

**SB 5022 - DIGEST**

Finds that outdoor wood-fired boilers: (1) Can provide a convenient, safe, and environmentally responsible way to heat homes and hot water; and

(2) Provide an economical and more cost-effective source of heat than traditional gas or electric heat, use abundant, locally available, sustainable fuel, which can lower heating costs, and fill an alternative energy need for many households struggling with home heating costs.

Regulates the use, sale, and installation of outdoor wood-fired boilers.

Provides penalties.
