
HOUSE BILL 2203

State of Washington

58th Legislature

2003 Regular Session

By Representative Conway

Read first time 03/04/2003. Referred to Committee on Commerce & Labor.

1 AN ACT Relating to modifying electrical permitting and inspection
2 requirements applicable to work that requires minimal electrical
3 circuit modifications and has limited exposure hazards; and creating a
4 new section.

5 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

6 NEW SECTION. **Sec. 1.** The legislature finds that some electrical
7 work requires minimal electrical circuit modifications and has limited
8 exposure hazards. The legislature also finds that it may be
9 appropriate to permit and inspect such work on a random basis, or to
10 exempt such work from permitting and inspection requirements. Any
11 changes to current law, however, should further the state's compelling
12 public interest in protecting public safety.
