
Higher Education Committee

HB 2162

Brief Description: Creating opportunities to obtain a diploma through college and career readiness centers.

Sponsors: Representatives Jarrett, Priest, Kenney, Hasegawa, Chase, P. Sullivan, Simpson, Moeller and Ormsby.

Brief Summary of Bill

- Requires school districts to contract with Educational Service Districts or community or technical colleges to deliver programs through college and career readiness centers that enable students over 16, but under 21, to earn a meaningful high school diploma.
- Requires colleges to deliver the center programs and receive reimbursement under the terms of the contract. Students are reported as district enrollment and receive a high school diploma from the school district.

Hearing Date: 2/26/07

Staff: Andrew Colvin (786-7304).

Background:

High School Graduation Requirements

The State Board of Education (SBE) establishes minimum high school graduation requirements for public schools. Students must complete at least 19 credits in specified content areas, do a culminating project, and prepare a high school and beyond plan. Beginning with the class of 2008, students will also need to earn a Certificate of Academic Achievement (CAA) by meeting the state academic standards in reading, writing, and mathematics on the Washington Assessment of Student Learning (WASL). Local school districts may establish additional graduation requirements. Students can enroll in public schools until they complete a diploma or turn 21.

High School Programs in Community and Technical Colleges

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not a part of the legislation nor does it constitute a statement of legislative intent.

Washington's community and technical colleges have a broad mission that includes workforce training, academic degrees, and adult education. The colleges also offer three types of high school programs:

High School Completion

High School Completion is a program to enable adults to earn a regular high school diploma issued by the college. Students can take both high school and college level courses to complete their requirements. The SBE graduation requirements apply to these diplomas, except that students over the age of 21 are exempt from the CAA under the SBE rules. Students under age 18 need a release from their high school in order to enroll in the program.

Drop-Out Retrieval

Eleven colleges presently offer high school programs under contract with a local school district for students aged 16 to 21 to make up the credits they need to graduate. Students who complete the school district's graduation requirements earn their diploma from the district.

Technical High Schools

Bates, Lake Washington, and Clover Park Technical Colleges each operate a program for juniors and seniors that offers career-technical training and courses necessary to receive a high school diploma.

Summary of Bill:

School districts must enter into contracts with Educational Service Districts (ESDs) or community or technical colleges to deliver courses or programs through college and career readiness centers that enable students over 16, but under 21, to earn a meaningful high school diploma. The students are reported as school district enrollment. Colleges are reimbursed for each enrolled student as provided in the contract.

A student who is over 16, but under 21, has the option to attend a center or remain in a high school or other school district program.

Community and technical colleges must make the centers available for students at no tuition or fee and at locations other than the high school campus. Center programs are available during the day, in the evening, on weekends, and during the summer. The programs are age appropriate, and colleges must attempt to accommodate students who are working while they attend the program.

The school district issues a high school diploma to a student enrolled in a college and career readiness center based on completion of all state and local graduation requirements.

Appropriation: None.

Fiscal Note: Requested on February 26, 2007.

Effective Date: The bill takes effect 90 days after adjournment of session in which bill is passed.
