

HB 2729 - DIGEST

(SUBSTITUTED FOR - SEE 1ST SUB)

Finds that machine-readable features found on drivers' licenses and identicards are intended to facilitate verification of age or identity, not to facilitate collection of personal information about individuals, nor to facilitate the creation of private databases of transactional information associated with those individuals.

Finds that easy access to the information found on drivers' licenses and identicards facilitates the crime of identity theft.

Restricts the reading and handling of certain identification documents.
