Brief Description: Determining the time period of a preexisting condition limitation for the basic health plan enrollment of individuals participating in community-based programs established to provide access to health care services for uninsured persons.

HB 2796 - DIGEST

Provides that, to the extent that the administrator adopts, by rule, preexisting condition limitations as part of the benefit package, any such rule must allow an enrollee to credit the period of their continued participation in a community-based program established to provide access to health care services for uninsured persons against the time period of their preexisting conditions limitation.
