H-9075.1

SENATE BILL 7800

State of Washington   **68th Legislature**   **2024 Regular Session**

By Senator L. Wilson

Prefiled 12/01/23.

1   AN ACT Relating to the Use of Product Plan; and adding a new
2 section to chapter 1.04 RCW.

3 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

4   NEW SECTION. **Sec. 1.** A new section is added to chapter 1.04 RCW
5 to read as follows:
6   App Portfolios and LEG-TECH Teams have roadmaps, e.g., Lawmaking,
7 Rostrum, Admin Apps, Public Web portfolios and TSG, CSG, MSG have
8 dedicated roadmaps. Each "Bar" or "Container" on the roadmap
9 represents a project with estimated start and end dates. A
10 "Container" can be a parent to many bars for tracking milestones or
11 other increments of a project. "Containers" can be collapsed for ease
12 of viewing the roadmap. "Bars" can also be placed directly on a
13 roadmap Lanes are used to represent subgroups or application suites
14 The Legend is used for project status. "Tags" are used to represent
15 cross-team dependencies. Portfolio or Team roadmaps will roll into
16 higher-level views for Leadership and cross-team planning. Wherever
17 possible, we'll start as simple as possible, add things, and increase
18 complexity only where it is worth it. Any roadmap expected to be
19 rolled up and shared across teams must follow the agreed-upon
20 standards. Roadmaps meant for internal use only can break from

1 standards to meet specific purposes. We will align on an initial
2 configuration, then collect feedback and adjust.

--- END ---
