Background:

Medicare is the federally funded and administered program providing health insurance primarily to those 65 and older. Enrollees may also purchase a policy in the commercial market to supplement the benefits provided under Medicare. Although such policies are regulated by the Office of the Insurance Commissioner under state statute, those statutes must be consistent with the requirements of federal law.

Both the Balanced Budget Act of 1997 and the Medicare Modernization Act of 2003 made changes to the federal law governing Medicare supplemental policies. Issues addressed included pre-existing condition waiting periods, termination and disenrollment, and the addition of the new Medicare prescription drug benefit. These changes were incorporated into the National Association of Insurance Commissioner's (NAIC) Medicare Supplemental Insurance Model Regulation (Model), which serves as a template for the relevant laws in all 50 states. Washington statutes have not yet been amended to reflect the updated Model.

Washington laws governing Medicare supplemental plans are amended to be consistent with the NAIC Model, reflecting changes required by the Balanced Budget Act and the Medicare Modernization Act.
