**HB 1071** by Representatives Campbell and Morrell

Concerning the uniform disciplinary act for health professions.

Requires the secretary of health to establish a work group to review the complaint processing and sanction determination phases of the health professions disciplinary process. At the secretary of health's discretion, the work group may include representatives of different health profession boards and commissions, professional associations, and other interested parties. The work group shall submit a report to the legislature by December 1, 2005, with recommendations for creating: (1) Greater efficiencies between the health professions boards and commissions and the secretary of health in processing complaints against license holders; and

(2) More consistent sanction determinations that balance the protection of the public's health and the rights of health care providers among the different health professions, including recommendations for specific ranges of sanctions for each act of unprofessional conduct and the effect of any aggravating and mitigating factors that may apply to each.

Requires the disciplining authority to revoke the license of a license holder who is found to have committed three acts of unprofessional conduct from the designated list in any combination within a ten-year period.

Declares that nothing in this act limits the authority of the disciplining authority to revoke a license or take other disciplinary action when the license holder has committed only one or two acts of unprofessional conduct instead of three.

**HB 1076** by Representatives Kenney, Rodne, Sells, Quall, Dickerson and Morrell; by request of Governor Locke

Establishing the college in the high school program.

Finds that: (1) Many high school students who wish to earn college credits are unable to participate in the running start program because they live in areas that do not have local colleges; and some students who would like to earn college credits while in high school do not participate in running start because they do not want to leave their high school campus in order to do so.

(2) Some high schools are currently working with colleges to offer dual credit courses on high school campuses to serve those students. However, there is no established statewide program or funding provided, so rules governing these programs vary and high school students pay varying amounts to cover the colleges' costs of working with high schools to offer the classes.

Declares an intent to establish the college in the high school program as a statewide option for high school students.

Requires the superintendent of public instruction, the state board for community and technical colleges, and the higher education coordinating board to jointly develop and adopt rules governing the college in the high school program. The rules shall be written to encourage the

maximum use of the program and shall not narrow or limit the enrollment options.

Improving the efficiency and predictability of the hydraulic project approval program.

Declares an intent to improve the process of regulating construction in state waters with policy measures that improve predictability for entities that work in state waters, and make the best use of limited state resources by ensuring that regulatory reviews of in-water construction are made in an efficient manner.

Requires the department to develop procedures to ensure consistency of application of hydraulic project approval conditions, to include the following: (1) Common technical conditions for saltwater and freshwater projects. These common technical conditions must, at a minimum, address allowable in-water work periods, and must recognize the need to maintain an economically competitive waterfront business and port community, and must meet the needs of infrastructure development as defined in RCW 90.74.010;

(2) Internal departmental permit review procedures that promote consistency within and between regions; and

(3) Habitat protection guidance for regional staff that result in predictable permit conditions for project applicants.

Establishes an expedited dispute resolution process to resolve disputes regarding hydraulic project approvals issued under this act.

Requires the department to, at the request of any person or government agency, develop a renewable five-year maintenance approval agreement or a hydraulic project approval mitigation agreement to allow for work on public and private property for bank stabilization, bridge repair, removal of sandbars and debris, channel maintenance, and other flood damage repair and reduction activity under reasonable agreed-upon conditions and times without obtaining permits for specific projects.

Privatizing the sale of liquor.

Declares an intent to close a portion of the state's retail liquor stores, to contract out their operation to private individuals, and to monitor the impact of the store closures.

Creates a task force on the contracting out of liquor to advise the board as it implements further contracting out of liquor stores.

Provides that, notwithstanding any other provision of law, the board is directed to implement the closure of twenty-five state liquor stores between July 1, 2007, and December 31, 2007. When determining which liquor stores

to close, the board must give due consideration to recommendations from the task force.

Requires contract liquor store managers to sell the board's liquor to retail customers and all eligible liquor licensees on the contract liquor store premises at prices set by the board.

Provides that, in addition to other provisions of law, it is unlawful for any contract liquor store manager or employee to: (1) Sell or offer for sale any liquor other than from the original package or container;

(2) Sell, give away, or permit the sale, gift, or procurement of any liquor for or to any person under twenty-one years of age;

(3) Sell, give away, or permit the sale, gift, or procurement of any liquor for or to any person apparently intoxicated;

(4) Permit the consumption of any spirits, strong beer, or alcohol on the premises by any person;

(5) Alter, change, or misrepresent the quality, quantity, or brand name of any liquor with the intent to defraud;

(6) Permit any person under twenty-one years of age to sell or give liquor to any other person, except to assist a cashier who is twenty-one years of age or older; or

(7) Purchase or otherwise obtain liquor in any manner or from any source other than that specifically authorized in this act.

Directs the joint legislative audit and review committee to study the impacts of further contracting out the state's retail sale of liquor, and to deliver a report on their findings to the legislature by December 31, 2009.

Declares an intent to improve the process of regulating construction in state waters with policy measures that improve predictability for entities that work in state waters, and make the best use of limited state resources by ensuring that regulatory reviews of in-water construction are made in an efficient manner.

Requires the department to develop procedures to ensure consistency of application of hydraulic project approval conditions, to include the following: (1) Common technical conditions for saltwater and freshwater projects. These common technical conditions must, at a minimum, address allowable in-water work periods, and must recognize the need to maintain an economically competitive waterfront business and port community, and must meet the needs of infrastructure development as defined in RCW 90.74.010;

(2) Internal departmental permit review procedures that promote consistency within and between regions; and

(3) Habitat protection guidance for regional staff that result in predictable permit conditions for project applicants.

Establishes an expedited dispute resolution process to resolve disputes regarding hydraulic project approvals issued under this act.

Requires the department to, at the request of any person or government agency, develop a renewable five-year maintenance approval agreement or a hydraulic project

approval mitigation agreement to allow for work on public and private property for bank stabilization, bridge repair, removal of sandbars and debris, channel maintenance, and other flood damage repair and reduction activity under reasonable agreed-upon conditions and times without obtaining permits for specific projects.

**SB 5097** by Senators Kohl-Welles, Kline, Rasmussen, Franklin, Roach and Pridemore; by request of Governor Locke

Providing for apprenticeship utilization requirements on public works projects.

Provides that, from January 1, 2005, and thereafter, for all public works estimated to cost one million dollars or more, all specifications shall require that no less than fifteen percent of the labor hours be performed by apprentices.

Authorizes awarding agency directors to adjust the requirements of this provision for a specific project for the designated reasons.

Applies only to public works contracts awarded by the state.

Does not apply to contracts awarded by state four-year institutions of higher education, state agencies headed by a separately elected public official, or the department of transportation.

Provides that, at the request of the senate commerce and trade committee, the house of representatives commerce and labor committee, or their successor committees, and the governor, the department of general administration and the department of labor and industries shall compile and summarize the agency data and provide a joint report to both committees. The report shall include recommendations on modifications or improvements to the apprentice utilization program and information on skill shortages in each trade or craft.

**SB 5098** by Senators Poulsen, Morton, Franklin, Kline and Kohl-Welles; by request of Governor Locke

Regulating the energy efficiency of certain products.

Finds that: (1) Efficiency standards for certain products sold or installed in the state assure consumers and businesses that such products meet minimum efficiency performance levels thus saving money on utility bills.

(2) Efficiency standards save energy and reduce pollution including global warming emissions and other environmental impacts associated with the production, distribution, and use of electricity and natural gas.

(3) Efficiency standards contribute to the economy of Washington by helping to better balance energy supply and demand, thus reducing pressure for higher natural gas and electricity prices. By saving consumers and businesses money on energy bills, efficiency standards help the state and local economy, since energy bill savings can be spent on local goods and services.

(4) Efficiency standards can make electricity systems more reliable by reducing the strain on the electricity grid during peak demand periods. Furthermore, improved energy efficiency can reduce or delay the need for new power plants, power transmission lines, and power distribution system upgrades.

Modifying motor vehicle emission standards.

Provides that, on or before December 31, 2005, the department shall adopt rules, in accordance with the provisions of chapter 34.05 RCW, to implement the light duty motor vehicle emission standards of the state of California, and shall amend these rules from time to time, in accordance with changes in emission standards in California. These regulations shall be applicable to motor vehicles with a model year 2009 and later.

Provides that, after adoption of rules specified in this act, no vehicle shall be registered in the state for model year 2009 or later unless the vehicle: (1) Is consistent with the vehicle emission standards adopted by the department of ecology; or

(2) Has seven thousand five hundred miles or more.

Repeals 1991 c 199 s 229 (uncodified).

**SB 5100** by Senators Poulsen, Fraser, Kline and Kohl-Welles; by request of Governor Locke

Providing greenhouse gas reduction objectives and strategies.

Declares that it shall be the goal of the state of Washington to reduce our emissions of greenhouse gases throughout the state and across all major sectors.

Provides that: (1) By December 1, 2010, the state of Washington will reduce its total greenhouse gas emissions to a level that does not exceed the total annual production of greenhouse gases produced within the state in 1990.

(2) By December 1, 2020, the state of Washington will reduce its total greenhouse gas emissions to a level that is at

least ten percent below the total annual production of greenhouse gases produced within the state in 1990.

(3) Beyond 2020, the state of Washington will continue to reduce its total greenhouse gas emissions to levels consistent with long-term stabilization of greenhouse gas levels in the atmosphere and consistent with the recommendations of the intergovernmental panel on climate change.

Requires the Washington State University center for climate and rural development in cooperation with the department, the department of community, trade, and economic development, and other government entities, including local air pollution control agencies, to annually report to the legislature and governor on greenhouse gas emissions produced in-state and total greenhouse gas emissions produced out of state as a result of in-state energy demands. The report shall describe progress toward achieving the goals set forth in this act.

Directs the center, in cooperation with the department, the department of community, trade, and economic development, the energy facility site evaluation council, and other interested parties, to create a greenhouse gas emissions registry by December 31, 2006. To the maximum extent possible, the center shall coordinate with other states that have or are developing such registries.

Authorizes the center to determine that Washington state participation in an existing or proposed multistate climate registry is sufficient to meet the requirements of this act.

Directs the center together with the department of community, trade, and economic development to investigate greenhouse gas reduction strategies for the state and report its findings to the governor and legislature.

Requires the center together with the department and the department of community, trade, and economic development to investigate the feasibility of a greenhouse gas cap and trade system for reducing greenhouse gas emissions. They shall produce a report to the governor and legislature by December 31, 2006.

Finds that the use of renewable energy resources generated from local sources such as solar and wind power benefit our state by reducing the load on the state's electric energy grid, by providing nonpolluting sources of electricity generation, and by the creation of jobs for local industries that develop and sell renewable energy products and technologies.

Finds that the state's economy can be enhanced through the creation of incentives to develop additional renewable energy industries in the state.

Declares an intent to provide incentives for the greater use of locally created renewable energy technologies, support and retain existing local industries, and create new opportunities for renewable energy industries to develop in Washington state.

Managing water resources for the mainstem of the Columbia river.

Declares an intent to establish a new state water resource management program for the mainstem of the Columbia river in order to meet the water supply needs of growing communities and the local economies on which they depend, and to do so in a manner that protects and enhances the quality of the natural environment, including streamflows necessary for the preservation of environmental values.

Establishes the Columbia river mainstem water management program. The goals of this water management program are to: (1) Meet the water supply needs of growing communities and the local economies on which they depend by providing a timely and affordable supply of water that will allow for new and reliable uses of water from the Columbia river mainstem; and

(2) Manage water to protect and enhance the quality of the natural environment, including streamflows necessary for the preservation of environmental values by securing and dedicating water to improve streamflows in the river mainstem.

Declares that the objectives of the program are to: (1) Improve the reliability of water rights issued by the

department between 1980 and 2003 that are subject to minimum instream flows or other mitigation conditions to protect streamflows;

(2) Improve streamflows during the primary period of fish outmigration on the mainstem; and

(3) Mitigate for the streamflow impacts of future water right permits as provided by the program.

Requires the department to prepare a biennial report on the status of the program. The report shall be transmitted to the appropriate standing committees of the legislature and the governor by December 31st of even-numbered years.

Provides that, ten years after the effective date of this act, and every ten years thereafter, the department shall conduct a formal review of the effectiveness of the program. The review shall include independent evaluations of the economic and scientific information that provide the premises of the program.

Provides that, as part of the biennial report required by this act, the department shall notify the governor and legislature of the timing and proposed process for the formal review and shall request funding to conduct the necessary independent reviews as part of their biennial budget request to the governor. Upon completion of the review, the department shall prepare and transmit a report of the findings of the review, including any recommendations for legislative changes to the program.

Creating the airport siting council.

Intends the airport siting council to site airports that will ensure the long-term air transportation needs of Washington state are met and are in compliance with applicable public health, environmental, and land use laws.

Provides that if the transportation commission finds that all of the following have occurred, it shall declare an impasse and refer the issue to the airport siting council: (1) A regional transportation plan does not satisfactorily address the state's interest as defined in RCW 47.06.040 with respect to planning for transportation needs through siting of an airport;

(2) There has been ample time to address siting of an airport in the regional transportation plan and local comprehensive plans, but either no decision has been reached or the process has resulted in a decision that will not address the state's transportation needs as set forth in RCW 47.06.040;

(3) The department of transportation has sought by all reasonable means to encourage local governments and regional bodies to cooperate in a planning and decision-making process that addresses in a timely manner statewide airport siting needs;

(4) The transportation commission has notified the local governments and regional bodies responsible for the regional transportation plan of its intent to declare an impasse; and

(5) The local governments and regional bodies responsible for the regional transportation plan have failed to show cause within thirty days of such notification that an impasse should not be declared.

Directs the transportation commission to declare an impasse by August 1, 2005, regarding the search for a supplemental airport in the Puget Sound region or replacement for Seattle-Tacoma International Airport.

Requires the airport siting council to convene to make recommendations to the governor whenever the transportation commission passes a resolution declaring that an impasse exists in the siting of an airport of statewide significance, as provided in this act.

Declares that this act supersedes other laws for establishing the location of airports of statewide significance or rules adopted under state law for establishing the location of airports of statewide significance.

Declares that the requirements of this act and rules adopted under it do not supersede the State Environmental Policy Act, the State Clean Air Act, the State Clean Water Act, the Shoreline Management Act, the laws relating to solid and hazardous waste management, and all the related portions of the Washington Administrative Code that implement these environmental laws.

Reducing heavy metals in child use area soils.

Declares it is the purpose of this act to create the safe playground soils program, through which technical and financial assistance will be provided by state and local health jurisdictions to the owners and operators of facilities having child use areas that may contain soils with elevated levels of heavy metals. It is further the purpose of this act to encourage testing of soils in such areas, and to require testing in geographic zones at higher risk of soil contamination.

Declares that the objective of this program is to obtain comprehensive information on the presence of heavy metals in child use areas, and to ensure that such information is made available to, and in some circumstances specifically provided to, the parents of children attending or using the facility, and the staff that work at the facility. It is the underlying premise of this program that comprehensive and quality data and analysis, shared with all interested persons, will be the basis for timely and effective response measures to protect the health of children.

Provides that the department shall make grants to owners of facilities with child use areas for the purpose of testing soils within those areas for the presence of heavy metals. The department shall actively publicize the grant program and solicit applications for grants with the objective of obtaining soil test results expeditiously and implementing best management practices where action level exceedances are found.

Provides that, to encourage early testing, for the period from the effective date of this section through June 30, 2007, the amount of the nonstate match required for the grant shall be limited to ten percent of the grant amount. From and after July 1, 2007, the nonstate match shall be no less than fifty percent of the grant amount.

Declares that the following geographic areas are designated higher risk zones for potential soil contamination by heavy metals: (1) The area of potential heavy metal deposition to soils from the Tacoma smelter, generally encompassing portions of King, Pierce, Kitsap, and Thurston counties, and referred to as the Asarco smelter plume zone. The department shall define this zone based upon existing information no later than October 1, 2005;

(2) Any other geographic area that is defined by a local health jurisdiction as having a high probability of encompassing child use areas with the presence of heavy metals in playground soils exceeding action levels.

Directs the department to establish an enforcement forbearance policy regarding owners of facilities implementing best management practices at child use areas under chapter 70.-- RCW (sections 1 through 9 of this act).

Provides that, by July 1, 2007, the department shall adopt as a condition of licensing day-care centers and family day-care providers that the facility is in compliance with applicable testing requirements and implementation of best management practices under chapter 70.-- RCW (sections 1 through 9 of this act).

Appropriates the sum of one million dollars, or as much thereof as may be necessary, from the state toxics control account to the department of ecology for the biennium ending June 30, 2007, to carry out the purposes of this act.
