Senate Committee on Judiciary

Background:

Washington law does not regulate the possession of firearm suppressors. However, it is a gross misdemeanor crime in Washington for any person to use "any device or contrivance for suppressing the noise of any firearm."

Under federal law, the National Firearms Act (NFA) regulates the manufacture, importation, and transfer of firearm silencers and mufflers, as well as certain firearms, destructive devices, and other weapons. Items regulated under the NFA are referred to as NFA firearms. The NFA firearms must be registered in a database maintained by the Bureau of Alcohol, Tobacco, Firearms, and Explosives (BATFE). Only the manufacturer, importer, or maker of the NFA firearm may register it with the BATFE.

A person wishing to acquire a firearm silencer or other NFA firearm has to obtain a certification from the local chief law enforcement officer, undergo a background check, obtain prior approval for the transfer, and pay a \$200 tax on the transaction. Under the NFA, a person is allowed to make his or her own silencer or other NFA firearm by applying to the BATFE and meeting certain requirements. These requirements include: obtaining prior approval and registration of the item, obtaining a certification from the chief of the local law enforcement agency, undergoing a background check, and paying a \$200 tax on the item.

Federal law defines the term "firearm silencer or firearm muffler" as "any device for silencing, muffling, or diminishing the report of a portable firearm, including any combination of parts, designed or redesigned, and intended for the use in assembling or

fabricating a firearm silencer or firearm muffler, and any part intended only for use in such assembly or fabrication."

Summary:

The crime of using a contrivance or device for suppressing the noise of a firearm is amended to exempt the use of a suppressor that is legally registered and possessed in accordance with federal law.
