

SENATE BILL REPORT

SB 5178

As of January 20, 2023

Title: An act relating to large debris removal from interstate highways.

Brief Description: Concerning large debris removal from interstate highways.

Sponsors: Senators Fortunato and Gildon.

Brief History:

Committee Activity: Transportation: 1/24/23.

Brief Summary of Bill

- Increases litter cleanup restitution payments for persons who litter in an amount greater than one cubic foot.
- Dedicates most revenue from litter cleanup restitution payments from violations on state highways, and excess balances in the waste tire removal account, for large debris removal and highway cleanup.

SENATE COMMITTEE ON TRANSPORTATION

Staff: Daniel Masterson (786-7454)

Background: Litter Cleanup Restitution Payments. Littering on state and private lands not owned by the litterer is prohibited. It is a misdemeanor for a person to litter in an amount greater than one cubic foot but less than one cubic yard and a gross misdemeanor for a person to litter in an amount of one cubic yard or more.

A person who litters in an amount greater than one cubic foot shall also pay a litter cleanup restitution payment. If the amount is greater than one cubic foot but less than one cubic yard the restitution payment is equal to twice the actual cost of cleanup, or \$50 per cubic foot of litter, whichever is greater. If the amount littered is one cubic yard or more the

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not part of the legislation nor does it constitute a statement of legislative intent.

restitution payment is equal to twice the actual cost of cleanup, or \$100 per cubic foot of litter, whichever is greater. One-half of the restitution payment is distributed to the landowner and one-half to the law enforcement agency investigating the incident. A court may suspend or modify the cleanup restitution payment if the person cleans up and properly disposes of the litter.

Litter Tax and Waste Reduction, Recycling, and Litter Control Account. A tax is imposed on businesses whose products, including packaging, wrapping, and containers, are reasonably related to the litter problem in the state. The revenues from the litter tax are deposited into the Waste Reduction, Recycling, and Litter Control account. The funds in the account are used for state agency litter collection programs, local government waste reduction, litter control, and recycling activities, and waste reduction and recycling efforts by the Department of Ecology.

Fee on Retail Sale of Tires and the Waste Tire Removal Account. State law requires that a \$1 per tire fee be collected on the retail sale of new replacement vehicle tires. Retailers are permitted to retain 10 percent of the fee for costs associated with the proper management of waste vehicle tires by the retailer. The remaining 90 percent of the fee is deposited into the Waste Tire Removal Account and may be used for the cleanup of unauthorized waste tire piles, measures that prevent future accumulation of unauthorized waste tire piles, and road wear related maintenance on state and local public highways.

On September 1st of odd-numbered years, the state treasurer must transfer any cash balance in excess of \$1 million from the Waste Tire Removal Account to the Motor Vehicle Fund for the purpose of road wear related maintenance on state and local public highways.

Summary of Bill: The litter cleanup restitution payment for persons who litter in an amount greater than one cubic foot but less than one cubic yard is increased to four times the actual cost of cleanup, or \$100 per cubic foot of litter, whichever is greater.

The litter cleanup restitution payment for persons who litter in an amount of one cubic yard or more is increased to four times the actual cost of cleanup, or \$200 per cubic foot of litter, whichever is greater.

For violations subject to litter cleanup restitution payments that occur on state highways, 100 percent of any litter cleanup restitution payment that is to be distributed to the Department of Transportation, as the landowner, and 50 percent of any litter cleanup restitution payment that is to be distributed to the law enforcement agency, must be deposited in the Waste Reduction, Recycling, and Litter Control Account for purposes of large debris removal and highway cleanup, including traffic control and disposal costs.

The requirement that the state treasurer must transfer any cash balance in the Waste Tire Removal Account in excess of \$1 million on September 1st of odd-numbered years is amended to direct the transfer to the Waste Reduction, Recycling, and Litter Control

Account instead of the Motor Vehicle Fund. The funds must be used for purposes of large debris removal and highway cleanup, including traffic control and disposal costs.

"Large debris" is defined as debris that would be hazardous to motorcycles including, but not limited to, wood debris, pallets, furniture, vehicle parts, tires, tire pieces, or other debris visibly noticeable to drivers. "Large debris" does not include small items of litter such as paper products.

Appropriation: None.

Fiscal Note: Available.

Creates Committee/Commission/Task Force that includes Legislative members: No.

Effective Date: Ninety days after adjournment of session in which bill is passed.
