

SENATE BILL REPORT

SB 6501

As of February 5, 2014

Title: An act relating to used oil recycling.

Brief Description: Concerning used oil recycling.

Sponsors: Senators Ericksen and Darneille.

Brief History:

Committee Activity: Energy, Environment & Telecommunications: 2/06/14.

SENATE COMMITTEE ON ENERGY, ENVIRONMENT & TELECOMMUNICATIONS

Staff: Jan Odano (786-7486)

Background: The Hazardous Waste Management laws set up a comprehensive framework for state and local government responsibilities concerning waste management practices. The Department of Ecology (Ecology) must develop a state hazardous waste management plan. The state plan includes elements such as an inventory and assessment of the capacity of existing facilities to treat, store, dispose, and manage hazardous waste; a forecast of future hazardous waste generation; siting criteria for hazardous waste management facilities; and public education and information. Ecology must include elements of local government hazardous waste plans as necessary for effective and coordinated programs throughout the state.

Local governments must prepare local hazardous waste plans and include an element to manage moderate-risk wastes generated or present in their jurisdiction. The local hazardous waste plans must include public involvement and education regarding the hazards to human health and environmental hazards from improper disposal of wastes; proper handling, reducing, recycling, and disposing of waste; and an inventory of facilities managing hazardous waste as well as generators of hazardous waste. In addition, local governments must include a used oil recycling element of their hazardous waste plans.

A local government hazardous waste plan used oil recycling element must include a plan to reach the local goals for household used oil recycling, and to the extent possible, incorporate voluntary agreements with the private sector and state agencies to provide sites for the collection of used oil, and residential collection of used oil; plans for enforcing the sign and container ordinances and public education on used oil recycling; and an estimate of funding

needed.

Ecology must prepare guidelines for requirements for the local government used oil recycling element. The guidelines include collection and rerefining goals, number of used oil collection sites needed, and suitable public used oil collection sites. These requirements may be waived if a local government demonstrates that the objectives of the used oil recycling program have been met. In addition, the guidelines established statewide equipment and operating standards for public used oil collection sites.

Used oil must be recycled, treated, or disposed in accordance with hazardous waste management requirements. Used oil that is contaminated with polychlorinated biphenyls (PCBs) is regulated under the federal Toxic Substances Control Act and enforced by the U.S. Environmental Protection Agency (EPA). The regulations include use, distribution, processing, disposal, and recordkeeping requirements.

Summary of Bill: In its guidance for the local government used oil recycling element, Ecology must include best management practices (BMP) for preventing and managing PCB contamination at public used oil collection sites. The BMPs must include tank testing requirements, contaminated tank labeling and security measures, contaminated tank clean-up standards, proper contaminated used oil disposal as required by EPA, spill control measures, and model contract language for used oil collection vendors.

Ecology must provide grants to local governments to provide assistance with achieving BMPs, meeting federal requirements for PCB contaminated used oil disposal, or follow-up testing and monitoring of recycled oil for EPA compliance requirements.

Local governments must include in their used oil recycling element a plan for BMPs addressing prevention and management of PCB contamination at public used oil collection sites.

Appropriation: None.

Fiscal Note: Requested on February 5, 2014.

Committee/Commission/Task Force Created: No.

Effective Date: Ninety days after adjournment of session in which bill is passed.
