

HOUSE BILL REPORT

SHB 1135

As Passed Legislature

Title: An act relating to refrigerants for motor vehicles.

Brief Description: Regarding refrigerants for motor vehicles.

Sponsors: House Committee on Environment (originally sponsored by Representatives Finn, Armstrong and Upthegrove).

Brief History:

Committee Activity:

Environment: 1/20/11, 1/25/11 [DPS].

Floor Activity:

Passed House: 3/5/11, 93-4.

Senate Amended.

Passed Senate: 4/12/11, 44-4.

House Concurred.

Passed House: 4/14/11, 92-5.

Passed Legislature.

Brief Summary of Substitute Bill

- Prohibits motor vehicle air conditioning equipment from containing any refrigerant that is toxic or flammable, unless the refrigerant is allowed under rules adopted by the Department of Ecology.
- Modifies the prohibitions on selling or operating a motor vehicle with air conditioning equipment unless the equipment complies with state law.
- Removes the authority of the Washington State Patrol to adopt safety requirements and regulations applicable to motor vehicle air conditioning equipment.

HOUSE COMMITTEE ON ENVIRONMENT

Majority Report: The substitute bill be substituted therefor and the substitute bill do pass. Signed by 11 members: Representatives Upthegrove, Chair; Rolfes, Vice Chair; Short,

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not a part of the legislation nor does it constitute a statement of legislative intent.

Ranking Minority Member; Crouse, Fitzgibbon, Jacks, Jinkins, Morris, Moscoso, Takko and Tharinger.

Minority Report: Do not pass. Signed by 4 members: Representatives Harris, Assistant Ranking Minority Member; Nealey, Pearson and Taylor.

Staff: Courtney Barnes (786-7194).

Background:

Federal Significant New Alternatives Policy.

The Significant New Alternatives Policy (SNAP) program is the United States Environmental Protection Agency's (EPA) program to evaluate and regulate substitutes for ozone-depleting chemicals that are being phased out under the stratospheric ozone protection provisions of the federal Clean Air Act. Pursuant to its authority under the SNAP, the EPA has published a list of safe alternative motor vehicle air conditioning substances that are non ozone-depleting chemicals.

Motor Vehicle Air Conditioning Equipment.

"Air conditioning equipment" is defined in statute as mechanical vapor compression refrigeration equipment that is used to cool the driver or passenger compartment of any motor vehicle. Washington law prohibits air conditioning equipment from containing any refrigerant that is toxic or flammable, unless the refrigerant is included in the list published by the EPA as a safe alternative motor vehicle air conditioning substitute for chlorofluorocarbon-12.

A person may not have for sale, offer for sale, sell, or equip any motor vehicle with air conditioning equipment unless it complies with state law.

A person may not operate on any highway a motor vehicle equipped with air conditioning equipment unless the equipment complies with state law.

The Washington State Patrol.

The Washington State Patrol (WSP) may adopt and enforce safety requirements and regulations (applicable to motor vehicle air conditioning equipment) which must correlate with and conform to the current recommended practice or standard approved by the Society of Automotive Engineers.

The Department of Ecology.

Under the federal Clean Air Act, the states have the option to implement either federal motor vehicle emission standards or California motor vehicle emissions standards for passenger cars, light duty trucks, and medium duty passenger vehicles. The Legislature has adopted California motor vehicle emissions standards and authorized the Department of Ecology (DOE) to adopt rules to implement these emissions standards.

Summary of Substitute Bill:

Motor Vehicle Air Conditioning Equipment.

Air conditioning equipment may not contain any refrigerant that is toxic or flammable, unless the refrigerant is allowed under motor vehicle emission standards rules adopted by the DOE (instead of the list published by the EPA for safe alternative motor vehicle air conditioning substitutes for chlorofluorocarbon-12).

Provisions related to selling or operating a motor vehicle with air conditioning equipment are modified. A person may not sell or equip, for use in Washington, a new motor vehicle with any air conditioning equipment, unless the equipment complies with state law. A person may not register or license for use on any highway any new motor vehicle equipped with any air conditioning equipment, unless the equipment complies with state law.

The Washington State Patrol.

The provision allowing the WSP to adopt safety requirements and regulations applicable to motor vehicle air conditioning equipment is removed.

Appropriation: None.

Fiscal Note: Available.

Effective Date: The bill takes effect 90 days after adjournment of the session in which the bill is passed.

Staff Summary of Public Testimony:

(In support) The bill is essentially a housekeeping measure. The alternative substances list adopted by the EPA changes periodically, and the statute currently refers to an older list. Instead of coming back to the Legislature every time the list changes, the bill allows the Department to establish standards by rule. Newer refrigerants cannot be used unless the statute is changed to incorporate the most current list. The Department would not adopt rules that are more stringent than the EPA and California clean car standards. The Department would not need to do any additional rule making under this bill. There may be a technical issue and amendment to assure that the bill does not impact used vehicles.

(Opposed) None.

Persons Testifying: Representative Finn, prime sponsor; Sandi Swarthout, Alliance of Automobile Manufactures; and Marshal Taylor, Department of Ecology.

Persons Signed In To Testify But Not Testifying: None.
