

SENATE BILL REPORT

HB 1393

As of March 12, 2021

Title: An act relating to delaying certain implementation dates for the photovoltaic module stewardship and takeback program.

Brief Description: Delaying certain implementation dates for the photovoltaic module stewardship and takeback program.

Sponsors: Representatives Shewmake, Ramel, Lekanoff and Duerr.

Brief History: Passed House: 2/26/21, 93-2.

Committee Activity: Environment, Energy & Technology: 3/11/21.

Brief Summary of Bill

- Provides a two-year delay for certain implementation dates for the Photovoltaic Module Stewardship and Takeback Program.

SENATE COMMITTEE ON ENVIRONMENT, ENERGY & TECHNOLOGY

Staff: Julie Tran (786-7283)

Background: Photovoltaic Module Stewardship and Takeback Program. In 2017, the Legislature created the Photovoltaic (PV) Module Stewardship Program, which requires manufacturers of solar panels, also known as PV modules, to provide the public a convenient and environmentally sound way to recycle all modules purchased after July 1, 2017. Department of Ecology (Ecology) oversees the program.

Each manufacturer must prepare and submit a stewardship plan to Ecology by July 1, 2022, or within 30 days of its first sale of a PV module in or into the state. The stewardship plan must:

- describe how manufacturers will finance the takeback and recycling system;
- accept all of the manufacturer's PV modules sold in or into the state after July 1,

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not part of the legislation nor does it constitute a statement of legislative intent.

2017;

- describe how the program will minimize the release of hazardous substances and maximize the recovery of other components;
- provide for takeback of PV modules;
- identify how relevant stakeholders will receive information; and
- establish performance goals.

Beginning April 1, 2024, and by April 1st in each subsequent year, each manufacturer, or its designated stewardship organization, must provide a report to Ecology, for the previous calendar year, that documents the plan's implementation and assesses the achievement of performance goals outlined in the stewardship plan.

Beginning July 1, 2023, no manufacturer, distributor, retailer, or installer may sell or offer for sale a PV module in or into the state unless the manufacturer of the PV module has submitted to Ecology a stewardship plan and received plan approval.

Summary of Bill: Each manufacturer must prepare and submit a stewardship plan to Ecology by July 1, 2024, rather than 2022, or within 30 days of its first sale of a PV module in or into the state.

Beginning April 1, 2026, rather than 2024, and by April 1st in each subsequent year, each manufacturer, or its designated stewardship organization, must provide a report to Ecology, for the previous calendar year, that documents the plan's implementation and assesses the achievement of performance goals outlined in the stewardship plan.

Beginning July 1, 2025, rather than 2023, no manufacturer, distributor, retailer, or installer may sell or offer for sale a PV module in or into the state unless the PV module manufacturer submits a stewardship plan to Ecology and receives plan approval.

Appropriation: None.

Fiscal Note: Not requested.

Creates Committee/Commission/Task Force that includes Legislative members: No.

Effective Date: Ninety days after adjournment of session in which bill is passed.
