

SENATE BILL 5300

State of Washington                      58th Legislature                      2003 Regular Session

By Senators Zarelli, Poulsen and Fairley

Read first time 01/22/2003. Referred to Committee on Ways & Means.

1            AN ACT Relating to authorization for projects recommended by the  
2 public works board; creating new sections; making an appropriation; and  
3 declaring an emergency.

4 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

5            NEW SECTION.    **Sec. 1.** Pursuant to chapter 43.155 RCW, the  
6 following project loans recommended by the public works board are  
7 authorized to be made with funds previously appropriated from the  
8 public works assistance account:

9            (1) Annapolis Water District-domestic water project-decommission  
10 wells 6 and 7, including removing equipment and sealing both wells so  
11 that no water may flow freely between aquifers or to  
12 the surface . . . . . \$318,750

13            (2) Clark County-road project-construct approximately seven-tenths  
14 of a mile of roadway, install erosion control materials, realign  
15 adjoining street and roads, install traffic control devices and signs,  
16 construct a bike path, make storm drainage improvements, replace  
17 culverts, install sound control devices, add sidewalks, and make other  
18 related improvements to this area of roadway . . . . . \$1,400,000

- 1           (3) Highline Water District-domestic water project-construct a  
2 secondary source for the district's 600 zone, replace approximately six  
3 thousand five hundred feet of pipe, construct approximately one  
4 thousand feet of new transmission pipe, and install the equipment and  
5 appurtenances to operate the system. It will also rehabilitate a pump  
6 station along with installing the necessary systems to operate and  
7 control the pump . . . . . \$749,700
- 8           (4) Karcher Creek Sewer District-sanitary sewer project-replace and  
9 relocate the Crownwood pump station. Necessary power and sewer line  
10 connections will be made. All associated facilities, equipment,  
11 controls, and related items will be constructed or installed in order  
12 to operate the station safely and efficiently . . . . . \$425,000
- 13           (5) Puyallup-road project-improve approximately seven hundred feet  
14 of roadway and construct approximately one thousand feet of a new  
15 arterial street. Approximately one thousand two hundred feet of water  
16 line will be replaced. Approximately four thousand feet of storm pipe  
17 will be installed during the project. And approximately seven hundred  
18 feet of sewer line will be replaced . . . . . \$6,000,000
- 19           (6) Selah-sanitary sewer project-upgrade its wastewater treatment  
20 system by continuing a project to construct sludge handling, treatment,  
21 and dewatering facilities. The project includes the construction of  
22 these facilities, buildings to house the facilities, and systems to  
23 handle the wastewater. Other equipment and materials necessary to  
24 operate and manage the facilities and processes will  
25 be installed . . . . . \$1,128,400
- 26           (7) Williams Lake Sewer District #2-sanitary sewer project-design  
27 and construct new septic tank effluent sewer collection and transport  
28 system at east end of Williams Lake . . . . . \$876,800
- 29           (8) Yakima-domestic water project-improve its water system by  
30 constructing a coagulation plant, rehabilitate and upgrade the filter  
31 system, upgrade storage facilities, and install a generation system.  
32 All associated controls, telemetry, and related equipment will be  
33 installed . . . . . \$2,694,500
- 34           Total . . . . . \$13,593,150

35           NEW SECTION. **Sec. 2.** The sum of \$58,072,911, or as much thereof  
36 as may be necessary, is appropriated for the biennium ending June 30,  
37 2003, from the public works assistance account to the department of

1 community, trade, and economic development for the purposes of  
2 providing funds for the following project loans recommended by the  
3 public works board:

4 (1) Friday Harbor-sanitary sewer project-construct a new secondary  
5 wastewater treatment plant. Facilities, equipment, material, controls,  
6 and related items will be constructed or installed in order to run the  
7 plant at optimum performance. A sludge dryer will be installed in  
8 order to develop alternative disposal methods . . . . . \$2,000,000

9 (2) Lake Chelan Reclamation District-sanitary sewer project-replace  
10 or rehabilitate approximately forty thousand feet of force main,  
11 rehabilitate approximately thirty thousand feet of collector mains,  
12 replace five lift stations, upgrade telemetry and odor control  
13 facilities, install emergency generators, upgrade approximately one  
14 thousand six hundred side sewer services, and resurface roadway as  
15 necessary . . . . . \$5,376,050

16 (3) Val Vue Sewer District-sanitary sewer project-project will  
17 remedy problems associated with leaking manholes, rehabilitation of  
18 sewer mains, installing emergency generators, installing sewer lines,  
19 and replacement of side sewers. Other related equipment and material  
20 will be installed as necessary to reduce infiltration of storm water  
21 and to ensure optimum performance of the system . . . . . \$1,301,350

22 (4) Spokane-sanitary sewer project-rehabilitate the main line of  
23 its sanitary sewer system in the Central Business District.  
24 Approximately thirty-six pipe sections will be rehabilitated over the  
25 three-year period. Other associated improvements to the sewer system  
26 will be made as needed . . . . . \$901,000

27 (5) Karcher Creek Sewer District-sanitary sewer project-design and  
28 construct a replacement collection system in the Beach Drive service  
29 area. The project will replace approximately five thousand four  
30 hundred feet of sewer main and two thousand five hundred feet of  
31 lateral sewer pipe. A new sewer main will be constructed to convey  
32 sewage from the pump station to the treatment plant. Other associated  
33 equipment and material will be installed in order to operate and manage  
34 the system . . . . . \$807,500

35 (6) Mount Vernon-sanitary sewer project-install approximately five  
36 hundred feet of outfall pipe to the wastewater treatment system. Other  
37 related equipment and material will be installed to ensure the system  
38 works as designed . . . . . \$1,000,000

1 (7) City of Camas-road project-reconstruct and improve  
2 approximately two and one-tenths miles of roadway. Improvements  
3 include adding lanes and turn lanes, sidewalks, bike lanes, and related  
4 signage, lighting, erosion control, and other components associated  
5 with a major urban arterial . . . . . \$3,000,000

6 (8) Richland-domestic water project-install water mains, hydrants,  
7 control valves, and related equipment. Decommissioned lines will be  
8 sealed. Lines to the meters will be replaced. All sites disturbed by  
9 the project will be rehabilitated . . . . . \$8,755,000

10 (9) City of Everett-sanitary sewer project-install pumps and wells  
11 to move and stage effluent, install transmission pipes, install  
12 collection pipes, recondition existing pipe as needed, install at least  
13 one railroad casing system, and install other equipment and material  
14 necessary to complete the transition to the Puget Sound  
15 outfall . . . . . \$5,490,000

16 (10) City of Cle Elum-sanitary sewer project-construct a regional  
17 wastewater treatment facility to serve the City of Cle Elum, the city's  
18 urban growth area, the Town of South Cle Elum, and a master planned  
19 resort. Build or install all of the associated piping, telemetry,  
20 storage, and treatment facilities. Construct or install related  
21 equipment . . . . . \$1,000,000

22 (11) Douglas County Sewer District 1-sanitary sewer  
23 project-construct approximately two miles of a sewer interceptor line,  
24 four thousand five hundred feet of gravity-fed sewer lines, a two  
25 hundred fifty-gallon a minute lift station, and five thousand eight  
26 hundred feet of force main (all figures are approximate). The district  
27 will install controls and telemetry necessary to manage the system and  
28 will repair all damage to the roadway . . . . . \$1,936,050

29 (12) Peshastin Water District-domestic water project-replace  
30 approximately four miles of distribution and transmission lines  
31 throughout the district. Two wells will be rehabilitated, sources  
32 meters will be installed, electrical and telemetry systems will be  
33 installed, a new pump station will be constructed, and a new reservoir  
34 will be created. Other associated equipment, material, and systems  
35 will be constructed or installed in order to make the system perform at  
36 its optimum . . . . . \$1,314,600

37 (13) Seattle-bridge project-construct new approaches to the north  
38 and south ends of the Fremont Bridge and replace electrical and

1 mechanical equipment. Other related improvements necessary to enhance  
2 public safety and use of the bridge will be made as part of this  
3 project . . . . . \$10,000,000

4 (14) City of Bremerton-sanitary sewer project-design and construct  
5 the improvements necessary to virtually eliminate the combined sewer  
6 overflows that affect Anderson Cove. Approximately twelve separate  
7 improvements to the flow diversion process will be implemented as a  
8 result of the design work . . . . . \$475,000

9 (15) Cowlitz County PUD 1-domestic water project-replace  
10 approximately fifty thousand feet of waterline on several streets  
11 within the Upper Ostrander service area. Install fire hydrants and  
12 other water line related equipment. Replace a reservoir roof. Make  
13 other related system improvements . . . . . \$491,661

14 (16) City of Bonney Lake-domestic water project-construct a water  
15 treatment facility that includes a disinfection system. The project  
16 also includes the installation of water mains. Corrosion control  
17 facilities will be constructed, including storage tanks, telemetry,  
18 pumps, metering, and related equipment and facilities . . . \$1,174,700

19 (17) City of Battle Ground-road project-rehabilitate and improve  
20 west Main Street for approximately one mile. Four through lanes will  
21 be upgraded. A center turn lane will be installed. Bicycle paths will  
22 be constructed along with curbs and sidewalks. Water and sewer  
23 facilities running under the street will be upgraded. Storm water  
24 drainage will be improved. Traffic controls and signs will be  
25 installed as needed. Other related work to the roadway will be done to  
26 ensure the street is safe and operates as designed . . . . \$2,000,000

27 (18) City of Enumclaw-sanitary sewer project-upgrade and expand its  
28 wastewater treatment plant by modifying the headworks, adding a  
29 clarifier, constructing aeration basins, adding anaerobic basins and  
30 clarifiers, constructing chemical facilities, installing dewatering  
31 facilities, enlarging the laboratory, increasing plant capacity, and  
32 modifying or upgrading related facilities and equipment . . \$9,250,000

33 (19) West Richland-sanitary sewer project-install approximately  
34 thirty-two thousand feet of sewer pipe, install access sites,  
35 decommission a lagoon, install a lift station, construct a lined  
36 irrigation canal crossing, repair roadway disturbed by the project, and  
37 install telemetry and related equipment to ensure the system operates  
38 as designed . . . . . \$1,800,000

1 Total . . . . . \$58,072,911  
2 Sections 1 and 2 of this act total . . . . . \$71,666,061

3 NEW SECTION. **Sec. 3.** This act is necessary for the immediate  
4 preservation of the public peace, health, or safety, or support of the  
5 state government and its existing public institutions, and takes effect  
6 immediately.

--- END ---
