the community revitalization program.

The substitute bill prohibits local governments from using community revitalization financing in order to pay for: (1) costs associated with the financing, design, acquisition, construction, equipping, operating, maintaining, remodeling, repairing, and re-equipping of public facilities funded with taxes through a public facilities district; (2) environmental analysis, professional management, planning and promotion within the increment area, including the management and promotion of retail trade activities in the increment area; and (3) maintenance and security for common or public areas within the increment area.

In addition to the requirements in the original bill, the local government creating in increment area must also: (1) make a finding that the community revitalization financing will not be used for the purpose of relocating a Washington business outside the increment area into the increment area; (2) include an estimate of the highest amount of tax revenue to be received in any one fiscal year through the imposition of the sales and use tax credit against the state sales and use tax; and (3) make a finding as to how the public improvements financed through the community revitalization financing program will improve the viability of the existing businesses located in the proposed increment area.

The substitute bill requires that a notice must be sent via U.S. mail to the property owners and business entities located within the proposed increment area. The local government must work with local organizations to ensure appropriate notice is given to businesses and property owners for whom English is not his or her primary language.

The substitute bill requires the local government make an annual report to the DOR. The report must include: (1) the amount of tax allocation revenues, sales and use taxes, and local public sources received by the local government in the preceding calendar year and a summary of expenditures; (2) the names of businesses locating in the increment area as a result of the program; (3) the number of permanent jobs created; (4) the number and industrial classifications of businesses and the number of employees in the increment area prior to the creation of the increment area that continue to conduct business and be employed in the increment area; (5) the wage and benefit information about the jobs in the increment area reported in wage bands; and (6) the amount of tax receipts of businesses located prior to the creation of the increment area. A summary of the report shall be made available to the public by June 1 of each year. The report will also include a list of public improvements financed in whole or in part by community revitalization financing. The local government's full report may be disclosed to the public, upon request.

The substitute bill directs the DOR to accept and approve applications for the state sales and use tax credit beginning August 1, 2003, through September 30, 2006.

The substitute bill authorizes the DOR to approve the amount of the sales and use tax that an applicant may impose and the state contribution cap is clarified.

Finally, the substitute clarifies that the DOR may adopt rules required for the administration of the community revitalization financing program.

Appropriation: None.

Fiscal Note: Available.

Effective Date of Substitute Bill: The bill takes effect 90 days after adjournment of session in which bill is passed.

Testimony For: Washington is currently suffering from a serious economic downturn. One of several steps being offered by the Governor to create jobs right away while still building for the future is the EDGE program. EDGE stands for Economic Development for a Growing Economy. Using the EDGE, a community can invest in its own future. The state should be a partner with the local government because the state benefits from the job creation, urban renewal and environmental improvements that would occur thanks to EDGE. The local government is the true leader in this program and assumes the risk of the project. Unsuccessful projects do not get state money. Almost every state has some form of tax increment financing available for economic development. While the EDGE program might not give Washington an advantage, it will finally place it on a level playing field with many of our neighbor states. Since this is a limited, pilot project, the Legislature can review the program before committing more state money. This proposal was developed working with a broad group of stakeholders and avoids the legal pitfalls of other tax increment financing proposals of the past.

Testimony Against: This program places public resources in private hands at a time the state cannot afford to divert the money. In addition, because this state is a budget-based real property tax system, and there is a cap on real property tax increases due to I-747, there will not be any real increment value generated by the real property taxes as only new construction will provide additional real property tax revenues, and this is a limited time increment.

Testified: Representative Pettigrew, prime sponsor; Sheila Martin, Policy Officer, Office of the Governor; Todd Mielke, Spokane Regional Chamber; Richard Ehlers, Seattle Northwest Securities, Corp.; Jay Reich, Attorney, Preston Gates and Ellis; Ron Newbry, Washington Economic Development Association; Bruce W. Kendall, President and CEO, Economic Development Board/Tacoma-Pierce County; Steven J. Caffery, CEO/Executive Director, The Capitol Theatre, Yakima; Michael A. Morales, Grants Officer, Department of Community and Economic Development, City of Yakima; and Maria Cain, Asian Pacific Environmental Exchange.

HOUSE COMMITTEE ON FINANCE

Majority Report: The second substitute bill be substituted therefor and the second substitute bill do pass and do not pass the substitute bill by Committee on Trade & Economic Development. Signed by 7 members: Representatives McIntire, Chair; Hunter, Vice Chair; Cairnes, Ranking Minority Member; Orcutt, Assistant Ranking Minority Member; Ahern, Morris and Roach.

Minority Report: Do not pass. Signed by 2 members: Representatives Conway and Santos.

Staff: Mark Matteson (786-7145).

Summary of Recommendation of Committee On Finance Compared to Recommendation of Committee On Trade & Economic Development:

Declares that one of the purposes of community revitalization financing is to encourage a balance between job creation and availability of affordable housing. Clarifies that "assessed value" pertains to taxable real property. For the purposes of community revitalization financing (CRF), restricts potential property tax revenues to only those regular property taxes attributable to 75 percent of increases in assessed value due to new construction being placed on the assessment rolls. Allows the CRF funds to be used for facilities and improvements that support affordable housing.

Provides that the CRF funding may only be used in increment areas for development that, absent the CRF funds, would not otherwise occur. Restricts increment areas to portions of a local jurisdiction for which property value is no more than 25 percent of the assessed value of the jurisdiction.

Modifies the requirement for a finding by a local government that the CRF funds will not be used for the purpose of relocating a Washington business outside the increment area into the increment area, in that "relocating a business" is specifically defined. Modifies the requirement for a finding by a local government that employment within the increment area is likely to be increased, in that the analysis does not have to consider different wage bands.

Provides that the notice of impending passage of the ordinance that is sent to the property owners and business entities include the estimated impact on low-income housing and small businesses. Allows (instead of requires) the local government to work with business associations and with the Office of Minority and Women's Business Enterprise (instead of with ethnic associations) to ensure appropriate notice is given to businesses and property owners where English is the secondary language.

Requires a local government seeking the CRF funds to: enter into a contract with a private developer for intention to develop part or all of the increment area; develop an analysis to evaluate impacts of the development on small businesses and low-income housing; develop a plan to mitigate the adverse impacts of development.

Requires the Department of Revenue (DOR) to approve use of local excess excise taxes and the amount of the sales and use tax that an applicant may impose. Provides that no applications may be received before August 1, 2004 (instead of 2003), or processed more than three years after receipt of the first application (instead of through September 30, 2006). Provides that no tax may be imposed before July 1, 2006 (instead of January 1, 2005). Requires a local government to inform the DOR by December 31 of each year the amount of local revenues dedicated to the CRF purposes (instead of by December

20).

Modifies the requirement the local government make an annual report to the DOR, limiting the content to the amounts of the CRF funds received and the manner of expenditure; names of businesses that move into the increment area as a result of the program, and the number of jobs created and average wages paid as a result of the program. Removes requirement that the DOR disclose individual jurisdiction reports to the public, upon request.

Allows the DOR to adopt rules as deemed necessary for the administration of the community revitalization financing program.

Appropriation: None.

Fiscal Note: Available.

Effective Date of Second Substitute Bill: The bill takes effect 90 days after adjournment of session in which bill is passed.

Testimony For: This bill is important to the people in my district. The Rainier Valley is rich in diversity and community. This would help to promote development that might not otherwise occur.

This is an outstanding tool and very useful in supporting infrastructure development. As you consider this, I urge you to think about the overall limits. Do not forego an opportunity to attract large businesses and to bring millions of dollars and many jobs to the state.

The Governor believes strongly that it is important to improve infrastructure and create jobs. Ordinarily, private developers look for areas where adequate infrastructure already exists. This puts many undeveloped areas at a disadvantage. Last year we heard a lot of testimony on this proposal and have worked hard to incorporate stakeholders' concerns. We've made some changes to improve the bill and provide needed safeguards.

County tax assessors appreciate the refining of the boundary restriction language and the limitation to regular property taxes associated with new construction only. The new safeguards are important to county councils, and the proposed substitute is supported by the Washington Association of County Officials.

Economic development is important to our state. It is critically important to the health of our community to modify this proposal to allow for higher levels of investment in infrastructure. We are facing higher local utility rates. Only by encouraging economic development and spreading costs to other parts of the tax base will we be able to survive.

The City of Yakima needs this tool now. Some parts of our downtown district are boarded up, a condition brought on by the exodus of four major retailers since March 2000. This has cost our community 600 jobs, and left about 900,000 square feet of space vacant. In addition, a tech support help desk center is shutting down. These closures represent \$500,000 in lost revenue to the city. We are facing a very difficult situation, and need this badly.

The City of Spokane needs more resources, and we believe that the primary emphasis of tax increment financing should be on job growth. We think that the "but/for" criteria is too restrictive, because it is hard to know ahead of time whether something might have happened anyway. Undue burdens would be placed on developers. Another concern is the opt-in/opt-out language; we think that the existing statute is fine with modifications. Let local government officials be on the hook for this.

We are a rural economic Chamber of Commerce and support this tool and an amendment to modify the limits to make this more viable. We ask you to consider the way in which the impact is assessed and recognize the revenues captured are new revenues to the state. When people are employed, they are better able to meet health care needs, their education needs, and others.

Testimony Against: (With concerns) The Displacement Coalition is concerned with this approach. There is no limitation to areas of blight, and no adequate definition of blight. Without this, tax revenue is simply diverted from other important public uses to use by those that don't need it. The safeguards are not really there. Tax increment financing has been shown in areas across the nation to displace businesses and low-income housing tenants. It has typically been used in areas that are already experiencing growth. The Mayor of Seattle's report indicates that South Lake Union will be a primary target for such funding. If there is not an objective definition of "blight," the interpretation of the term is left to the whims of local officials. With respect to the size limitation for the increment area, it seems appropriate to come up with a different standard for cities of different sizes. Please don't rob Peter to pay Paul Allen.

It is very important to have impact analyses and mitigation processes. We are very interested in this as a tool for development in blighted areas. We want low-income housing to be eligible for funding. We are seeking ways for tools that support equitable development.

Persons Testifying: (In support with amendment) Representative Pettigrew, prime sponsor; Representative Alexander; Sheila Martin, Office of the Governor; Bill Cook, City of Yakima; Michelle Hagen, Washington Association of County Officials; Lynn Ford, Liberty Country Place; Todd Christensen, Centralia-Chehalis Chamber of Commerce; Scott Noble, Washington State Association of County Assessors; Paul Parker, Washington State Association of Counties; and Todd Mielke, Spokane Regional Chamber.

(Opposed) Matthew Fox, John Fox and Bette Reed, Ad Hoc Coalition to Amend TIF; and Ken Katahira, Interim Community Development Association.

Persons Signed In To Testify But Not Testifying: (In support) Ron Newbry, Washington Economic Development Association; Don Lewison, Souran; Mark Barbieri; and Bryan Wahl, Washington Association of Realtors.

(Opposed with concerns) Jeff Johnson, Washington State Labor Council.
