

HB 1524 - DIGEST

(SEE ALSO PROPOSED 1ST SUB)

Finds and declares that meeting the state's future energy needs through conservation efforts, both large and small, is a priority. Small changes on the part of Washington consumers, such as switching from conventional, incandescent holiday lights to light-emitting diode holiday lights, has the potential to save hundreds of kilowatts of electricity each holiday season.

Declares an intent to encourage citizens to participate in cost-effective energy conservation by establishing efficiency standards for holiday lights sold in the state.
