**EFFECT:** Provides that a city, town, or county should review reclaimed water provisions of an adopted regional or water supply plan when reviewing water supplies for a proposed short plat, short subdivision, or subdivision of a city, town, or county where reclaimed water supplies may be proposed for nonpotable purposes in the short plat, short subdivision, or subdivision. Replaces "receives" with "is provided" with respect to providing "just compensation" for impairment in order to be more consistent with language in Title 8. Replaces "should be employed" with "shall be encouraged" with respect to the provision that provides that reclaimed water use should be encouraged through state and local planning and programs with incentives for state financial assistance recognizing programs and plans that encourage the use of conservation and reclaimed water use. Removes the null and void clause.
