
HOUSE BILL 1279

State of Washington

62nd Legislature

2011 Regular Session

By Representatives Ladenburg, Asay, Dammeier, Ryu, Lias, Jenkins, Takko, Fitzgibbon, and Kenney

Read first time 01/18/11. Referred to Committee on Transportation.

1 AN ACT Relating to traffic safety at certain intersections and on
2 certain streets; amending RCW 46.63.170; and adding a new section to
3 chapter 47.36 RCW.

4 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

5 NEW SECTION. **Sec. 1.** A new section is added to chapter 47.36 RCW
6 to read as follows:

7 The duration of a yellow change interval at any traffic control
8 signal must be at least as long as the minimum yellow change interval
9 identified in the manual of uniform traffic control devices for streets
10 and highways as adopted by the department under this chapter.

11 **Sec. 2.** RCW 46.63.170 and 2010 c 161 s 1127 are each amended to
12 read as follows:

13 (1) The use of automated traffic safety cameras for issuance of
14 notices of infraction is subject to the following requirements:

15 (a) The appropriate local legislative authority must ~~((first~~
16 ~~enact))~~ prepare an analysis of the locations within the jurisdiction
17 where automated traffic safety cameras are proposed to be located: (i)
18 Before enacting an ordinance allowing for ~~((their use))~~ the initial use

1 of automated traffic safety cameras; and (ii) before adding additional
2 cameras or relocating any existing camera to a new location within the
3 jurisdiction. Automated traffic safety cameras may be used to detect
4 one or more of the following: Stoplight violations, railroad crossing
5 violations, (~~(or)~~) school speed zone violations, or speed limit
6 violations on arterial streets adjacent to major transit stations,
7 public parks, or recreation facilities. At a minimum, the local
8 ordinance must contain the restrictions described in this section and
9 provisions for public notice and signage. Cities and counties using
10 automated traffic safety cameras before July 24, 2005, are subject to
11 the restrictions described in this section, but are not required to
12 enact an authorizing ordinance. Beginning one year after the effective
13 date of this act, cities and counties using automated traffic safety
14 cameras must post an annual report of the number of traffic accidents
15 that occurred at each location where an automated traffic safety camera
16 is located as well as the number of notices of infraction issued for
17 each camera and any other relevant information about the automated
18 traffic safety cameras that the city or county deems appropriate on the
19 city's or county's web site.

20 (b) Use of automated traffic safety cameras is restricted to (~~two-~~
21 ~~arterial~~):

22 (i) Intersections(~~(7)~~) of two or more arterials. Within such
23 arterials, the city or county may use an automated traffic safety
24 camera to issue notices of infraction for right turn movements that are
25 in violation of RCW 46.61.235(1) only after any of the following
26 factors are considered:

27 (A) The operator of the motor vehicle fails to yield to a
28 pedestrian or bicyclist;

29 (B) The operator of the motor vehicle puts a pedestrian or
30 bicyclist in danger of injury as a result of the right turn movement;

31 (C) The operator of the motor vehicle fails to yield to another
32 vehicle; or

33 (D) The operator of the motor vehicle does not substantially reduce
34 the speed of the motor vehicle prior to making the right turn movement;

35 (ii) Railroad crossings(~~(7-and)~~);

36 (iii) School speed zones, but only if the school speed zone is
37 marked with approved school zone signs that flash amber or yellow

1 lights and operate during set hours when children and adults are
2 arriving at or leaving the school;

3 (iv) Arterial streets adjacent to major transit stations. For the
4 purposes of this subsection (1)(b)(iv), "major transit station" means
5 park and ride facilities, intermodal transit facilities, or transit
6 stops used by two or more transit routes for transfers between routes;
7 and

8 (v) Arterial streets adjacent to public parks and recreation
9 facilities, but only if the city or county demonstrates, in its
10 jurisdictional analysis described in (a) of this subsection, a need for
11 the camera because that public park or recreation facility generates
12 significant pedestrian traffic or is heavily used by children.

13 (c) During the 2009-2011 fiscal biennium, automated traffic safety
14 cameras may be used to detect speed violations for the purposes of
15 section 201(2), chapter 470, Laws of 2009 if the local legislative
16 authority first enacts an ordinance authorizing the use of cameras to
17 detect speed violations.

18 (d) Automated traffic safety cameras may only take pictures of the
19 vehicle and vehicle license plate and only while an infraction is
20 occurring. The picture must not reveal the face of the driver or of
21 passengers in the vehicle.

22 (e) For thirty days after the ordinance under (a) of this
23 subsection is enacted, only a written or verbal warning may be issued
24 to the registered owner of the vehicle detected for a violation within
25 this thirty-day period. For the first thirty days after an additional
26 automated traffic safety camera is installed in a city or county or an
27 existing automated traffic safety camera is relocated to a different
28 authorized location, only a written or verbal warning may be issued to
29 the registered owner of the vehicle detected by the additional or
30 relocated camera for a violation within this thirty-day period. After
31 this thirty-day period, a notice of infraction must be mailed to the
32 registered owner of the vehicle within fourteen days of the violation,
33 or to the renter of a vehicle within fourteen days of establishing the
34 renter's name and address under subsection (3)(a) of this section. The
35 law enforcement officer issuing the notice of infraction shall include
36 with it a certificate or facsimile thereof, based upon inspection of
37 photographs, microphotographs, or electronic images produced by an
38 automated traffic safety camera, stating the facts supporting the

1 notice of infraction. This certificate or facsimile is prima facie
2 evidence of the facts contained in it and is admissible in a proceeding
3 charging a violation under this chapter. The photographs,
4 microphotographs, or electronic images evidencing the violation must be
5 available for inspection and admission into evidence in a proceeding to
6 adjudicate the liability for the infraction. A person receiving a
7 notice of infraction based on evidence detected by an automated traffic
8 safety camera may respond to the notice by mail.

9 (f) The registered owner of a vehicle is responsible for an
10 infraction under RCW 46.63.030(1)(e) unless the registered owner
11 overcomes the presumption in RCW 46.63.075, or, in the case of a rental
12 car business, satisfies the conditions under subsection (3) of this
13 section. If appropriate under the circumstances, a renter identified
14 under subsection (3)(a) of this section is responsible for an
15 infraction.

16 (g) Notwithstanding any other provision of law, all photographs,
17 microphotographs, or electronic images prepared under this section are
18 for the exclusive use of law enforcement in the discharge of duties
19 under this section and are not open to the public and may not be used
20 in a court in a pending action or proceeding unless the action or
21 proceeding relates to a violation under this section. No photograph,
22 microphotograph, or electronic image may be used for any purpose other
23 than enforcement of violations under this section nor retained longer
24 than necessary to enforce this section.

25 (h) All locations where an automated traffic safety camera is used
26 must be clearly marked by placing signs in locations that clearly
27 indicate to a driver that he or she is entering a zone where traffic
28 laws are enforced by an automated traffic safety camera. Signs placed
29 in automated traffic safety camera locations after the effective date
30 of this act must follow the specifications and guidelines under the
31 federal manual on traffic devices.

32 (i) If a county or city has established an authorized automated
33 traffic safety camera program under this section, the compensation paid
34 to the manufacturer or vendor of the equipment used must be based only
35 upon the value of the equipment and services provided or rendered in
36 support of the system, and may not be based upon a portion of the fine
37 or civil penalty imposed or the revenue generated by the equipment.

1 (2) Infractions detected through the use of automated traffic
2 safety cameras are not part of the registered owner's driving record
3 under RCW 46.52.101 and 46.52.120. Additionally, infractions generated
4 by the use of automated traffic safety cameras under this section shall
5 be processed in the same manner as parking infractions, including for
6 the purposes of RCW 3.50.100, 35.20.220, 46.16A.120, and 46.20.270(3).
7 However, the amount of the fine issued for an infraction generated
8 through the use of an automated traffic safety camera shall not exceed
9 the amount of a fine issued for other parking infractions within the
10 jurisdiction.

11 (3) If the registered owner of the vehicle is a rental car
12 business, the law enforcement agency shall, before a notice of
13 infraction being issued under this section, provide a written notice to
14 the rental car business that a notice of infraction may be issued to
15 the rental car business if the rental car business does not, within
16 eighteen days of receiving the written notice, provide to the issuing
17 agency by return mail:

18 (a) A statement under oath stating the name and known mailing
19 address of the individual driving or renting the vehicle when the
20 infraction occurred; or

21 (b) A statement under oath that the business is unable to determine
22 who was driving or renting the vehicle at the time the infraction
23 occurred because the vehicle was stolen at the time of the infraction.
24 A statement provided under this subsection must be accompanied by a
25 copy of a filed police report regarding the vehicle theft; or

26 (c) In lieu of identifying the vehicle operator, the rental car
27 business may pay the applicable penalty.

28 Timely mailing of this statement to the issuing law enforcement
29 agency relieves a rental car business of any liability under this
30 chapter for the notice of infraction.

31 (4) Nothing in this section prohibits a law enforcement officer
32 from issuing a notice of traffic infraction to a person in control of
33 a vehicle at the time a violation occurs under RCW 46.63.030(1) (a),
34 (b), or (c).

35 (5) For the purposes of this section, "automated traffic safety
36 camera" means a device that uses a vehicle sensor installed to work in
37 conjunction with an intersection traffic control system, a railroad
38 grade crossing control system, or a speed measuring device, and a

1 camera synchronized to automatically record one or more sequenced
2 photographs, microphotographs, or electronic images of the rear of a
3 motor vehicle at the time the vehicle fails to stop when facing a
4 steady red traffic control signal or an activated railroad grade
5 crossing control signal, or exceeds a speed limit in a school speed
6 zone as detected by a speed measuring device. During the 2009-2011
7 fiscal biennium, an automated traffic safety camera includes a camera
8 used to detect speed violations for the purposes of section 201(2),
9 chapter 470, Laws of 2009.

10 (6) During the 2009-2011 fiscal biennium, this section does not
11 apply to automated traffic safety cameras for the purposes of section
12 218(2), chapter 470, Laws of 2009.

--- END ---
