

WAC 173-446-520 Listing of offset projects using ecology compliance offset protocols. (1) Registration requirements for offset project operators or authorized project designees who are submitting an offset project for listing. Before an offset project can be listed by ecology or an offset project registry, the party with legal authority to implement the offset project must be registered with ecology as an offset project operator under WAC 173-446-055. To register as a general market participant, the registered offset project operator or its authorized project designee must:

(a) Submit the information required by WAC 173-446-055 (3)(a); and

(b) Not be subject to any holding account restrictions.

(2) If an offset project is not listed by ecology, it must be listed by an approved offset project registry before the offset project operator for that offset project may receive offset credits under this chapter.

(3) General requirements for offset project listing. For offset projects being listed by ecology or an offset project registry in an initial or renewed crediting period, the offset project operator and its authorized project designee(s) must:

(a) Disclose all GHG emission reductions and GHG removal enhancements that are attributable to the offset project being listed and for which offset credits have been issued by any voluntary or mandatory program(s) or which have been used to satisfy any other GHG mitigation requirement; and

(b) Attest, in writing, to ecology as follows:

(i) "I certify under penalty of perjury under the laws of the state of Washington the GHG emission reductions and/or GHG removal enhancements for (project) from (date) to (date) will be measured in accordance with the (applicable Compliance Offset Protocol) and all information required to be submitted to ecology is true, accurate, and complete."; and

(ii) "I understand that the offset project activity(ies) and implementation of the offset project must be in accordance with all applicable local, regional, state, and national environmental and health and safety laws and regulations that apply in the jurisdiction in which the offset project is located. I understand that offset projects that are not in compliance with the requirements of this chapter are not eligible to receive Ecology offset credits or registry offset credits for GHG emission reductions and GHG removal enhancements."; and

(iii) Except as provided in (b)(iv) of this subsection: "I understand I am voluntarily participating in this program and by doing so, I am now subject to all regulatory requirements and enforcement mechanisms of this program and subject myself to the jurisdiction of Washington as the exclusive venue to resolve any and all disputes arising from the enforcement of provisions in this chapter."; and

(iv) For federally recognized tribes who elect to participate as offset project operators pursuant to RCW 70A.65.090(5), the following attestation may be submitted in lieu of the attestation required by (b)(iii) of this subsection: "I understand I am voluntarily participating in this program. The tribal government on whose behalf I am authorized to make this submission has entered into a written agreement, negotiated on an individual basis between ecology and the tribal government, that establishes a dispute resolution process and/or other compliance mechanisms in order to ensure the enforceability of all

program requirements applicable to the tribe in its role as an offset project operator."

(c) Provide all documentation required to ecology or an offset project registry.

(d) Except as provided in (e) of this subsection, if any portion of the offset project is located on land over which the state of Washington does not have jurisdiction, the offset project operator must demonstrate that the landowner(s) consent(s) to regulation by ecology and the jurisdiction of the courts and administrative tribunals of the state of Washington with respect to any judicial or administrative enforcement action commenced by ecology to ensure compliance with the requirements of chapter 70A.65 RCW and this chapter.

(e) For offset projects located on tribal land, land that is owned by a tribe, or land that is subject to an ownership or possessory interest of a tribe, the offset project operator must demonstrate that the tribe has entered into a written agreement, negotiated on an individual basis between ecology and the tribal government, that establishes a dispute resolution process and/or other compliance mechanisms in order to ensure the enforceability of all program requirements applicable to the tribe in its role as the owner of land on which an offset project is located.

(4) The attestations required by subsection (3)(b) of this section must be provided to an offset project registry with the listing information, if the offset project is being listed with an offset project registry, or to ecology if the offset project is being listed with ecology.

(5) Offset project listing information requirements. Before an offset project can be publicly listed for an initial or renewed crediting period, the offset project operator or authorized project designee must provide the listing information in the most recently adopted version of the applicable compliance offset protocol for that offset project type as set forth in WAC 173-446-505(3).

(6) Review of offset project listing information. Ecology and/or the offset project registry, as applicable, will review the offset project listing information submitted pursuant to subsection (5) of this section for completeness.

(a) Notice of completeness for offset project listing information. Within 30 calendar days of receiving complete and accurate listing information as required by subsection (5) of this section, ecology or the offset project registry, as applicable, will notify the offset project operator or authorized project designee that the offset project may be listed.

(b) If ecology or the offset project registry, as applicable, determines that the information submitted is incomplete, inaccurate, or that rejection of the listing information is otherwise required, ecology or the offset project registry will notify the offset project operator or authorized project designee of this determination within 30 calendar days of receiving the listing information from the offset project operator or authorized project designee. The offset project operator or authorized project designee may resubmit offset project listing information.

(7) Timing for offset project listing in an initial crediting period. The offset project operator or authorized project designee must submit the information required by subsection (5) of this section to ecology or an offset project registry, as applicable, according to the following deadlines:

(a) No later than the date on which the offset project operator or authorized project designee submits its required offset project data report for its first reporting period under a compliance offset protocol to ecology or an offset project registry; and

(b) No later than one year after offset project commencement, or no later than one year after meeting all of the requirements of this section, whichever is later. If the offset project operator or authorized project designee does not submit the listing information for the offset project to ecology or an offset project registry within one year of offset project commencement, or within one year of meeting the requirements of this section, whichever is later, the offset project will be ineligible to be listed under a compliance offset protocol and will not be issued registry offset credits or ecology offset credits.

(8) Listing status of offset projects in an initial crediting period. After the offset project operator or authorized project designee submits the offset project for listing in an initial crediting period and all required documentation, and ecology or the offset project registry has reviewed the offset project listing information for completeness, the offset project listing status will be labeled "Proposed Project." If the offset project is not ultimately accepted for listing by an offset project registry, the offset project operator or authorized project designee may request that ecology make a final determination as to whether the offset project meets the requirements to be listed for an initial crediting period by the offset project registry. Ecology may consult with the offset project registry before making such a determination.

(9) Timing for offset project listing in a renewed crediting period. The offset project operator or authorized project designee must submit the information required by subsection (5) of this section for purposes of listing the offset project for a renewed crediting period to ecology or an offset project registry, as applicable, no earlier than 18 months and no later than nine months before conclusion of the initial crediting period or a previous renewed crediting period.

(10) Listing status of offset projects in a renewed crediting period. After the offset project operator or authorized project designee submits the offset project for listing in a renewed crediting period and all required documentation, and ecology or the offset project registry has reviewed the offset project listing information for completeness, the offset project listing status will be labeled "Proposed Renewal." The verification body must assess that the offset project meets the additionality requirements set forth in WAC 173-446-510

(1)(c) and in the applicable compliance offset protocol as of the date of the commencement of the renewed crediting period when conducting offset verification services for the first reporting period of a renewed crediting period. If the offset project is not ultimately accepted for listing by an offset project registry, the offset project operator or authorized project designee may request that ecology make a final determination as to whether the project meets the requirements of this section to be listed for a renewed crediting period by the offset project registry. Ecology may consult with the offset project registry before making such a determination.

(11) Once ecology or an offset project registry approves an offset project for listing, the listing information is considered final, and may not be changed unless the offset project operator changes during the crediting period. If the offset project operator changes during the crediting period, the new offset project operator or its authorized project designee must submit updated listing information for

the information that pertains to the offset project operator and authorized project designee, if applicable, to ecology within 30 calendar days of the change.

(12) Limitations for crediting period renewals. A crediting period may be renewed if the offset project meets the requirements for additionality set forth in WAC 173-446-510 (1)(c) and in the applicable compliance offset protocol.

(a) The crediting period for offset projects that do not involve sequestration may be renewed twice for the length of time identified by the applicable compliance offset protocol.

(b) Offset projects that involve sequestration are not subject to any renewal limits.

(13) Transferring an offset project. If the offset project operator or authorized project designee transfers an offset project listed with ecology to an offset project registry, or transfers a project listed with an offset project registry to ecology or another offset project registry:

(a) Ecology or the offset project registry that originally listed the offset project must change the offset project listing status on its registry system to "transferred project."

(i) If the only action taken by the offset project operator or the authorized project designee was to have the listing documentation for the offset project approved by ecology or the original offset project registry, ecology or the original offset project registry, as applicable, must retain the information related to the offset project on its website for the duration of one year before it can be removed from the registry system.

(ii) If the listing documentation was only submitted by the offset project operator or authorized project designee, but not approved by ecology or the original offset project registry, ecology or the original offset project registry, as applicable, does not need to retain the submitted listing documentation on its website.

(iii) If a verification body submitted an offset verification statement for the offset project being transferred, ecology or the original offset project registry, as applicable, must retain the information related to the offset project on its website for the duration of the offset project life.

(iv) Ecology or the new offset project registry, as applicable, must retain the listing date and all listing information as approved by ecology or the original offset project registry. If the offset project has not undergone initial verification, the offset project commencement date may change as a result of verification activities only.

(b) The offset project operator or authorized project designee must submit the original listing documentation reviewed and accepted by ecology or the original offset project registry, as applicable, pursuant to this section to ecology or the new offset project registry, as applicable. The offset project operator or authorized project designee may only make changes to the listing documentation if the offset project operator changes during the crediting period pursuant to subsection (11) of this section.

(c) The offset project operator or authorized project designee may not transfer an offset project to ecology or another offset project registry once a notice of offset verification services has been submitted for a reporting period(s) or during the course of offset verification services for a reporting period(s). Once a notice of offset verification services has been submitted, the offset verifica-

tion services must be completed for the applicable reporting period(s) before the offset project operator or authorized project designee may transfer the offset project to ecology or another offset project registry. Once the offset verification services are completed for the applicable reporting period(s), the offset project operator or authorized project designee may transfer the offset project to ecology or another offset project registry.

(14) Limitations for listing forest offset projects. Once a forest offset project has been issued registry offset credits or ecology offset credits, no other offset project may be listed within the offset project boundary of the previous offset project unless the previous offset project was terminated due to an unintentional reversal or otherwise specified in the applicable compliance offset protocol.

(15) Modification or waiver of requirements for purposes of aggregation. Ecology may elect to waive or modify listing requirements in this section for offset projects that are grouped together for the purposes of aggregation. Any proposed modifications or changes to the procedures noted in this section must be approved in advance by ecology and be documented in writing in a manner and format specified by ecology.
