

2ESHB 1365 - S AMD 4  
By Senator Chase

1           On page 4, beginning on line 9, after "output if" strike all  
2 material through "Has" on line 14 and insert "the following conditions  
3 are met:

4           (a) One hundred percent of the system's solar modules are  
5 manufactured in Washington by a manufacturer that has at least two  
6 years of experience manufacturing modules for high wind and high snow  
7 load locations in the state;

8           (b) One hundred percent of the system's solar modules have a class  
9 A fire rating;

10           (c) One hundred percent of the system's inverters are manufactured  
11 in Washington;

12           (d) The system is located in Washington;

13           (e) The system is capable of generating not more than twenty  
14 average megawatts in a calendar year; and

15           (f) The system has"

EFFECT:       A solar system must meet the following additional  
conditions before receiving the double multiplier: (1) One hundred  
percent of the system's solar modules are manufactured in Washington by  
a manufacturer that has at least two years of experience manufacturing  
modules for high wind and high snow load locations in the state; (2)  
one hundred percent of the system's solar modules have a class A fire  
rating; (3) one hundred percent of the system's inverters are  
manufactured in Washington.
