
SENATE BILL 6262

State of Washington

59th Legislature

2006 Regular Session

By Senators Kohl-Welles, Parlette, Honeyford, Keiser, Prentice and Kline; by request of Department of Labor & Industries

Read first time 01/10/2006. Referred to Committee on Labor, Commerce, Research & Development.

1 AN ACT Relating to establishing a pilot program to allow employers
2 to assist employees in completing applications for industrial insurance
3 benefits; and amending RCW 51.28.015.

4 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

5 **Sec. 1.** RCW 51.28.015 and 2005 c 108 s 1 are each amended to read
6 as follows:

7 (1) The legislature finds that:

8 (a) In 1998, the joint legislative audit and review committee, in
9 its performance audit of the Washington industrial insurance system,
10 reported that one of the most significant causes for delayed benefit
11 payments to workers and lack of employer involvement in claims was the
12 manner in which claims were reported. Under this system of reporting,
13 the worker generally reports the injury to a physician who, in turn,
14 reports the injury to the department.

15 (b) The performance audit further reported that adopting a system
16 in which the employee reports to the employer and the employer reports
17 to the department would speed the first payment of benefits to the
18 worker and involve the employer, from the beginning of the claim, in

1 assisting in the management of the claim, including returning the
2 worker to work.

3 (c) The performance audit also recognized that there would be
4 instances in which workers would be reluctant to report injuries to
5 employers and that, therefore, the system of physician reporting should
6 be retained as an alternative, and employer reporting should be tested
7 on a widespread basis.

8 (2)((+a)) The department of labor and industries shall develop and
9 implement an initiative to:

10 (a) Encourage the reporting of industrial injuries and occupational
11 diseases by the worker to his or her employer and by the employer to
12 the department(~~(. Under this initiative, the department must take~~
13 ~~steps to))~~;

14 (b) Encourage the employer to provide assistance to the worker in
15 completing the application for compensation; and

16 (c) Educate workers and employers about the benefits and importance
17 of prompt reporting of injuries and diseases.

18 ((+b) By)) (3) By January 1, 2007, the department shall develop and
19 begin a pilot program to allow employers to assist workers in
20 completing an application for benefits. This pilot program does not
21 replace the current method for reporting through the physician. The
22 pilot program shall include the voluntary participation of employers
23 that represent a cross-section of industries, geographic areas, union
24 and nonunion workers, and other criteria established by the department
25 with input of business and labor leaders. During the pilot period, the
26 department shall continue to expand the participation of employers and
27 shall consider steps to address the unique needs and issues of small
28 employers. The pilot program expires July 1, 2009.

29 (4) On December 1, ((2006)) 2007, and December 1, 2008, the
30 department of labor and industries shall ((develop and make statutory
31 recommendations for an alternative system of reporting injuries under
32 which the worker would report to the employer and the employer would
33 report to the department. Upon passage of such legislation, the
34 department shall immediately begin an educational effort to promote
35 this method of reporting.

36 (3)(a) ~~The department must conduct~~) report to the appropriate
37 committees of the legislature the findings of a study of:

1 ~~((i))~~ (a) Claims that are not reported promptly, including but
2 not limited to a review of the circumstances of such claims, the type
3 of injuries involved in such claims, and the reasons for the failure to
4 report such claims promptly;

5 ~~((ii))~~ (b) The effect of the educational initiative required
6 under subsection (2)~~((a))~~ of this section on whether the number of
7 claims reported to employers increased, whether there was a reduction
8 in delays in benefit payments, and whether there was an improvement in
9 employer involvement in assisting with claims management and an
10 increase in appropriate return-to-work and better outcomes for injured
11 workers and employers; ~~(and~~

12 ~~((iii))~~ (c) The results of the efforts of the centers of
13 occupational health education in early reporting and early notification
14 of employers, and the general lessons that can be drawn from these
15 results for the larger workers' compensation program(~~-~~

16 ~~(b) By December 1, 2006, the department must report on the results~~
17 ~~of the study to the appropriate committees of the legislature)); and~~

18 (d) The results of the pilot program for workers to begin the
19 process of applying for compensation through the employer and whether
20 additional statutory changes are required or recommended to implement
21 this process for all employers and workers.

--- END ---
