

HB 1844-S.E - DIGEST

(DIGEST AS ENACTED)

Changes the threshold from one hundred twenty thousand dollars to one hundred thousand dollars for work performed on ferry vessels and terminals by state forces.

Requires the department of transportation, when the estimated cost of work to be performed on ferry vessels and terminals is between one hundred thousand dollars and two hundred thousand dollars, to contact contractors that appear on the department's small works roster to do specific work the contractors are qualified to do to determine if any contractor is interested and capable of doing the work.
