

**HB 1767 - H AMD 953**

By Representative Goehner

1 On page 3, after line 38, insert the following:

2 "(8) Any beneficial electrification plan adopted by a municipal  
3 utility pursuant to this section must require the utility to include  
4 a program to replace a minimum of 50 percent of the electric  
5 resistant heating in the utility's service area with more efficient  
6 forms of electric space heating before the utility may consider  
7 actions that would result in the conversion of appliances or other  
8 energy end uses to electricity from a fossil fuel or wood energy  
9 source."

10 On page 6, after line 7, insert the following:

11 "(8) Any beneficial electrification plan adopted by a public  
12 utility district pursuant to this section must require the public  
13 utility district to include a program to replace a minimum of 50  
14 percent of the electric resistant heating in the public utility  
15 district's service area with more efficient forms of electric space  
16 heating before the public utility district may consider actions that  
17 would result in the conversion of appliances or other energy end uses  
18 to electricity from a fossil fuel or wood energy source."

EFFECT: Requires municipal utilities and public utility districts, as part of a beneficial electrification plan, to include a program to replace a minimum of 50% of the electric resistant heating in the utility's service area with more efficient forms of electric space heating before the utility can then consider actions that would result in the conversion of appliances or other energy end uses to electricity from a wood or fossil fuel energy source.
