

HOUSE BILL REPORT

HB 2236

As Reported by House Committee On:
Education

Title: An act relating to expanding and strengthening career and technical education core plus programs.

Brief Description: Expanding and strengthening career and technical education core plus programs.

Sponsors: Representatives Shavers, Santos, Reed and Goodman.

Brief History:

Committee Activity:

Education: 1/16/24, 1/25/24 [DPS].

Brief Summary of Substitute Bill

- Directs the Office of the Superintendent of Public Instruction (OSPI), in collaboration with specified entities, to develop an Allied Health Professions Career and Technical Education Core Plus Program (Allied Health Program).
- Provides that the curriculum and other instructional materials for the Allied Health Program must be available for optional use in school districts and skill centers beginning in the 2025-26 school year.
- Establishes a temporary Statewide Career and Technical Education Core Plus Advancement Task Force in the OSPI charged with recommendation and reporting duties.

HOUSE COMMITTEE ON EDUCATION

Majority Report: The substitute bill be substituted therefor and the substitute bill do pass. Signed by 8 members: Representatives Santos, Chair; Shavers, Vice Chair; Bergquist,

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not part of the legislation nor does it constitute a statement of legislative intent.

Nance, Ortiz-Self, Pollet, Stonier and Timmons.

Minority Report: Do not pass. Signed by 7 members: Representatives Rude, Ranking Minority Member; McEntire, Assistant Ranking Minority Member; Couture, Eslick, Harris, McClintock and Steele.

Staff: Ethan Moreno (786-7386).

Background:

Career and Technical Education.

Career and Technical Education (CTE) is a planned program of courses and learning experiences that begins with exploration of career options and supports basic academic and life skills. Career and Technical Education instruction is delivered through programs at middle and high schools, through approved online courses, and at skill centers, the regional instructional venues that provide access to comprehensive, industry-defined CTE programs that prepare students for careers, employment, apprenticeships, and postsecondary education.

Career and Technical Education instruction is provided through two general classifications of courses—exploratory and preparatory—both of which must comply with numerous standards established by the Office of the Superintendent of Public Instruction (OSPI).

Core Plus.

Core Plus is a two-year CTE instruction program that is designed to prepare students for a structured pathway to employment in one of three sectors: aerospace/advanced manufacturing; construction; and maritime. Core Plus instructional materials are vetted by industry partners—the Boeing Company, the Associated General Contractors Education Foundation, and the Manufacturing Industrial Council—and are approved for classroom use by the OSPI.

According to the OSPI, more than 5,500 students participated in approximately 120 Core Plus programs in high schools and skill centers in the 2021-22 school year.

Initial Core Plus offerings for students began with the aerospace/advanced manufacturing instruction program and later expanded to include the construction and maritime programs. State law contemplates additional Core Plus programs in health care and information technology.

The two-year high school curriculum used for Core Plus instruction is validated by the applicable industry and uses standardized certificate systems for documenting student attainment of learning goals and objectives. The first year of the curriculum teaches basic manufacturing skills that apply to industries across all Washington industrial sectors, with the second year providing more in-depth instruction in the industry sector.

Administrative and funding provisions for Core Plus are established in the state's biennial operating budget, not in statute. Operating budget funding for Core Plus programs was initially approved in 2017 and the funding levels have subsequently increased.

Summary of Substitute Bill:

Allied Health Professions Core Plus Program.

The Office of the Superintendent of Public Instruction (OSPI), in collaboration with the State Board for Community and Technical Colleges (SBCTC), the Department of Health, the Health Workforce Council, a statewide organization representing career and technical education, representatives from the allied health industry, and representatives from labor organizations representing allied health professions, is directed to develop an Allied Health Professions Career and Technical Education (CTE) Core Plus Program (Allied Health Program) for providing instruction to students who are pursuing industry-recognized nondegree credentials that: lead to entry level positions in allied health professions, and articulate to either related, recognized nondegree credentials or two or four-year degrees, or both.

The curriculum and other instructional materials for the allied health program must be available for optional use in school districts and skill centers beginning in the 2025-26 school year.

In meeting the obligations related to the Allied Health Program, the OSPI must:

- consult with representatives from allied health profession employers and labor organizations representing allied health employees for the purpose of promoting industry sector partnerships, developing relationships with employers that are committed to hiring students who have completed the program, and soliciting recommendations for the establishment of the program on specified topics and other issues deemed necessary by the entities with which it must collaborate in developing the Allied Health Program;
- implement a process for soliciting comments about the Allied Health Program's establishment and operation from teachers and students, including students' parents or guardians; and
- consider any preliminary or final recommendations of the Statewide CTE Core Plus Advancement Task Force.

After the Allied Health Program is established, the OSPI must convene and collaborate with an advisory committee consisting of industry leadership from the allied health sector, representatives from a statewide entity representing businesses in the sector, and representatives from labor organizations representing employees in allied health professions for the purpose of:

- informing the administration and continual improvement of the Allied Health

- Program;
- reviewing data and outcomes;
- recommending program improvements;
- ensuring that the Allied Health Program reflects needed industry competencies; and
- identifying appropriate program credentials.

The OSPI is also authorized to adopt and revise rules as necessary for the implementation for the Allied Health Program and associated responsibilities.

Statewide CTE Core Plus Advancement Task Force.

The Statewide CTE Core Plus Advancement Task Force (Task Force) is established in the OSPI with the following eight members:

- the Superintendent of Public Instruction (SPI) or the SPI's designee;
- two representatives from a statewide organization representing CTE, at least one of whom must be a CTE classroom instructor;
- a representative of CTE Core Plus Aerospace/Advanced Manufacturing selected by an organization representing aerospace or advanced industrial manufacturers;
- a representative of CTE Core Plus Construction selected by an organization representing general contractors;
- a representative of CTE Core Plus Maritime selected by an organization representing maritime interests;
- a representative from the SBCTC selected by the SBCTC; and
- a representative from the Workforce Training and Education Coordinating Board (Workforce Board) selected by the Workforce Board.

The SPI or the SPI's designee must chair the Task Force, and staff support for the Task Force must be provided by the OSPI. Provisions establishing the Task Force and prescribing its duties expire June 30, 2026.

The Task Force must develop recommendations for:

- expanding and strengthening the accessibility, stability, and uniformity of secondary work-integrated learning opportunities, including CTE, career connected learning, regional apprenticeship programs, CTE Core Plus programs, work-based learning, internships and externships, and other types of work-integrated learning (these recommendations should address governance, operations, and codification, and must be in the form of draft legislation);
- the successful administration and operation of CTE Core Plus programs through appropriate collaboration with industry sector leadership from program areas; and
- a CTE Core Plus model framework that can be used to guide the expansion, establishment, and operation of CTE Core Plus programs.

The Legislature does not intend for the recommendation to modify the operation of CTE Core Plus programs established prior to January 1, 2024.

The Task Force must report its findings and recommendations to the Governor, the appropriate fiscal and policy committees of the Legislature, and the State Board of Education by November 15, 2025.

Substitute Bill Compared to Original Bill:

As compared to the original bill, the substitute bill:

- adds the Department of Health, the Health Workforce Council, representatives from the allied health industry, and representatives from labor organizations representing allied health professions to the list of entities that the Office of the Superintendent of Public Instruction (OSPI) must collaborate with in developing an Allied Health Professions Career and Technical Education Core Plus Program (Allied Health Program);
- requires the OSPI to consult with representatives from allied health profession employers and labor organizations representing allied health employees for the purpose of developing relationships with employers that are committed to hiring students who have completed the Allied Health Program;
- specifies that the Legislature does not intend for recommendations of the Statewide Career and Technical Education Core Plus Advancement Task Force (Task Force) to modify the operations of core plus programs established prior to January 1, 2024;
- directs the OSPI to consider any preliminary or final recommendations of the Task Force, instead of considering the Task Force's recommendations;
- extends by one year the reporting date of the Task Force to November 15, 2025;
- extends by one year the expiration date for the Task Force to June 30, 2026;
- specifies that curricula and other instructional materials for the Allied Health Program must be available for optional use in school districts and skill centers beginning in the 2025-26 school year, instead of in the 2025-26 school year; and
- modifies intent language.

Appropriation: None.

Fiscal Note: Requested on January 10, 2024.

Effective Date of Substitute Bill: The bill takes effect 90 days after adjournment of the session in which the bill is passed.

Staff Summary of Public Testimony:

(In support) With more than 5,500 participating students, Core Plus is a successful program. More than 1,000 former Core Plus students have been hired by Boeing, and this represents the strength of the program. By codifying a new program, the Legislature will help to ensure its establishment and the participation of industry. Policymakers look forward to the program helping to create a new generation of health care professionals.

This bill is a terrific opportunity and clarifying amendments for it are likely. There is a health care worker shortage, and this bill should be passed now. Native communities are using Core Plus programs.

Everybody deserves a chance, and Core Plus programs give students who want to work a chance to succeed.

The Core Plus model uses and industry connections and partnerships with an approved curriculum that leads to industry credentials. The bill is not trying to make new Core Plus program using existing Core Plus materials, it is instead trying to create a Core Plus platform that health care can use.

Core Plus is a manufacturing program, but this bill lifts the program. Industry participation and free curriculum—provided by the industry—are non-negotiable components of Core Plus programs. There are opportunities to continue improving this bill throughout the legislative process.

This bill is supported by skill center leaders. This bill can be an additive program to existing Core Plus programs, and there are thousands of unfilled health care positions in the region. Using the Core Plus approach for health care will have many benefits, including supporting student engagement, learning, and industry needs.

The current Core Plus model is good for industry and the social emotional well-being of students. Bringing experts together to develop a model that can be applied to other sectors is important. The bill promotes equity.

Providing work-based opportunities for students is challenging. While there are differences between manufacturing and health care, there are overlaps in instructional delivery methods. Advocates of the legislation hope that students will use health care instruction provided through the program as a career ladder.

(Opposed) None,

(Other) The Core Plus curriculum is developed by industry through an ongoing investment. The bill does not include industry representation from the health care sector. Is Core Plus the correct structure for this program? Will allied health provide ongoing support for a new Core Plus program? Core Plus programs should be codified, but the language for doing so should be drafted by industries. The business community has not been involved in this bill.

The process called for in the bill will fundamentally affect the Core Plus systems that were originally developed by the Boeing Company. The Core Plus program works beautifully for construction and manufacturing, with free curricula. Policymakers should be cautious about the idea that Core Plus can be easily copied for other sectors. Existing Core Plus

grant programs should not be changed.

The magic of Core Plus is that it is industry-led. This bill does not model that process, and the processes in the bill do not assure success. Industry has not been engaged in the development of this bill. The bill should be set aside for a year. If not, section 2 should be removed from the bill.

Persons Testifying: (In support) Representative Clyde Shavers, prime sponsor; Becky Wallace, Office of Superintendent of Public Instruction; Charlie Brown, Washington Skills Centers Directors; Tim Knue, Washington Association for Career and Technical Education; Dave Gering, Manufacturing Industry Council; Scott Anderson, CSR Marine; Shani Watkins, West Sound Technical Skills Center; Kirsten Thornton, Renton Schools; and Tom Walker, Career and Technical Education Health Science Association.

(Other) Michele Willms, Associated General Contractors of Washington; Sarah Patterson, Associated General Contractors Education Foundation; and Emily Wittman, Association of Washington Business.

Persons Signed In To Testify But Not Testifying: None.
