

**SB 5112 - DIGEST**

Eliminates the 180-day school year requirement while maintaining the one thousand instructional hour requirement.

Finds that while continuing to provide at least a minimum of one thousand hours of student instruction by permitting districts to lengthen the school day but allowing the flexibility to eliminate the requirement for a specific minimum number of school days, schools can continue to meet all of the other basic education program requirements while allowing the district to maintain consistent educational programs and staffing for students.
