

**HB 3095 - DIGEST**

(SEE ALSO PROPOSED 1ST SUB)

Declares an intent to ensure that the state's investment in public safety radio communications facilities are managed in a way to promote to the maximum extent possible the health and safety of the state's citizens and the economic efficiencies of coordinated planning, development, management, maintenance, accountability, and performance.

Finds that an interoperable and operational public safety communications system is essential for disaster preparedness, emergency management, and public safety, and that coordination for the purpose of development, procurement, and deployment of a public safety communications system will result in a more effective use of state resources and improvement to government services.
