

SENATE BILL REPORT

E2SSB 5916

As Passed Senate, March 12, 2009

Title: An act relating to broadband adoption and deployment.

Brief Description: Regarding broadband adoption and deployment.

Sponsors: Senate Committee on Ways & Means (originally sponsored by Senators Kohl-Welles, Rockefeller, Kauffman, Pridemore, Keiser, Marr, Hatfield, Delvin, Honeyford, Schoesler and Hewitt).

Brief History:

Committee Activity: Economic Development, Trade & Innovation: 2/12/09, 2/18/09 [DPS-WM].

Ways & Means: 2/25/09, 3/02/09 [DP2S, w/oRec].

Passed Senate: 3/12/09, 48-0.

SENATE COMMITTEE ON ECONOMIC DEVELOPMENT, TRADE & INNOVATION

Majority Report: That Substitute Senate Bill No. 5916 be substituted therefor, and the substitute bill do pass and be referred to Committee on Ways & Means.

Signed by Senators Kastama, Chair; Shin, Vice Chair; Zarelli, Ranking Minority Member; Delvin, Eide, Kilmer and McCaslin.

Staff: Jack Brummel (786-7428)

SENATE COMMITTEE ON WAYS & MEANS

Majority Report: That Second Substitute Senate Bill No. 5916 be substituted therefor, and the second substitute bill do pass.

Signed by Senators Prentice, Chair; Fraser, Vice Chair, Capital Budget Chair; Tom, Vice Chair, Operating Budget; Carrell, Fairley, Hobbs, Keiser, Kline, Kohl-Welles, McDermott, Murray, Oemig, Parlette, Pridemore, Rockefeller and Schoesler.

Minority Report: That it be referred without recommendation.

Signed by Senators Zarelli, Ranking Minority Member; Brandland and Hewitt.

Staff: Erik Sund (786-7454)

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not a part of the legislation nor does it constitute a statement of legislative intent.

Background: The Legislature created the Community Technology Opportunity Program (the program) and the Community Technology Opportunity Account (the account) in 2008. The program is administered by the Washington State University Extension. The program administrator provides organizational, capacity building, and fund-raising support for community technology programs throughout the state. A minimum of 75 percent of program funds are to be distributed through a competitive grant program. The grants are to be used by community technology programs to provide training; assistance in use of information and communication technologies among low-income and underserved residents; and other information technology-related services. Funds in the account may only be used for the operation of the program.

In 2008 the Department of Information Services (DIS) was directed to convene a High-Speed Internet Strategy Work Group (the work group) and work with it to develop a statewide High-Speed Internet Deployment and Adoption Strategy. The DIS and the work group released the strategy in December of 2008. Included in the strategy were recommendations that the program be expanded, that the state seek funding in the form of grants and donations from a variety of entities, and that the DIS be authorized to coordinate the entire deployment and adoption strategy.

Summary of Engrossed Second Substitute Bill: The Community Technology Opportunity Program is to be administered by DIS. The authority to oversee broadband adoption and deployment efforts in the state is vested in DIS. The only eligible entity to receive a grant under the federal broadband data improvement act in the state is DIS, which may distribute grant funds to others on a competitive basis. DIS may apply for and oversee implementation of other federally-funded or mandated broadband programs.

The work group is to be reconvened and renamed the Advisory Council on Digital Inclusion. The council is to report by January 15 of each year on (1) how a variety of high-speed internet access alternatives could be established; (2) strategies for continued broadband deployment and adoption efforts and development of advanced telecommunications applications; (3) methods to maximize the state's capacity for development of advanced telecommunications applications and methods to stimulate demand for them; (4) barriers to the advancement of technology entrepreneurship; and (5) the performance of digital literacy and computer access programs.

Government agencies engaging in mapping, deployment, or adoption activities related to high-speed internet infrastructure or services may gather or request any related proprietary or competitively sensitive information from providers of telecommunications or high-speed internet services so long as such information is maintained in a confidential manner by a nongovernmental third-party mapping entity and made available to the agency in aggregate form.

Appropriation: None.

Fiscal Note: Available on original bill. New fiscal note requested on March 13, 2009, for E2SSB 5916.

Committee/Commission/Task Force Created: No.

Effective Date: The bill contains an emergency clause and takes effect on July 1, 2009.

Staff Summary of Public Testimony (Economic Development, Trade & Innovation):

PRO: Broadband is a driver for economic development; it is fundamental to the digital products of the future. High-speed telecommunications means jobs. We need to expend a small amount of funds to procure a large amount of federal funds; this is the proper vehicle to take advantage of federal stimulus funds. When people can't afford access to the internet, they are at an economic disadvantage. This provides social and economic benefits in rural communities. This bill will create synergies with other public programs for people with disabilities.

Persons Testifying (Economic Development, Trade & Innovation): PRO: Senator Kohl-Welles, prime sponsor; Betty Buckley, Community Connect Network; Michael Gaffney, WSU; Ron Main, Broadband Cable Association; Gail Love, Communications Workers of America; Dorine Cornwell, Chris Tugwell, Bruce McGregor, YMCA of Greater Seattle; Sumeer Singla, Verizon NW; Egils Milbergs, Washington Economic Development Commission; Mike Corsini, Validus Consulting.

Staff Summary of Public Testimony (Ways & Means): PRO: This bill promotes access to high-speed internet services and the development of high skill, well paying jobs. The state is well positioned to take advantage of the federal funds available for broadband technology projects. This is a good bill that needs some adjustments to reduce the restrictiveness of the eligibility criteria for the Community Technology Opportunity Program grants and clarify the provisions related to leasehold excise taxes.

Persons Testifying (Ways & Means): PRO: Genesee Adkins, city of Seattle; Melissa Gombosky, Communication Workers of America.
