

HB 2261 - DIGEST

(SUBSTITUTED FOR - SEE 1ST SUB)

Finds that there are communities in the state which exceed the national ambient air quality standards for particulate matter 2.5, primarily due to wood smoke emissions. The current strategies are not sufficient to reduce wood smoke emissions to levels which comply with the federal standards. The legislature finds that it is in the state's interest and to the benefit of the people of the state to evaluate additional measures to reduce wood smoke emissions and update the state wood smoke control program.
