

SB 6136 - DIGEST

Declares that it is the policy of the state that the state wildlife account be self-supporting and that the license and permit fee revenues to the state wildlife account must be sufficient to fund the cost of the department's programs that support those activities.

Provides that, for each statutory license or permit fee that references this act, the commission shall periodically adjust the fee to ensure that state wildlife account revenues are sufficient to fund these activities. No fee may be increased by more than ten percent in any calendar year without prior legislative approval.
