18 transportation does not have the capacity to be the project manager
19 on a project and a local jurisdiction is ready, willing, and able to
20 implement the project within the time frames envisioned in the
21 omnibus transportation appropriations act. In developing its
22 recommendations, the work group must consider, at a minimum:

12 applicable.

13 (b) Design development must include recommendations for
14 encouraging vehicle conversions for smaller commercial vehicle fleets
15 and owner-operators of commercial vehicles, as well as tools for
16 facilitating carbon emission reductions to benefit vulnerable
17 populations and overburdened communities. Infrastructure and
18 incentive programs recommended may include, but are not limited to,
19 grant, rebate, tax incentive, and financing assistance programs.

33 Address policy questions related to household travel; address gaps
34 between separate regional and local transportation models; and create
35 a dataset to allow both for analysis and response to policymakers'
36 questions relating to household travel and for transportation
37 modeling and development. In evaluating potential survey options, the
38 committee shall consider opportunities for the state to partner and
39 expand on developed established household travel surveys, including
40 surveys conducted at both the Puget Sound regional council and the

1 federal highway administration. In its recommendation, the committee
2 shall outline the process required for a statewide survey, including

28 road, and freight rail transportation needs, options, and impacts
29 from shifting the movement of freight and goods that currently move
30 by barge through the lower Snake river dams to highways, other roads,
31 and rail.

32 (a) The department shall include the independent review team in
33 all phases of the analysis to enable the team to develop an
34 independent assessment of the analysis, assumptions, stakeholder
35 engagement, and cost and impact estimates. Summary findings from the

19 update process must be informed by guidance from a steering committee
20 comprised of the commission, the joint transportation committee's
21 executive committee, the governor's office, the secretary of the
22 department of transportation, and representatives of metropolitan and
23 regional transportation planning organizations. As part of the update
24 process, the commission shall undertake specific actions in the
25 following order:

26 (a) Conduct stakeholder outreach, gathering input, and framing
27 the outreach around the current plan's policy construct and high
28 level priorities, the 2022 transportation revenue package, and
29 recently enacted significant policy legislation;

30 (b) Report outreach findings and results to the joint
31 transportation committee for review and input;

32 (c) Restructure the plan to (i) primarily focus on high level
33 policy priorities within the six transportation policy goals under

35 with the interests of stakeholders and legislators;

36 (d) Gather further input from stakeholders and the joint
37 transportation committee on the restructured plan's format and
38 content; and

1 (e) Finalize the updated plan, based upon input from stakeholders
2 and the joint transportation committee.

3 (2) The legislature finds that the current balance of and
4 projected revenues into the Alaskan Way viaduct replacement project
5 account are sufficient to meet financial obligations during fiscal
6 years 2024 and 2025.

7 (3) Within the parameters established under RCW 47.56.880, the
8 commission shall review toll revenue performance on the Interstate
9 405 and state route number 167 corridor and adjust Interstate 405
10 tolls as appropriate to increase toll revenue to provide sufficient
11 funds for payments of future debt pursuant to RCW 47.10.896 and to
12 support improvements to the corridor. The commission shall consider
13 adjusting maximum toll rates, minimum toll rates, and time-of-day
14 rates, and restricting direct access ramps to transit and HOV
15 vehicles only, or any combination thereof, in setting tolls to
16 increase toll revenue. The commission is encouraged to make any
17 adjustments to toll rates in coordination with the planned expansion
18 of express toll lanes between the cities of Renton and Bellevue.

19 (4) \$500,000 of the motor vehicle account—state appropriation is
20 provided solely for the commission to conduct a route jurisdiction
21 study aimed at assessing the current state highway inventory and
22 local roadway designations to determine if changes are needed in
23 jurisdictional assignment between the state, county, and city road
24 systems. The study must also review current criteria used to define
25 the state highway system to determine if such criteria continue to be
26 applicable. The commission shall submit a report of study findings
27 and recommendations to the transportation committees of the
28 legislature by July 1, 2025.

29 (5) The commission may coordinate with the department of
30 transportation to jointly seek federal funds available through the
31 federal strategic innovations in revenue collection grant program,
32 applying toll credits for meeting match requirements. The commission
33 must provide draft applications for federal grant opportunities to
34 the chairs and ranking members of the transportation committees of
35 the legislature for review and comment prior to submission.

36 (6) The transportation commission shall conduct an assessment
37 aimed at identifying approaches to streamlining the current rule-
38 making process for setting toll rates and policies for eligible toll
39 facilities, while maintaining public access and providing
40 opportunities to provide input on proposals. The intent of the

1 assessment is to identify rule-making approaches that support the
2 state's ability to set toll rates and policies in a timely and
3 efficient manner, so that the state can meet anticipated funding
4 obligations. This assessment should include a review of rate-setting
5 processes used by toll authorities in other states. The
6 transportation commission shall provide recommendations to the
7 transportation committees of the legislature by July 31, 2024.

19 provided solely for the commission to carry out a study assessing
20 approaches to increasing safety and compliance of high occupancy
21 vehicle lanes, express toll lanes, tolled facilities, and
22 construction zones, facilitated by advanced technologies.

23 (a) The approaches assessed must, at a minimum, focus on advanced
24 roadside technologies that: Are able to operate independently without
25 connection to the department of transportation's existing
26 communication systems and utilities; have a limited physical
27 footprint that does not use over-roadway infrastructure; and have a
28 95 percent or greater license plate reading accuracy.

29 (b) The study must review current laws, including assessing
30 underlying policies related to prohibitions on program cost coverage
31 coming from infraction or other revenues generated by advanced
32 technology systems, and identify provisions needed to enable a future
33 technology-based safety and compliance program.

34 (c) The commission shall submit an interim report to the
35 transportation committees of the legislature by January 10, 2024,
36 that, at a minimum, provides an initial assessment of the viability
37 of deploying a system into operation. A final report of findings and
38 recommendations must be submitted to the transportation committees of
39 the legislature by June 30, 2024.

1 (9) \$75,000 of the multimodal transportation account—state
2 appropriation is provided solely for the commission to carry out an
3 initial assessment and scoping effort to determine the feasibility of
4 creating a future west coast transportation network plan. This plan
5 would serve to proactively identify and coordinate improvements and
6 investments across the west coast states to freight rail, passenger
7 rail, highways, and air transportation. The intent for the plan is to
8 leverage and align west coast efforts to reduce our collective carbon
9 footprint, improve freight and passenger mobility, and strengthen
10 west coast resiliency. This effort must be carried out in partnership
11 with the Oregon and California transportation commissions and the
12 state department of transportations from each state, and must
13 consider, but not be limited to:

14 (a) Current state activities, investments, and plans that support
15 the establishment of clean transportation in the air, on the
16 highways, and on rail lines moving freight and passengers;

17 (b) Currently identified resiliency risks along the west coast
18 and existing strategic plans and investments that could inform a
19 future west coast unified plan; and

20 (c) Incorporation of work from the statewide transportation
21 policy plan.

22 (10) (a) \$250,000 of the motor vehicle account—state appropriation
23 is provided solely for the commission to:

24 (i) Carry out engagement with Washington stakeholders on the
25 results of the recently completed Forward Drive research program to
26 inform next steps on road usage charging;

27 (ii) Develop updated revenue forecasts for motor fuel taxes and
28 road usage charging; and

29 (iii) Consult with other states to develop concepts for future
30 testing of multistate road usage charging.

31 (b) The commission is required to submit a report of findings and
32 recommendations to the transportation committees of the legislature
33 by December 1, 2024.

35 is provided solely for the commission to oversee a study evaluating
36 possible approaches for addressing the impacts of licensed
37 noncommercial vehicles that are of heavier weight and greater size
38 than a standard vehicle and that therefore represent a likely
39 increased risk of injury from collisions to pedestrians and other

1 vulnerable roadway users. The evaluation shall include an assessment
2 of:

3 (i) Methodologies for defining particular categories of vehicles
4 and for the identification of specific vehicles to which policy
5 interventions could apply, possible policy interventions steps
6 necessary for implementation of such policies, and consideration of
7 whether after-market vehicle modifications could be included;

8 (ii) Options for addressing the impacts of such vehicles
9 including, but not limited to, applying differentiated fees based
10 upon size and weight of a vehicle, such as a road usage charge at a
11 higher per mile charge as part of a potential future road usage
12 charge system, or a graduated vehicle weight fee;

13 (iii) For revenue focused policies, methods to calculate the
14 additional amounts to assess based upon identified vehicle
15 characteristics that include, but are not limited to, vehicle weight
16 and size;

17 (iv) Options at the point of sale for communicating the
18 additional charges to be paid or policies to be implemented on the
19 identified vehicles and the reasons for the additional charges; and

20 (v) Possible uses for the additional revenue raised, including
21 options to address any differential adverse impacts resulting from
22 the identified vehicles use of the transportation system.

23 (b) The commission shall provide a status report that includes
24 preliminary recommendations for collecting additional revenue or
25 applying other policies for licensed noncommercial vehicles that are
26 of heavier weight and greater size than a standard vehicle to the
27 transportation committees of the legislature by December 1, 2024, and
28 shall provide a final report to the transportation committees of the
29 legislature by May 1, 2025.

30 clean alternative fuel vehicle use opportunities to underserved
31 communities and low to moderate income members of the workforce not
32 readily served by transit or located in transportation corridors with
33 emissions that exceed federal or state emissions standards.
34 Consistent with the geographical diversity element described in RCW
35 47.04.355(4), the legislature strongly encourages the department to
36 consider implementing the pilot in both urban and rural communities
37 if possible, to obtain valuable information on the needs of

37 owners to transition to zero-emission vehicles and equipment. The
38 department and voucher program third-party administrator must
39 condition vehicle and infrastructure voucher funding to ensure these

1 program policy goals are furthered through the voucher funding
2 provided.

3 (vi) Consistent with voucher program design, the department is
4 required to distribute funds to the voucher program third-party
5 administrator sufficiently in advance of final requirements for

30 transition people into treatment or housing or for debris clean up on
31 highway rights-of-way. A minimum of \$2,000,000 of this appropriation
32 must be used to deliver more frequent removal of litter on the
33 highway rights-of-way that is generated by unsheltered people and may
34 be used to hire crews specializing in collecting and disposing of
35 garbage, clearing debris or hazardous material, and implementing
36 safety improvements where hazards exist to the traveling public and
37 department employees. The department may use these funds to either
38 reimburse local law enforcement costs or the Washington state patrol
39 if they are providing enhanced safety to department staff during

9 encampments, including information on arrangements with local
10 governments or other entities related to these activities;

11 (ii) A description of the planned activities in the ensuing two
12 quarters to further address the emergency hazards and risks along
13 state highway rights-of-way; and

14 (iii) Recommendations for executive branch or legislative action
15 to achieve the desired outcome of reduced emergency hazards and risks
16 along state highway rights-of-way.

20 conjunction with subsection ~~((+4))~~ (3) of this section. The program
21 must address the safety and public health problems created by
22 homeless encampments on the department's property along state
23 highways within the city limits. \$555,000 of the motor vehicle
24 account—state appropriation is for dedicated department maintenance
25 staff and associated clean-up costs. The department and the city of
26 Spokane shall enter into a reimbursable agreement to cover up to
27 \$445,000 of the city's expenses for clean-up crews and landfill
28 costs.

29 ~~((+6))~~ (5) \$1,025,000 of the motor vehicle account—state
30 appropriation is provided solely for the department to implement
31 safety improvements and debris clean up on department-owned rights-

38 employees, or people encamped upon department-owned rights-of-way.
39 The department may request assistance from the Washington state

1 patrol as necessary in order for both agencies to provide enhanced
2 safety-related activities regarding the emergency hazards along state
3 highway rights-of-way in the Seattle area.

5 appropriation is provided solely for a partnership program between
6 the department and the city of Tacoma, to be administered in
7 conjunction with subsection ~~((+4))~~ (3) of this section. The program

9 homeless encampments on the department's property along state
10 highways within the city limits. \$570,000 of the motor vehicle
11 account—state appropriation is for dedicated department maintenance
12 staff and associated clean-up costs. The department and the city of
13 Tacoma shall enter into a reimbursable agreement to cover up to
14 \$445,000 of the city's expenses for clean-up crews and landfill

21 and adjacent to the city limits pursuant to section 216(10), chapter
22 186, Laws of 2022. However, the amount provided in this subsection
23 must be placed in unallotted status and may not be spent prior to
24 November 1, 2023. If, after November 1, 2023, the department, in
25 consultation with the office of financial management, determines that
26 the department fully spent the \$2,000,000 appropriated in section
27 216(10), chapter 186, Laws of 2022, within the 2021-2023 fiscal

31 the department may only spend from the appropriation in this
32 subsection an amount not in excess of the amount unspent from the
33 \$2,000,000 within the 2021-2023 fiscal biennium, with any remaining
34 amount to remain in unallotted status and unspent. In no event may
35 the department spend more than \$2,000,000 within the 2021-2023 and
36 2023-2025 fiscal biennia for this purpose.

5 must also increase the visibility of road pavement markings during
6 periods of low light conditions and during precipitation with
7 pavement marking products that contain all-weather optical
8 reflectivity capability. To the extent practicable, the department
9 shall install lane striping products with the necessary equipment to
10 minimize damage from snowplow blades. The request for proposals and
11 subsequent competitive procurement for the signs shall be performed
12 following state specifications and standards.

1 TOTAL APPROPRIATION. (~~(\$100,879,000)~~)
2 \$103,036,000

3 The appropriations in this section are subject to the following
4 conditions and limitations:

5 (1) \$6,000,000 of the motor vehicle account—state appropriation
6 is provided solely for low-cost enhancements. The department shall
7 give priority to low-cost enhancement projects that improve safety or
8 provide congestion relief. By December 15th of each odd-numbered
9 year, the department shall provide a report to the legislature
10 listing all low-cost enhancement projects completed in the prior
11 fiscal biennium.

12 (2)(a) During the 2023-2025 fiscal biennium, the department shall
13 continue a pilot program that expands private transportation
14 providers' access to high occupancy vehicle lanes. Under the pilot
15 program, when the department reserves a portion of a highway based on
16 the number of passengers in a vehicle, the following vehicles must be
17 authorized to use the reserved portion of the highway if the vehicle
18 has the capacity to carry eight or more passengers, regardless of the
19 number of passengers in the vehicle: (i) Auto transportation company
20 vehicles regulated under chapter 81.68 RCW; (ii) passenger charter
21 carrier vehicles regulated under chapter 81.70 RCW, except marked or
22 unmarked stretch limousines and stretch sport utility vehicles as
23 defined under department of licensing rules; (iii) private nonprofit
24 transportation provider vehicles regulated under chapter 81.66 RCW;
25 and (iv) private employer transportation service vehicles. For
26 purposes of this subsection, "private employer transportation
27 service" means regularly scheduled, fixed-route transportation
28 service that is offered by an employer for the benefit of its
29 employees. Nothing in this subsection is intended to authorize the
30 conversion of public infrastructure to private, for-profit purposes
31 or to otherwise create an entitlement or other claim by private users
32 to public infrastructure.

33 (b) The department shall expand the high occupancy vehicle lane
34 access pilot program to vehicles that deliver or collect blood,
35 tissue, or blood components for a blood-collecting or distributing
36 establishment regulated under chapter 70.335 RCW. Under the pilot
37 program, when the department reserves a portion of a highway based on
38 the number of passengers in a vehicle, blood-collecting or
39 distributing establishment vehicles that are clearly and identifiably

1 marked as such on all sides of the vehicle are considered emergency
2 vehicles and must be authorized to use the reserved portion of the
3 highway.

4 (c) The department shall expand the high occupancy vehicle lane
5 access pilot program to for hire nonemergency medical transportation
6 vehicles, when in use for medical purposes, as described in section
7 ~~208((24) of this act))~~ (20), chapter 472, Laws of 2023. Under the
8 pilot program, when the department reserves a portion of a highway
9 based on the number of passengers in a vehicle, nonemergency medical
10 transportation vehicles that meet the requirements identified in
11 section ~~208((24) of this act))~~ (20), chapter 472, Laws of 2023 must
12 be authorized to use the reserved portion of the highway.

13 (d) Nothing in this subsection is intended to exempt these
14 vehicles from paying tolls when they do not meet the occupancy
15 requirements established by the department for express toll lanes.

16 (3) The appropriations in this section assume implementation of
17 additional cost recovery mechanisms to recoup at least \$100,000 in
18 credit card and other financial transaction costs related to the
19 collection of fees imposed under RCW 46.17.400, 46.44.090, and
20 46.44.0941 for driver and vehicle fee transactions beginning January
21 1, 2023. The department may recover transaction fees incurred through
22 credit card transactions.

23 (4) The department shall promote safety messages encouraging
24 drivers to slow down and move over and pay attention when emergency
25 lights are flashing on the side of the road and other suitable safety
26 messages on electronic message boards the department operates across
27 the state. The messages must be promoted through June 30, 2025. The
28 department may coordinate such messaging with any statewide public
29 awareness campaigns being developed by the department of licensing or
30 the Washington state traffic safety commission, or both.

31 (5) \$5,000,000 of the multimodal transportation account—state
32 appropriation is provided solely for the department to address

35 management. By December 15th of each odd-numbered year, the
36 department shall provide a report to the legislature listing all
37 emergent issues addressed in the prior fiscal biennium.

38 ~~((7))~~ (6) \$3,529,000 of the highway safety account—state
39 appropriation is provided solely for implementation of chapter 17,
40 Laws of 2023 (speed safety cameras). ~~((If chapter 17, Laws of 2023 is~~

1 ~~not enacted by June 30, 2023, the amount provided in this subsection~~
2 ~~lapses.~~

3 ~~(8))~~ (7) \$1,279,000 of the move ahead WA account—state
4 appropriation is provided solely for maintenance and operations of
5 the virtual coordination center. The department is encouraged to
6 apply for federal grant funds for the virtual coordination center and
7 may use state funds as a match. By December 1, 2023, the department
8 shall report to the transportation committees of the legislature: (a)
9 Recommendations to expand the center's operations, including specific
10 additional jurisdictions and corridors across the state; and (b)
11 amounts received and dates of receipt of any new cash and in-kind
12 matches from virtual coordination center partners including, but not
13 limited to, the city of Seattle, King county, other state and local
14 jurisdictions, and private sector partners.

15 ~~((9))~~ (8) \$100,000 of the motor vehicle account—state
16 appropriation is provided solely for the department to prepare and
17 submit a report to the transportation committees of the legislature
18 by December 1, 2024, with a prioritized list of recommendations for
19 improving safety and mobility on Interstate 90 between North Bend and
20 Cle Elum during winter weather events, including estimated costs. The
21 recommendations must include, but are not limited to, options to
22 improve compliance with traction tire and chain requirements and
23 reduce snow-related closures.

24 ~~((11))~~ (9)(a) \$5,000,000 of the motor vehicle account—state
25 appropriation is provided solely for the department, in coordination
26 with the independent review team of the joint transportation
27 committee, to conduct an analysis of highway, road, and freight rail
28 transportation needs, options, and impacts from shifting the movement
29 of freight and goods that currently move by barge through the lower
30 Snake river dams to highways, other roads, and rail. The study should
31 generate volume estimates and evaluate scenarios for changes in
32 infrastructure and operations that would be necessary to address
33 those additional volumes. The assessment must include quantitative
34 analysis based on available data in terms of both financial and
35 carbon emission costs; and qualitative input gathered from tribal
36 governments, local governments, freight interests, and other key
37 stakeholders, including impacts on disadvantaged/underserved
38 communities. The analysis must include a robust public engagement
39 process to solicit feedback from interested stakeholders including

1 but not limited to: Residents and officials in affected cities and
2 counties; stakeholders involved in railroad, agriculture, fishing,
3 trucking, shipping and other related industries; appropriate Native
4 American tribes; representatives of advocacy and community
5 organizations; and transportation, public works, and economic
6 development organizations in the affected areas, federal highway
7 administration and army corps of engineers. The analysis must be
8 informed by the work of the joint transportation committee's
9 independent review team, and must include the following:

10 (i) Existing volumes and traffic patterns;

11 (ii) Potential changes in volumes and traffic patterns
12 immediately following the loss of freight movement by barge and over
13 the following 20 years, including the carbon emissions impact of this
14 mode shift;

15 (iii) Identification of whether regional geography, land
16 availability, and state and federal regulatory processes would allow
17 for rail and road expansions and increased capacity;

18 (iv) Identification of potential infrastructure and operational
19 improvements to existing highways, other roads, and rail, including
20 additional access to facilities, needed to accommodate the higher
21 freight volumes and impacts and potential opportunities to mitigate
22 impacts on shipping rates;

23 (v) Identification of rail line development options, including
24 impacts and potential opportunities to mitigate impacts on grain
25 storage and handling facilities at regional unit train yards and port
26 export facilities;

27 (vi) An assessment of costs associated with mitigating potential
28 slope failure and stabilization necessitated by the drawdown of the
29 river. An assessment of impacts and potential opportunities to
30 mitigate impacts on adjacent roads, bridges, railroads, and utility
31 corridors shall be included;

32 (vii) Both financial and carbon cost estimates for development
33 and implementation of identified needs and options, including
34 planning, design, and construction;

35 (viii) Analysis of the impacts and potential opportunities to
36 mitigate impacts of these infrastructure changes on environmental
37 justice and disadvantaged/underserved communities during
38 construction, as well as from future operations;

39 (ix) Analysis of safety impacts and potential opportunities to
40 mitigate impacts for a shift from barge transportation to rail or

1 truck, including increases in rural community traffic and consistency
2 with the Washington State Strategic Highway Safety Plan: Target Zero;

3 (x) Impacts and potential opportunities to mitigate impacts on
4 highly affected commodities, including agriculture, petroleum,
5 project cargo, and wind energy components;

6 (xi) Analysis of the impacts and potential opportunities to
7 mitigate impacts that reduced competition resulting from removing
8 barging of agricultural products on the Snake river would have on
9 Washington's agricultural industry along with impacts modal shifts
10 would have on the entire supply chain, including export facilities
11 and ports on the Lower Columbia River; and

12 (xii) Determination of the feasibility that additional east-west
13 freight rail capacity can be achieved, particularly through Columbia
14 River Gorge, and the alternative routes that exist in the event that
15 adding more infrastructure on these routes is not feasible.

16 (b) The department shall provide status updates on a quarterly
17 basis in coordination with the joint transportation committee. The
18 legislature intends to require a final report to the governor and the
19 transportation committees of the legislature by December 31, 2026.

20 (10) \$1,000,000 of the motor vehicle account—state appropriation
21 is provided solely for the department to develop an automated highway
22 speed safety camera pilot program to test two to three automated
23 traffic safety cameras on state highways. The goals of the automated
24 highway speed safety camera pilot program are to test speed camera
25 technology, determine the impact on speeding behavior in areas of
26 testing, and compile public response to the use of traffic safety
27 cameras on highways.

28 (a) The department must work with the Washington state patrol and
29 the traffic safety commission to develop the pilot program to
30 include, but not be limited to, the following program elements:

31 (i) Selection of technology;

32 (ii) Placement of cameras in high speed, collision, or fatality
33 locations;

34 (iii) Establishment of public notification and warning signs
35 prior to entering into an area with a speed safety camera;

36 (iv) Outreach and public engagement about the program and site
37 selection process; and

38 (v) Development and implementation of a process to collect and
39 report relevant pilot program data, including rates of speed prior

1 to, during, and after the use of pilot program cameras, and public
2 response to pilot program cameras.

3 (b) Automated traffic safety cameras may only take pictures of
4 the vehicle and the vehicle license plates.

5 (c) Ticketing of violators using vehicle speed information
6 captured by automated traffic safety cameras authorized under the
7 pilot program is prohibited during the pilot program.

8 (d) As part of the pilot program, the department may inform
9 registered vehicle owners of a vehicle's rate of speed exceeding the
10 posted speed limit and the amount of the fine the law would have
11 allowed to be imposed by providing notification by mail.

12 (e) The department is required to provide a program progress
13 report to the governor and transportation committees of the
14 legislature by September 30, 2024, to include a summary of public
15 input on the use of safety cameras, including objections, evaluation
16 of technologies used, and changes in speeding behavior.

17 (f) Photographs, microphotographs, electronic images, and other
18 personally identifying data captured and collected for the purposes
19 of the pilot program are for the exclusive use of the Washington
20 state patrol and department of transportation in carrying out the
21 pilot program, are not open to the public, and may not be used in
22 court in a pending action or proceeding.

1 The appropriations in this section are subject to the following
2 conditions and limitations:

3 (1) \$4,025,000 of the motor vehicle account—state appropriation
4 is provided solely for payments of a financing contract issued
5 pursuant to chapter 39.94 RCW for the department facility located at
6 15700 Dayton Ave N in Shoreline. All payments from the department of
7 ecology pursuant to the agreement with the department to pay a share

10 (2) (a) \$10,011,000 of the move ahead WA account—state
11 appropriation is provided solely for the department to improve its
12 ability to keep facility assets in a state of good repair. In using
13 the funds appropriated in this subsection, the department, with
14 periodic reporting to the joint transportation committee, must
15 develop and implement a prioritization of facility capital
16 preservation needs and repair projects. The legislature intends these
17 to be reasonable, forward-thinking investments that consider
18 potential future space efficiency measures and consolidations,
19 including those assessed as having high commercial value and
20 potential returns to state transportation funds associated with the
21 sale of the property. Prioritization must be based on, but not
22 limited to, the following criteria: (i) Employee safety and facility
23 security; (ii) state and federal regulatory and statutory
24 requirements and compliance issues, including clean buildings
25 requirements; (iii) quality of work issues; (iv) facility condition
26 assessment evaluations and scoring; (v) asset preservation; and (vi)
27 amount of operational support provided by the facility to the
28 achievement of the department's performance measures and outcomes,
29 including facility utilization based on field operations work
30 supported at the location. "Field operations" include maintenance,
31 transportation operations, materials testing, and construction.

32 (b) By October 15, 2024, covering the first 15 months of the
33 2023-2025 fiscal biennium, the department must provide a report based
34 on the prioritization of facility preservation needs and repair
35 projects developed pursuant to (a) of this subsection to the office
36 of financial management and the transportation committees of the
37 legislature. The report must include: (i) A by facility ranking based
38 on the criteria implemented; (ii) detailed information on the actions
39 taken in the previous period to address the identified issues and

1 deficiencies; and (iii) the plan, by facility, to address issues and
2 deficiencies for the remainder of the 2023-2025 fiscal biennium and
3 the 2025-2027 fiscal biennium.

4 (c) The by facility ranking developed under (b) of this
5 subsection must be the basis of an agency budget submittal for the
6 2025-2027 fiscal biennium.

7 (3) (a) \$1,200,000 of the multimodal transportation account—state
8 appropriation is provided solely for the department to evaluate
9 safety rest areas along Interstate 5 and Interstate 90 for potential
10 truck parking expansion opportunities. The department shall also
11 evaluate commercial vehicle inspection locations, in coordination
12 with the Washington state patrol, for potential truck parking
13 expansion opportunities.

14 (b) These evaluations must include assessments of opportunities
15 to provide additional truck parking through rest stop and inspection
16 location reconfiguration, expansion, and conversion, as well as
17 evaluation of potential improvements to restroom facilities at weigh
18 stations with truck parking. The department shall consider
19 opportunities to expand rest stop footprints onto additional
20 department-owned property, as well as opportunities to acquire
21 property for rest stop expansion. Opportunities to convert a rest
22 stop to a commercial vehicle-only rest stop must be considered if
23 property is available to develop a new light-duty vehicle rest stop
24 within a reasonable distance. The department shall include an
25 evaluation of a potential truck parking site at John Hill Rest Area
26 along the Interstate 90 corridor identified in the joint
27 transportation committee's "Truck Parking Action Plan." Evaluations
28 must include cost estimates for reconfiguration, expansion, and
29 conversion, as well as other recommendations for the development of
30 these sites.

31 (c) The department should consult with the federal highway
32 administration, the Washington state patrol, the Washington trucking
33 association, the freight mobility strategic investment board, and
34 local communities.

35 (d) The department must update the transportation committees of
36 the legislature on agency activities and their status by December 1,
37 2023, and to provide a final report to the transportation committees
38 of the legislature by December 1, 2024.

39 (4) \$15,457,000 of the motor vehicle account—state appropriation

6 repair and parts building at 6431 Corson Avenue South in Seattle. The
7 information developed must include square footage, components of the
8 facility, and cost comparisons with similar maintenance facilities.
9 Should the department request construction costs for this facility
10 in its agency budget submittal for the 2025-2027 fiscal biennium,
11 these costs must be explained in detail using the form C-100 required
12 for state agency capital building projects in the capital budget.

29 (I) ((~~. However,~~)) with the following conditions and limitations:

30 (a) Limited transfers of specific line-item project
31 appropriations may occur between projects for those amounts listed
32 subject to the conditions and limitations in section 601 ((~~of this~~
33 act)), chapter 472, Laws of 2023.

34 (b) The department must structure requests for qualifications and
35 requests for proposals in a manner that provides a high degree of
36 certainty that bids come in as expected according to engineer
37 estimates made through the cost estimate valuation process. The
38 department may request bid offers with alternates for components of a
39 larger project so that the department may present to the legislature

1 modified options for projects to minimize project delays and stay
2 within appropriated funding resources.

3 (c) If bid proposals exceed engineer estimates by more than five
4 percent, the department shall report this information to the
5 transportation committees of the legislature within two weeks of
6 receiving the bid proposals.

7 (d) It is the intent of the legislature to provide \$32,500,000 in
8 the 2025-2027 fiscal biennium and \$21,507,000 in the 2027-2029 fiscal

14 ALL PROJECTS as developed ((~~April 21, 2023~~) February 18, 2024,
15 Program - Highway Improvements Program (I). Any federal funds gained
16 through efficiencies, adjustments to the federal funds forecast, or
17 the federal funds redistribution process must then be applied to
18 highway and bridge preservation activities.

19 (3) Within the motor vehicle account—state appropriation and
20 motor vehicle account—federal appropriation, the department may
21 transfer appropriation authority between programs I and P, except for
22 appropriation authority that is otherwise restricted in this act, as
23 follows:

24 (a) Ten days prior to any transfer, the department must submit
25 its request to the office of financial management and the
26 transportation committees of the legislature and consider any
27 concerns raised.

28 (b) The director of the office of financial management must first
29 provide written authorization for such transfer to the department and
30 the transportation committees of the legislature.

31 (c) The department shall submit a report on appropriation
32 authority transferred in the prior fiscal year using this subsection
33 as part of the department's annual budget submittal.

3 of bonds authorized in RCW 47.10.873.

4 (7) The appropriations in this section include savings due to
5 anticipated project underruns; however, it is unknown which projects
6 will provide savings. The legislature intends to provide sufficient
7 flexibility for the department to manage to this savings target. To
8 provide this flexibility, the office of financial management may
9 authorize, through an allotment modification, reductions in the
10 amounts that are provided solely for a particular purpose within this
11 section subject to the following conditions and limitations:

12 (a) The department must confirm that any modification requested
13 under this subsection of amounts provided solely for a specific
14 purpose are not expected to be used for that purpose in this fiscal
15 biennium;

16 (b) Allotment modifications authorized under this subsection may
17 not result in increased funding for any project beyond the amount
18 provided for that project in the 2023-2025 fiscal biennium in LEAP
19 Transportation Document (~~(2023-2)~~) 2024-2 ALL PROJECTS as developed

30 the actions taken to date under this subsection.

31 (8) The department shall itemize all future requests for the
32 construction of buildings on a project list and submit them through
33 the transportation executive information system as part of the
34 department's annual budget submittal. It is the intent of the
35 legislature that new facility construction must be transparent and
36 not appropriated within larger highway construction projects.

37 (9) The legislature continues to prioritize the replacement of
38 the state's aging infrastructure and recognizes the importance of
39 reusing and recycling construction aggregate and recycled concrete

1 materials in our transportation system. To accomplish Washington
2 state's sustainability goals in transportation and in accordance with
3 RCW 70A.205.700, the legislature reaffirms its determination that
4 recycled concrete aggregate and other transportation building
5 materials are natural resource construction materials that are too
6 valuable to be wasted and landfilled, and are a commodity as defined
7 in WAC 173-350-100.

8 (10) By June 30, 2025, to the extent practicable, the department
9 shall decommission the facilities for the Lacey project engineering
10 office and the Tumwater project engineering office at the end of
11 their lease terms and consolidate the Lacey project engineering
12 office and the Tumwater project engineering office into the
13 department's Olympic regional headquarters.

14 (11) The legislature intends that any savings realized on the
15 following projects will not be attributable to the application of
16 practical design, retired risk, or unused contingency funding for the
17 purposes of RCW 47.01.480:

18 (a) I-5/Marvin Road/SR 510 Interchange (L1100110); and

19 (b) I-82/EB WB On and Off Ramps (L2000123).

20 (12) (a) (~~(\$300,000,000)~~) \$337,144,000 of the coronavirus state
21 fiscal recovery fund—federal appropriation, (~~(\$312,653,000)~~)
22 \$110,439,000 of the motor vehicle account—federal appropriation,
23 (~~(\$427,459,000)~~) \$45,112,000 of the move ahead WA account—federal
24 appropriation, \$576,827,000 of the move ahead WA account—state
25 appropriation, \$187,790,000 of the connecting Washington account—
26 state appropriation, \$2,960,000 of the motor vehicle account—local/
27 private appropriation, and (~~(\$1,293,000)~~) \$8,329,000 of the motor
28 vehicle account—state appropriation are provided solely for the Fish
29 Passage Barrier Removal project (OBI4001) with the intent of fully
30 complying with the federal *U.S. v. Washington* court injunction by
31 2030.

32 (b) The fish passage barrier removal program, in consultation
33 with the office of innovative partnerships, shall explore
34 opportunities to employ innovative delivery methods to ensure
35 compliance with the court injunction including, but not limited to,
36 public-private partnerships and batched contracts. It is the intent
37 of the legislature that appropriations for this purpose may be used
38 to jointly leverage state and local funds for match requirements in
39 applying for competitive federal aid grants provided in the

1 infrastructure investment and jobs act for removals of fish passage
2 barriers under the national culvert removal, replacement, and
3 restoration program. State funds used for the purpose described in
4 this subsection must not compromise full compliance with the court
5 injunction by 2030.

6 (c) The department shall coordinate with the Brian Abbott fish
7 passage barrier removal board to use a watershed approach by
8 replacing both state and local culverts guided by the principle of
9 providing the greatest fish habitat gain at the earliest time. The
10 department shall deliver high habitat value fish passage barrier
11 corrections that it has identified, guided by the following factors:
12 Opportunity to bundle projects, tribal priorities, ability to
13 leverage investments by others, presence of other barriers, project
14 readiness, culvert conditions, other transportation projects in the
15 area, and transportation impacts. The department and Brian Abbott
16 fish barrier removal board must provide updates on the implementation
17 of the statewide culvert remediation plan to the legislature by
18 November 1, 2023, and June 1, 2024.

19 (d) The department must keep track of, for each barrier removed:
20 (i) The location; (ii) the amount of fish habitat gain; and (iii) the
21 amount spent to comply with the injunction.

22 (e) During the 2023-2025 fiscal biennium, the department shall
23 provide reports of the amounts of federal funding received for this
24 project to the governor and transportation committees of the
25 legislature by November 1, 2023, and semiannually thereafter.

26 (13) (a) (~~(\$6,000,000)~~) \$5,944,000 of the move ahead WA account—
27 state appropriation (~~(is)~~) and \$15,000,000 of the model toxics
28 stormwater account—state appropriation are provided solely for the
29 Stormwater Retrofits and Improvements project (L4000040). It is the
30 intent of the legislature, over the 16-year move ahead WA investment
31 program, to provide \$500,000,000 for this program.

32 (b) (~~(The appropriation in this subsection)~~) Of the amounts
33 provided in this subsection, \$5,944,000 is provided solely for the
34 Urban Stormwater Partnership - I-5 Ship-Canal Bridge Pilot (Seattle)
35 project.

36 (c) The funding provided for stormwater retrofits and
37 improvements must enhance stormwater runoff treatment from existing
38 roads and infrastructure with an emphasis on green infrastructure
39 retrofits. Projects must be prioritized based on benefits to salmon
40 recovery and ecosystem health, reducing toxic pollution, addressing

1 health disparities, and cost-effectiveness. The department of
2 transportation must submit progress reports on its efforts to reduce
3 the toxicity of stormwater runoff from existing infrastructure,
4 recommendations for addressing barriers to innovative solutions, and
5 anticipated demand for funding each fiscal biennium.

6 (14) (a) (~~(\$35,465,000)~~) \$25,067,000 of the connecting Washington
7 account—state appropriation is provided solely for the SR 3 Freight
8 Corridor (T30400R) project. The legislature intends to provide a
9 total of \$78,910,000 for this project, including an increase of
10 \$12,000,000 in future biennia to safeguard against inflation and
11 supply/labor interruptions and ensure that:

12 (i) The northern terminus remains at Lake Flora Road and the
13 southern terminus at the intersection of SR 3/SR 302; and

14 (ii) Multimodal safety improvements at the southern terminus
15 remain in the project to provide connections to North Mason school
16 district and provide safe routes to schools (~~;~~ and

17 ~~(iii) Intersections on the freight corridor are constructed at~~
18 ~~Romance Hill and Log Yard road).~~

19 (b) With respect to right-of-way acquisition and the construction
20 of the SR 3 Freight Corridor project (T30400R), tribal consultation
21 with the Suquamish tribe shall begin at the earliest stage of
22 planning, including without limitation on all funding decisions and
23 funding programs, to provide a government-to-government mechanism for
24 the tribe to evaluate, identify, and expressly notify governmental
25 entities of any potential impacts to tribal cultural resources,
26 archaeological sites, sacred sites, fisheries, or other rights and
27 interests in tribal lands and lands within which the tribe possesses
28 rights reserved or protected by federal treaty, statute, or executive
29 order. The consultation is independent of, and in addition to, any
30 public participation process required under state law, or by a state
31 agency, including the requirements of Executive Order 21-02 related
32 to archaeological and cultural resources, and regardless of whether
33 the agency receives a request for consultation from the Suquamish
34 tribe. Regularly scheduled tribal consultation meetings with the
35 Suquamish tribe shall continue throughout the duration of any funding
36 or program decisions and proposed project approval.

37 (15) \$6,000,000 of the move ahead WA account—state appropriation
38 and \$10,000,000 of the move ahead WA account—federal appropriation
39 are provided solely for the SR 3/Gorst Area - Widening project

1 (L4000017). Tribal consultation with the Suquamish tribe must begin
2 at the earliest stage of planning, including, without limitation, all
3 funding decisions and funding programs, to provide a government-to-
4 government mechanism for the tribe to evaluate, identify, and
5 expressly notify governmental entities of any potential impacts to
6 tribal cultural resources, archaeological sites, sacred sites,
7 fisheries, or other rights and interests in tribal lands and lands
8 within which the tribe possesses rights reserved or protected by
9 federal treaty, statute, or executive order. The consultation is
10 independent of, and in addition to, any public participation process
11 required under state law, or by a state agency, including the
12 requirements of Executive Order 21-02 related to archaeological and
13 cultural resources, and regardless of whether the agency receives a
14 request for consultation from the Suquamish tribe. Regularly
15 scheduled tribal consultation meetings with the Suquamish tribe must
16 continue throughout the duration of any funding program and proposed
17 project approval.

18 (16) (a) \$84,500,000 of the move ahead WA account—federal
19 appropriation, \$137,500,000 of the move ahead WA account—private/
20 local appropriation, and \$53,000,000 of the move ahead WA account—
21 state appropriation are provided solely for the I-5 Columbia river
22 bridge project (L4000054). The legislature finds that the replacement
23 of the I-5 Columbia river bridge is a project of national
24 significance and is critical for the movement of freight. One span is
25 now 105 years old, at risk for collapse in the event of a major
26 earthquake, and no longer satisfies the needs of commerce and travel.
27 Replacing the aging interstate bridge with a modern, seismically
28 resilient, multimodal structure that provides improved mobility for
29 people, goods, and services is a high priority. Therefore, the
30 legislature intends to support the replacement of the I-5 Columbia
31 river bridge with an investment of \$1,000,000,000 over the 16-year
32 move ahead WA investment program.

33 (b) The legislature recognizes the importance of the I-5/Mill
34 Plain Boulevard project (L2000099) and intends to provide funding for
35 reconstruction of the existing interchange in coordination with
36 construction of the Interstate 5 bridge over the Columbia river.

37 (c) The department shall provide regular updates on the status of
38 ongoing coordination with the state of Oregon on any bistrate
39 agreements regarding sharing of revenues, use of revenues, and fiscal

1 responsibilities of each state. Prior to finalizing any such
2 agreement, the department shall provide a draft of the agreement to
3 the transportation committees of the legislature for review and
4 input. Additionally, the department shall advise on the status of any
5 bistate agreements to the joint transportation committee beginning in
6 September 2023 and quarterly thereafter until any agreements are
7 finalized.

8 (17) The legislature recognizes the importance of the US-12/Walla
9 Walla Corridor Improvements project (T20900R) and intends to advance
10 funding to provide matching funds if competitive federal funding is
11 awarded for the final remaining four-lane section between Wallula and
12 Nine Mile Hill. The department, in consultation with local
13 governments in the vicinity, must pursue any federal funding
14 available.

15 (18) \$2,642,000 of the move ahead WA account—state appropriation
16 is provided solely for the US 101/Simdars Bypass project (L4000013).

17 (19) (~~(\$570,842,000)~~) \$338,512,000 of the connecting Washington
18 account—state appropriation, (~~(\$155,000)~~) \$3,109,000 of the
19 multimodal transportation account—state appropriation,
20 (~~(\$26,537,000)~~) \$27,201,000 of the motor vehicle account—private/
21 local appropriation, (~~(\$200,800,000)~~) \$178,543,000 of the move ahead
22 WA account—federal appropriation, (~~(\$68,191,000)~~) \$36,370,000 of the
23 move ahead WA account—state appropriation, and (~~(\$6,980,000)~~)
24 \$211,131,000 of the motor vehicle account—federal appropriation are
25 provided solely for the SR 167/SR 509 Puget Sound Gateway project
26 (M00600R).

27 (a) Any savings on the project must stay on the Puget Sound
28 Gateway corridor until the project is complete.

29 (b) In making budget allocations to the Puget Sound Gateway
30 project, the department shall implement the project's construction as
31 a single corridor investment. The department shall continue to
32 collaborate with the affected stakeholders as it implements the
33 corridor construction and implementation plan for state route number
34 167 and state route number 509. Specific funding allocations must be
35 based on where and when specific project segments are ready for
36 construction to move forward and investments can be best optimized
37 for timely project completion. Emphasis must be placed on avoiding
38 gaps in fund expenditures for either project.

1 (c) The entire multimodal transportation account—state
2 appropriation in this subsection is for:

3 (i) The design phase of the Puyallup to Tacoma multiuse trail
4 along the state route number 167 right-of-way acquired for the
5 project to connect a network of new and existing trails from Mount
6 Rainier to Point Defiance Park; and

7 (ii) Segment 2 of the state route number 167 completion project

12 Washington account—state appropriation, (~~(\$400,000)~~) \$1,250,000 of
13 the state route number 520 corridor account—state appropriation, and
14 (~~(\$4,496,000)~~) \$5,592,000 of the motor vehicle account—private/local
15 appropriation are provided solely for the SR 520 Seattle Corridor
16 Improvements - West End project (M00400R) and are subject to the
17 following conditions and limitations:

18 (a) The department shall reject any bid offers on the Portage Bay
19 Bridge and Roanoke lid project that exceed engineer estimates by more
20 than 10 percent. If all bid offers are rejected, the department shall
21 repackage the request for qualifications and the request for
22 proposals for the north bridge portion of this project only. The
23 legislature recommends that the north bridge project be delivered
24 using the progressive design-build delivery method. It is the intent
25 of the legislature to complete the southern bridge and Roanoke lid
26 portion of the project at a future time.

27 (b) Upon completion of the Montlake Phase of the West End project
28 (current anticipated contract completion of (~~(2023)~~) 2024), the
29 department shall sell or transfer that portion of the property not
30 (~~(used for permanent)~~) needed for transportation (~~(improvements)~~)
31 purposes and shall initiate a process to convey (~~(that)~~) or transfer
32 such portion of the surplus property to a subsequent owner.

33 (c) Of the amounts provided in this subsection, (~~(\$400,000)~~)
34 \$500,000 of the state route number 520 corridor account—state
35 appropriation is provided solely for noise mitigation activities. It
36 is the intent of the legislature to provide an additional \$600,000
37 for noise mitigation activities.

38 (d) Of the amounts provided in this subsection, \$750,000 of the
39 state route number 520 corridor account—state appropriation is

2 result of a public process related to signage:

3 (i) Remove and replace an existing sign bridge on Montlake
4 boulevard;

5 (ii) Repaint an existing sign bridge on the newly constructed
6 Montlake lid; and

7 (iii) Install appropriate signage on southbound Montlake
8 boulevard north of the westbound SR 520 on-ramp.

9 (21) \$450,000 of the motor vehicle account—state appropriation is
10 provided solely for the SR 900 Safety Improvements project
11 (L2021118). The department must: (a) Work in collaboration with King
12 county and the Skyway coalition to align community assets,
13 transportation infrastructure needs, and initial design for safety
14 improvements along state route number 900; and (b) work with the
15 Skyway coalition to lead community planning engagement and active
16 transportation activities.

17 (22) (~~(\$25,000,000)~~) \$7,500,000 of the motor vehicle account—
18 federal appropriation is provided solely for a federal fund exchange
19 pilot program. The pilot program must allow exchanges of federal

23 to all federal requirements, including the applicable disadvantaged
24 business enterprise goals. The entirety of the appropriation in this
25 subsection must be held in unallotted status until surface
26 transportation block grant population funding has been offered to the
27 state, and the department determines that a federalized project or
28 projects funded in this section is eligible to spend the surface
29 transportation block grant population funding. \$22,500,000 from
30 existing state appropriations identified elsewhere within this
31 section are available to be used as part of the exchange. Upon
32 determination that a project or projects funded in this section is
33 eligible to spend the offered surface transportation block grant
34 population funding, state funds appropriated in this section for the
35 eligible state project or projects in an amount equal to 100 percent
36 of the offered surface transportation block grant population funding
37 must be placed in unallotted status.

38 (23) (~~(\$5,000,000 of the motor vehicle account state~~

18 appropriation and \$2,213,000 of the motor vehicle account—state
19 appropriation are provided solely for the SR 224/Red Mountain
20 Vicinity Improvement Project (L1000291). The department shall provide
21 funding to the city of West Richland to complete the project within
22 the project scope identified by the legislature and within the total
23 amount of funding provided by the legislature. The department shall
24 not amend the project scope of work to add pavement preservation on

13 account—state appropriation, and the entire transportation
14 partnership account—state appropriation are provided solely for the
15 projects and activities as listed by fund, project, and amount in
16 LEAP Transportation Document ((~~2023-1~~)) 2024-1 as developed ((~~April~~
17 ~~21, 2023~~)) February 18, 2024, Program - Highway Preservation Program
18 (P). However, limited transfers of specific line-item project
19 appropriations may occur between projects for those amounts listed
20 subject to the conditions and limitations in section 601 ((~~of this~~
21 ~~act~~)), chapter 472, Laws of 2023.

22 (2) Except as provided otherwise in this section, the entire

30 highway and bridge preservation activities.

31 (3) Within the motor vehicle account—state appropriation and
32 motor vehicle account—federal appropriation, the department may
33 transfer appropriation authority between programs I and P, except for
34 appropriation authority that is otherwise restricted in this act, as

37 its request to the office of financial management and the
38 transportation committees of the legislature and consider any
39 concerns raised.

1 (b) The director of the office of financial management must first
2 provide written authorization for such transfer to the department and

NEW SECTION. **Sec. 602.** A new section is added to 2023 c 472 (uncodified) to read as follows:

(1) The transportation carbon emissions reduction account is created in the state treasury. Moneys in the account may be spent only after appropriation. Expenditures from the account are intended to affect reductions in transportation sector carbon emissions through a variety of carbon reducing investments. Such investments may include, but are not limited to: Transportation alternatives to single occupancy passenger vehicles; reductions in single occupancy passenger vehicle miles traveled; reductions in per mile emissions in vehicles, including through the funding of alternative fuel infrastructure and incentive programs; and emission reduction programs for freight transportation, including motor vehicles and rail, as well as for ferries and other maritime and port activities. 33 inventory of the current number, and an estimate of the increased
34 number required to meet the anticipated need, of the following:

35 (a) Licensed driver training schools and traffic safety education
36 programs in the state, by geographical region;

37 (b) Licensed driver training school and traffic safety education
38 instructors;

39 (c) Licensed driver trainer instructors; and

1 (d) Driver training education course spaces available per year,
2 by course option and for both classroom and behind-the-wheel
3 instruction;

4 (3) In consultation with the office of equity, evaluation of
5 access to driver training education courses and consideration of
6 opportunities to improve access to driver training education for
7 young drivers. The assessment must address, but should not be limited
8 to, potential obstacles for young drivers for whom the cost of driver
9 training education may pose a hardship, obstacles related to
10 accessibility for young drivers who reside in rural areas, and
11 obstacles for young drivers whose primary language is not English.
12 The assessment must also include strategies that can be used to
13 mitigate these potential obstacles, including possible exceptions to,
14 or substitutions for, a driver training education requirement in
15 cases where access-related obstacles cannot be overcome, such as when
16 a behind-the-wheel driver training program may not be available
17 within a reasonable distance of a person's residence;

18 (4) A plan for broad and accessible public outreach and education
19 to communicate to Washington state residents new driver training
20 education requirements, including a plan for the development of tools
21 to assist residents in accessing driver training education courses
22 that meet the new requirements;

23 (5) Collaboration with educational service districts to determine
24 the extent to which educational service districts can facilitate the
25 coordination between school districts or secondary schools of a
26 school district and driver training schools to increase access to
27 driver training education courses by students who reside within the
28 boundaries of an applicable school district;

29 (6) An examination of opportunities to address the financial need
30 of persons for whom the cost of driver training education courses
31 licensed by the department of licensing may pose a hardship, through
32 a voucher or other financial assistance program. The examination must
33 include quantified estimates of the extent to which the cost of
34 driver training education could pose a significant obstacle, as well
35 as possible approaches to help reduce or eliminate this obstacle;

36 (7) An examination, in consultation with the office of the
37 superintendent of public instruction, of opportunities to address the
38 financial need of students for whom the cost of driver training
39 education offered as part of a traffic safety education program may
40 pose a hardship, through a grant or other financial assistance

1 program. The examination must include quantified estimates of the
2 extent to which the cost of driver training education could pose a
3 significant obstacle, as well as possible approaches to help reduce
4 or eliminate this obstacle; and

5 (8) An assessment of approaches used by other states that require
6 driver training by persons age 18 and older, including examination of
7 how this has impacted traffic safety in the state and the extent to
8 which the requirement may have decreased access to driver's licenses,
9 including through examination of the rate of driver's license holders
10 by age and other demographic characteristics compared to that of
11 neighboring, or otherwise similarly situated, states.
