SENATE COMMITTEE ON WAYS & MEANS

Staff: Brian Sims (786-7431)

Background: The state Constitution limits the issuance of state general obligation bonds. The State Treasurer may not issue a debt-limit general obligation bond if the amount of interest and principal payments in any year, along with such payments for existing debt limit bonds, would exceed 9 percent of the average of the annual general state revenue collections for the previous three fiscal years. General state revenues do not include property taxes even though they are deposited in the general fund.

Legislation enacted in 2011 (SSB 5181) established the Commission on State Debt and required it to recommend possible changes to the constitutional debt limit and other debt policy in order to:

- stabilize the capacity to incur new debt in support of sustainable and predictable capital budgets;
- reduce the growth in debt service payments to an appropriate level that no longer exceeds the long-term growth in the general fund expenditures; and
- maintain and enhance the state's credit rating.

The Commission on State Debt reported their findings and recommendation in December. Recommendations include changes to the constitutional debt limit and to the statutory working debt limit.

Summary of Bill: For debt incurred after July 1, 2014, the constitutional debt limit is 8.75 percent of the average of general state revenues for the previous six fiscal years. The definition of general state revenues includes property taxes deposited in the general fund.
