(g) A convenient means of obtaining lists of participating primary care and specialty care providers, including disclosure of network arrangements that restrict access to providers within any plan network. The offer to provide the information referenced in this subsection (1) must be clearly and prominently displayed on any information provided to any prospective enrollee or to any prospective group representative, agent, employer, or enrollee representative; and

(h) Descriptions and justifications for all provider compensation programs, including any incentive or penalty programs that are intended to encourage providers to withhold services, or to minimize or avoid referrals to specialists.

(2) Upon the request of any person, including a current enrollee, prospective enrollee, or the insurance commissioner, a carrier must provide written information regarding any health care plan it offers, that includes the following written information:

(a) Any documents, instruments, or other information referred to in the medical coverage agreement;

(g) A copy of the carrier's review of adverse benefit determinations grievance process for claim or service denial and its grievance process for dissatisfaction with care; and

(h) Accreditation status with one or more national managed care accreditation organizations, and whether the carrier tracks its health care effectiveness performance using the health employer data information set (HEDIS), whether it publicly reports its HEDIS data, and how interested persons can access its HEDIS data.

(3) Each carrier shall provide to all enrollees and prospective enrollees a list of available disclosure items.

(4) Nothing in this section requires a carrier or a health care provider to divulge proprietary information to an enrollee, including the specific contractual terms and conditions between a carrier and a provider.

(5) No carrier may advertise or market any health plan to the public as a plan that covers services that help prevent illness or promote the health of enrollees unless it:

(a) Provides all clinical preventive health services provided by the basic health plan, authorized by chapter 70.47 RCW;

(b) Monitors and reports annually to enrollees on standardized measures of health care and satisfaction of all enrollees in the health plan. The state department of health shall recommend appropriate standardized measures for this purpose, after consideration of national standardized measurement systems adopted by national managed care accreditation organizations and state agencies that purchase managed health care services; and

(c) Makes available upon request to enrollees its integrated plan to identify and manage the most prevalent diseases within its enrolled population, including cancer, heart disease, and stroke.

(6) No carrier may preclude or discourage its providers from informing an enrollee of the care he or she requires, including various treatment options, and whether in the providers' view such care is consistent with the plan's health coverage criteria, or otherwise covered by the enrollee's medical coverage agreement with

the carrier. No carrier may prohibit, discourage, or penalize a provider otherwise practicing in compliance with the law from advocating on behalf of an enrollee with a carrier. Nothing in this section shall be construed to authorize a provider to bind a carrier to pay for any service.

(7) No carrier may preclude or discourage enrollees or those paying for their coverage from discussing the comparative merits of different carriers with their providers. This prohibition specifically includes prohibiting or limiting providers participating in those discussions even if critical of a carrier.

(8) Each carrier must communicate enrollee information required in chapter 5, Laws of 2000 by means that ensure that a substantial portion of the enrollee population can make use of the information. Carriers may implement alternative, efficient methods of communication to ensure enrollees have access to information including, but not limited to, web site alerts, postcard mailings, and electronic communication in lieu of printed materials.

(9) The commissioner may adopt rules to implement this section. In developing rules to implement this section, the commissioner shall consider relevant standards adopted by national managed care accreditation organizations and state agencies that purchase managed health care services, as well as opportunities to reduce administrative costs included in health plans.
