

**SB 6564 - DIGEST**

Recognizes that independent nonprofit schools, colleges, and universities are important economic drivers in their communities, and encourages institutions to support local communities, to provide public benefit, and to respond to community expectations that they share facilities, offer programs, and attract students on par with Washington's publicly owned institutions and out-of-state schools and colleges. Further, the legislature encourages innovative programs and educational opportunities, sustainable practices, and increased use of facilities so that operations of institutions can be more cost-effective.
